Welcome to the Heritage Expeditions 2018-2019 brochure, our 34th annual version, we were expedition cruising before it was fashionable! As a proud family owned and operated New Zealand based company we have always tried to remain at the forefront of expedition travel, bringing you more authentic, in-depth experiences and one of a kind wildlife opportunities aboard our comfortable yet robust purpose built research expeditions ships.

Heritage Expeditions was founded in 1984 by Rodney and Shirley Russ to welcome inquisitive travellers to explore the seldom visited and far reaches of New Zealand, since then we have continually grown and developed while remaining true to our founding principles. Today the world of Heritage Expeditions continue to expand and now reaches from the remote Ross Sea Region of Antarctica to the historic Russian shores of Wrangel Island in the Far Northern Arctic and an amazing diversity of landscapes, people and wildlife in between.

The last year has seen the Spirit of Enderby and Akademik Shokalskiy venturing further afield than ever with another new record for southerly navigation achieved in the Bay of Whales where the polar explorer Roald Amundsen had his base, and during the northern summer, a double transit of the NE Passage between Anadyr and Murmansk. Wildlife highlights have included a morning spent with several hundred Humpback Whales at the little known Balleny Islands, a glimpse of the Superb Pitta on Manus Island during our Melanesia Discoverer Voyage and most recently in Russia, there was as sighting of the exceptionally rare North Pacific Right Whale and an afternoon spent in the company of a record 181 Polar Bears feeding on a Bowhead Whale carcass.

In early 2018 the company’s founder, Rodney Russ will be stepping aside from Heritage Expeditions to pursue his own explorations aboard his soon to be completed yacht. He is leaving the company in the trusted hands of the senior management team which will continue to be family-led with both of us at the helm. We have both been involved with expedition cruising from an early age and over the years have had the pleasure of travelling with many of you. With a long apprenticeship starting behind the bar and continuing through zodiac driving to expedition leading, we are looking forward to sharing our passion and enthusiasm for expedition cruising and the unique and wild destinations that we call home.

In March 2018 our Spirit of Enderby will complete its five year survey and we will be taking this opportunity to do a major refurbishment to improve the public spaces and cabins, watch for updates in the coming months on these. We are looking forward to an exciting and busy season of expedition voyages for 2018-2019 starting with our season in Russia followed by Melanesia and the Southern Ocean. There are plan afoot for some exciting projects and voyages in 2019, stay tuned for updates.

Yours in Adventure

Aaron & Nathan Russ
WHAT IS EXPEDITION CRUISING?

Expedition cruising is a unique form of travel. It offers travellers (not tourists) the opportunity to go where few have been before, and experience wilderness, wildlife and cultures in a genuine and responsible way.

Expedition cruise ships are smaller vessels, designed to navigate areas inaccessible to larger ships. These smaller vessels avoid the negative impact of large cruise ships and groups on a culture or ecosystem. Participants go ashore in small groups by Zodiac at unique destinations with the clear objective of gaining a greater understanding and appreciation of the region or culture, not simply for sightseeing.

The staff aboard expedition cruise ships are teachers and interpreters, not entertainers. Their objective is to inform, enthuse and create ambassadors for conservation. Genuine expedition cruising appeals to people from all walks of life from around the world and can be enjoyed regardless of age, interests, knowledge or physical prowess.

New Zealand based Heritage Expeditions, founded in 1985 by Rodney and Shirley Russ, is one of the few companies that still offers genuine expedition cruises. Heritage Expeditions pioneered expedition cruising in the Subantarctic islands of New Zealand and Australia. Soon after the Ross Sea region of Antarctica was added and more recently the Russian Far East and the South Pacific have been included in the company’s long list of regular destinations.

Heritage Expedition’s vessel the Spirit of Enderby accommodates just 50 passengers. She boasts Australasian chefs who provide international quality cuisine. The cabins are clean and comfortable, with the majority offering private facilities. The officers and crew are amongst the most experienced in the world and they are complemented by a passionate and knowledgeable expedition team. Perhaps one of the more unique features of the Spirit of Enderby however is that she is one of the last family operated expedition vessels of her size and ice class in the world.

Heritage Expeditions was founded and is still owned and operated by a family of biologists and adventurers committed to providing an authentic expedition cruising experience.
Heritage Expeditions makes every effort to respect the environment in all aspects of its operation. We are a leader in Responsible Travel to remote places on the globe and our objective is to tread and cruise lightly wherever we go.

We minimise waste and employ recycling policies on the ship and in our head office by selecting environmentally friendly products and produce. Our goal in managing our vessel is to minimise fuel consumption and emissions with regular servicing and a proactive maintenance program. We annually clean and antifoul our vessels hull to reduce the risk of bio fouling. When selecting our specialist expedition equipment, we research this carefully to ensure that they are the most suitable and environmentally responsible.

We travel in small groups (max of 50 pax) and endeavour to maintain a guide to client ratio of 1:12. Each expedition is led by an experienced Expedition Leader familiar with the region being visited and where at all possible we employ local experts. We make sure that all expedition members are respectful of local customs and traditions and are aware of and abide by the conditions of our entry permits to nature reserves and specially protected areas.

Heritage Expeditions supports numerous worldwide conservation programs with funds, advocacy and logistical support. We are proud to be a Species Champion for the critically endangered Spoon-billed Sandpiper with BirdLife International. We are not afraid to take a stand on issues we feel strongly about and joined with Whale and Dolphin Conservation opposing the importation of wild Beluga Whales from Russia into a United States aquarium. We have partnered with both New Zealand and Russian government agencies to negotiate and develop sustainable and best practice tourism policies for their respective world class nature reserves.

Heritage Expeditions works closely with the Department of Conservation (DOC) to ensure that our impact on New Zealand’s National Parks and reserves is minimal. We are an approved concession holder, ensuring that your visit with us to conservation lands adheres to best practice and contributes to the management of these protected areas. In Russia we work closely with several National Parks and Federal Reserves, including Beringia National Park and the Wrangel Island Reserve. Our goal is to minimise our impact on the environment and on the wildlife but at the same time ensure a world class experience for all our expeditioners.

Heritage Expeditions holds active membership in a number of conservation and travel organisations including the International Association of Antarctic Tour Operators (IAATO) and the Arctic Expedition Cruise Operators (AECO).
EXpedition Staff

As a family-owned and operated company, we have also assembled a world renowned team of experts to travel with you and to interpret the natural and human history along the way.

Adam Walleyn was born in the Canadian Prairies, and has found his niche in Expedition Travel as a guide and naturalist. Knowledgeable and unflappable he is the perfect guide and companion when travelling to remote shores. He returns to the Russian Far East and Southern Ocean for another season – because in his words “there is still so much more to see and share”.

Sarah Gutowsky’s speciality is seabirds and conservation; she has recently completed a doctorate studying the complex movement and ecology of the North Pacific’s magnificent albatrosses. A native Canadian, when she is not guiding expeditions in the Arctic and Antarctica she teaches at a Nova Scotia University.

Dan Brown grew up in Bangor University’s botanic garden, North Wales, after 18 years surrounded by plants and animals it was only natural that he went on to complete an Ecology degree. Dan has set up his own ecological consultancy which provides field and technical support to a variety of organisations on biodiversity related projects.

Dan Brown grew up in Bangor University’s botanic garden, North Wales, after 18 years surrounded by plants and animals it was only natural that he went on to complete an Ecology degree. Dan has set up his own ecological consultancy which provides field and technical support to a variety of organisations on biodiversity related projects.

Aaron Russ has grown up surrounded by wildlife and wilderness. He has been Expedition Leader on over 100 expeditions to the world’s most remote regions. With a degree in zoology, a passion for photography and a desire to showcase the world’s premier natural history destinations, expedition leading comes naturally.

Nathan Russ; the younger of Rodney’s two sons has worked as a chef on a number of expedition vessels around the world. A keen and capable Expedition Leader, he has led numerous expeditions, including Svalbard, Antarctica, the Subantarctic Islands, Melanesia and all of our voyages in Russia. When not on an expedition, he manages the company’s vessel.

Samuel Blanc grew up in the French Alps. After three years working as a naturalist guide in France and Spain, Samuel spent 15 months at the French Antarctic research station Dumont d’Urville. There he studied seals, petrels, skuas, Adelie and Emperor Penguins. A keen photographer and passionate Polar Region specialist he joins us again to share his knowledge.

Sarah Gutowsky’s speciality is seabirds and conservation; she has recently completed a doctorate studying the complex movement and ecology of the North Pacific’s magnificent albatrosses. A native Canadian, when she is not guiding expeditions in the Arctic and Antarctica she teaches at a Nova Scotia University.

Alex Fergus received an Enderby Trust Scholarship, triggering his ongoing subantarctic research projects. After two voyages south he studied in Switzerland before joining the Campbell Island Bicentennial expedition. His Russian Far East botanical forays have deepened his passion for plants. Alex lives in Bluff, daily casting his eyes south to the Subantarctic, and works as a field botanist.
Dr. Huw Lewis-Jones is a historian of exploration with a PhD from the University of Cambridge. He was a Curator at the Scott Polar Research Institute and the National Maritime Museum in London and is now an award-winning author. Huw frequently appears on television and radio as a historian, most recently as onscreen expert in the BBC documentaries Wilderness Explored, Frank Wild: Antarctica’s Forgotten Hero and Of Ice and Men.

Grigory Tsidulko graduated from the Moscow State University with a Masters in Marine Biology. He has spent many years working ‘in the field’ in the Commander and Sakhalin Islands and has specialised in the behaviour of Arctic Foxes of the Commander Islands, and the ecology of Gray Whales off the Sakhalin Coast. Fluent in English and Russian, Grigory (or Grisha) is heavily involved in conservation efforts to protect the Russian Far East.

David Harrowfield has had a life-long interest in Antarctica and has made numerous visits to the Ross Sea region with New Zealand’s Antarctic programme and the Antarctic Heritage Trust. He has published extensively and is a frequent visitor to the Scott Polar Research Institute UK. David looks forward to sharing your Antarctic and Subantarctic experience.

Julia Mishina was born and raised in Kamchatka. Her first vocation was teaching but she has been involved in travel and tourism for a number of years. She is responsible for the permits and permissions required to operate our expeditions and regularly joins us on board as an Assistant Expedition Leader.

Lisle Gwynn is a mixture of rugged Celt and English gentleman. After graduating from university he received a scholarship which led him to the Cape of South Africa where he spent several years birding and studying birds of prey and fynbos endemics. Tubenoses and marine mammals are two of his greatest passions in life.

Agnes Breniere’s love of nature began when she grew up in the French Alps. A self taught naturalist, she graduated in environmental law and management. Agnes has managed to combine her love of nature with a passion for travel into a satisfying career as an expedition guide, where she is happiest in the Polar Regions.

Chris Collins a former accountant turned Birder. His role in researching and organising the now famous Western Pacific Odyssey (WPO) Expedition is legendary. He brings this same passion and knowledge to many of these “Birding” expeditions. His attitude to birding is professional and ‘infectious’. A true team player he is always there to help and share his knowledge.

Agnès Brenière's love of nature began when she grew up in the French Alps. A self taught naturalist, she graduated in environmental law and management. Agnes has managed to combine her love of nature with a passion for travel into a satisfying career as an expedition guide, where she is happiest in the Polar Regions.

SPIRIT OF ENDERBY

The Spirit of Enderby (Professor Khromov) is the complete expedition vessel. Built in 1984 for polar and oceanographic research, she is fully ice-strengthened. This class of vessel is world renowned for Polar Expedition Cruising because of its strength, manoeuvrability and small passenger numbers. With a maximum of 50 passengers on Heritage Expedition voyages, we are one of the few remaining companies still offering the true small ship experience.

She is undergoing refurbishment in 2018 to provide upgraded accommodation in twin and triple share cabins, approximately half of which have private facilities. All cabins have outside windows or portholes and ample storage space. On board there is a combined bar/library lounge area and a dedicated lecture room.

| MINI SUITES | Separate bedroom with a double bed and a single bed or sofa in the lounge, writing desk, wardrobe and drawers. Private bathroom with shower, toilet and washbasin. Mini Suites have windows. |

| SUPERIOR PLUS CABINS | Two lower berths, writing desk, wardrobe and drawers. Private bathroom with shower, toilet and washbasin. These cabins have windows. (411 double bed and single). |

| SUPERIOR CABINS | One bunk (one upper and one lower berth), writing desk, wardrobe and drawers. Private bathroom with shower, toilet and washbasin. These cabins have windows. |

| MAIN DECK CABINS | Two lower berths, writing desk, wardrobe and drawers. Private washbasin. Shared shower and toilet facilities nearby with other Main Deck cabins. These cabins have a porthole. |

| MAIN DECK TRIPLE | One bunk (one upper and one lower berth) and one additional lower berth, writing desk, wardrobe and drawers. Private washbasin. Shared shower and toilet facilities nearby with other Main Deck cabins. These cabins have a porthole. |

AKADEMIK SHOKALSKIY

Please note that the In the Wake of Mawson expedition will be aboard the Akademik Shokalskiy. This is an identical sister ship to Spirit of Enderby with the same specifications, performance and like Spirit of Enderby has been tastefully redecorated. Cabin numbers and configurations are the same with a couple of small exceptions ... please ask reservation staff if requesting a specific cabin to ensure that it is what you want. Like Spirit of Enderby an experienced Russian Crew and an enthusiastic, experienced and knowledgeable team of lecturers and Zodiac drivers will be on board. This vessel is under Heritage Expeditions’ management so expect the same professional service and standard.
FLYING TO AND FROM RUSSIA

Travelling to and from the Russian Far East is not difficult or complicated, but you do need to plan in advance. Heritage Expeditions staff are in regular contact with a number of airlines that can provide safe and reliable connections to the main cities that the expeditions featured in this brochure depart from. Please ask your reservations agent for further information on our charter flight services to Anadyr.

This information is a guide to the options available for flights at the time of publishing.

ANADYR

From Europe: Nonstop direct flights available from Moscow.

From America: Heritage Expeditions has charter flights from/to Nome, Alaska for ‘Across the Top of the World’ and ‘Chukotka – Where Russia’s Day Begins’. Flights are also available to join ‘Jewel of the Russian Far East’ and at the end of ‘Siberia’s Forgotten Coast’. Seats are subject to availability at the time of reservation.

From Australasia: You can either travel via the USA to connect with our charter flights from Nome or transit through Khabarovsk or Moscow.

PETROPAVLOVSK-KAMCHATSKY

From Europe: Nonstop direct flights available from Moscow with Aeroflot or indirectly with Siberia Airlines (S7).

From America: Flights to Korea or China offer onward flight options to Vladivostok or Khabarovsk. Or you can fly from Anchorage directly to Petropavlovsk-Kamchatskiy with Yakutia Air (seasonal).

From Australasia: Flights to Korea or China offer onward flight options to Vladivostok or Khabarovsk.

YUZHNO-SAKHALINSK

From Europe: Nonstop direct flights available from Moscow with Aeroflot, or indirectly with Siberia Airlines (S7).

From America: Flights to Korea or China offer onward flight options to Vladivostok or Khabarovsk.

From Australasia: Flights to Korea or China offer onward flight options to Vladivostok or Khabarovsk. Or you can choose a nonstop direct flight from Seoul.
Day 1: Sakhalin Island, Port of Korsakov

This morning we board a coach for transfer to the Port of Korsakov some 40 minutes south of the city of Yuzhno-Sakhalinsk where we will board the Spirit of Enderby. Once on board you will be shown to your cabins and there will be a chance to unpack and explore the vessel. There will be briefings and introductions to the ship, staff and crew after we sail.

Day 2: Kunashir Island

Kunashir is the largest island in the Kuril chain. We plan a landing in the Kurilsky Reserve and will explore an extensive area of woodland, where there are some good walks and birding. Species we could encounter include Latham’s Snipe, Oriental Turtle-Dove, Oriental Cuckoo, Japanese Bush-Warbler, Eastern Crowned Warbler, Narcissus and Brown Flycatchers, Siberian Stonechat and Long-tailed Rosefinch.

Day 3: Iturup Island

This morning we land at the small settlement of Kurilsk from where local buses/trucks will take us into the volcanic highlands to thermal hot pools where you can enjoy a soak or go birding. Possible species include Kamchatka Leaf-warbler, Japanese Robin, Siberian Accentor, Pine Grosbeak and Japanese Bush-warbler.

Day 4: Urup and Chirpoy Islands

This morning we explore Urup Island; it is a chance to stretch your legs on an extended walk, beachcomb and look for Sea Otters or birds in the forest behind the beach. This afternoon depending on weather we will either Zodiac cruise or land on Chirpoy Island where there are some dramatic volcanic features.
where we should get great looks at Steller’s cruising on the scenic Zhupanova River. We will spend several hours in the Zodiacs.

**Day 9: Zhupanova River, Kamchatka**

Orcas and Steller Sea Lions. In this deep fiord on the Kamchatka Peninsula there are almost always bears. At the entrance to the fiord where we can Zodiac cruise there are also a major salmon fishery on the river which we can visit.

**Days 10 to 11: Commander Islands**

There are two main islands in the Commander group, Bering and Medny, and during our two days we will explore several sites combining the best of the natural and cultural history. There is an excellent chance of finding Rock Sandpiper, Mongolian Plover, Pechora Pipit and Grey-crowned Rosy-Finch, as well as the endemic subspecies of Arctic Fox. Zodiac cruising can be extremely rewarding here with several species of auklets as well as the Red-legged Kittiwake. The area is also extremely rich in marine mammals. Potential species include Sperm, Humpback, Northern Minke and Baird’s Beaked-Whales, as well as Orcas, Steller Sea Lions, Northern Fur Seals and Pacific Sea Otters. We include a visit to the small settlement of Nikol’skoye and the local museum.

**Day 12: Al Sea**

As we cruise across the Kamchatka Trench towards Petropavlovsk-Kamchatsky we will keep a look out for the cetaceans that this area is well known for. It is a good time to be on deck as the birding can be good, but we will also need to wrap the expedition, so there will be recaps and formalities to attend to. This evening there will be a farewell dinner.

**Day 13: Petropavlovsk-Kamchatsky**

During the night the Spirit of Enderby will enter Avacha Bay which is one of the greatest natural harbours in the world. There will be a complimentary transfer to the airport or to a central downtown hotel.

Enquire for a full itinerary and/or Bird and Mammal List.

**VOYAGE #1821 DETAILS**

**Prices:**

- Heritage Suite .................. $11,000 pp
- Mini Suite ....................... $10,200 pp
- Superior Plus ................... $ 9,800 pp
- Superior ......................... $ 9,200 pp
- Main Deck ....................... $ 8,500 pp
- Main Deck Triple .............. $ 7,300 pp

**Additional Charges:**

- Local Payment .................. $800 pp
- Kayaking Supplement ........... $ 1,025 pp

**Price Includes:**

- Pre/Post cruise transfers, all on board ship accommodation, meals and all expedition shore excursions, excluding optional kayaking programme.

**Price Excludes:**

- All items of a personal nature, laundry, drinks, gratuities, International/domestic flights, visas and travel insurance.
Day 1: Petropavlovsk-Kamchatskiy

Arrive into Petropavlovsk-Kamchatskiy, the capital and administrative centre of the Kamchatka Region and transfer to the port to board the Spirit of Enderby.

Day 2: Zhupanova River

We plan to spend the morning Zodiac cruising on the Zhupanova River. Our main target here is the Steller’s Sea Eagle and there are usually some occupied nests close to the river. Good numbers of Largha Seals are also often hauled out on sandbars in the river and we should see a good variety of waterfowl and waders. By late afternoon, we should be over deep water heading for the Commander Islands and new species to look for include Laysan Albatross, Mottled Petrel and the Fork-tailed Storm-Petrel. The Kamchatka Trench can also be excellent for cetaceans and we have previously seen Blue Whales on this crossing.

Days 3 to 4: Commander Islands

The wildlife-rich Commander Islands were first discovered by the Commander Vitus Bering when his ship was wrecked here in 1741. We intend to explore the islands through a combination of landings and Zodiac cruises and our first stop will be the village of Nikolskoye, where there is an interesting museum. Zodiac cruising is often spectacular and we hope to encounter Red-faced Cormorant, Red-legged Kittiwake, Pigeon Guillemot, Horned Puffin, as well as Parakeet, Crested and Whiskered Aukslets and Sea Otters. Our plans also include a ship cruise along the southern coast of Bering Island, as this area is excellent for cetaceans with Humpback, Sperm, Northern Minke, Orcas and Baird’s Beaked Whales all regularly encountered.

SIBERIA’S FORGOTTEN COAST

PETROPAVLOVSK-KAMCHATSKIY TO ANADYR (Combining the best of our ‘In Search of the Spoon-billed Sandpiper’ and ‘Wake of Bering’ Expeditions with new added opportunities).

Siberia’s eastern coastline is undoubtedly one of the most remote and least visited regions of the globe. It is home to several groups of indigenous people, including the Itelmen, Koryak, Even and Chukchi. Fur trappers and sealers plundered the regions natural resources in the name of the Tsar in the early 17th Century. Stalin and subsequent leaders encouraged economic development in this part of the Soviet Union. Soviet towns were built, bonuses were paid to those who would immigrate and work there and attempts were made to collectivise the traditional way of life.

As the iron curtain was drawn and the Cold War escalated, this region became forbidden territory. Travel to and within the area was strictly controlled, the number of military installations increased, early radar warning stations proliferated and Russia’s Pacific fleet patrolled the coastline.

This all changed in the early 1990s with Perestroika and the collapse of the Soviet Union. Military installations were abandoned, there were mass migrations of workers back west and towns and industries were simply abandoned. As the heavily subsided economy collapsed the indigenous people were forced back to traditional ways of life but permits to travel through the area did become a little easier to obtain.

Twenty five years on, travel through this region is still heavily regulated and virtually impossible for the independent traveller. There is little or no infrastructure, only a few kilometres of road, no hotels apart from in the main towns of Petropavlovsk-Kamchatskiy and Anadyr. These towns have scheduled air services, but access to the rest of the region either by air or sea even for locals is at best “unpredictable”.

Throughout its chequered human history its rich natural history has largely gone unnoticed and unknown by the rest of the world. It is an amazing coastline dominated by the volcanoes of Kamchatka in the south, the fjords of what was formally the Koryak region and the rich estuarine areas and tundra of Chukotka.

This coastline has one of the most diverse assemblages of wildlife and habitats of anywhere of a similar latitude on the globe and virtually no people or visitors to disturb them. One of the most iconic species is the critically endangered Spoon-billed Sandpiper that is endemic to the region. For the past 7 years we have supported BirdLife International and Birds Russia research teams working on this species. Our 2018 expedition not only continues that support but it expands it to include other seabirds and waders as researchers monitor potential changes in their populations and distribution due to a variety of reasons including climate change.

Day 1: Petropavlovsk-Kamchatskiy

Day 2: Zhupanova River

Day 3 to 4: Commander Islands

PETROPAVLOVSK-KAMCHATSKIY TO ANADYR (Combining the best of our ‘In Search of the Spoon-billed Sandpiper’ and ‘Wake of Bering’ Expeditions with new added opportunities).

Steller’s Sea Eagle © M Kelly
Day 5: Karaginskiy Island
Our proposed landing site is a patchwork of boggymundra, ponds and shingle spits where an interesting range of waders can be found including Pacific Golden Plover, Red-necked Stint and Red-necked Phalarope. We also hope to see Blue-throat and Pallid Reed Bunting.

Day 6: Verkhohuturova Island and Govena Peninsula
Verkhohuturova Island has some huge seabird colonies and by following a short trail to the cliff top you should be able to enjoy some fantastic views of Tufted Puffins, Brunnich’s Guillemots, Pelagic Cormorants and Black-legged Kittiwakes. Both Steller’s Eider and Harlequin Duck occur here too and we may also see some Steller Sea Lions, as they are often hauled out on some offshore rocks. Later in the day, there will be either a Zodiac cruise or landing on the Govena Peninsula. Good numbers of brown bears can often be found here.

Days 7 to 10: Koryak and Chukotka Coast
During these days of the expedition we will travel along this largely unknown part of the coast. It comprises deep forested fiords where we should see brown bears, Red Fox and with luck, mountain sheep and Kamchatka Marmots. In the many lagoons and shallow bays there is a vast array of birdlife including Tundra Bean Goose, Steller’s Eider, Great Knot, Long-tailed Stint, Gyrfalcon, Siberian Accentor and Asian Rosy Finch. This area is also a stronghold of Kittlitz’s Murrelet and we should see several during our journey. In our previous expeditions we have explored much of this coastline documenting the distribution and abundance of many species. In 2011 we recorded a previously unknown breeding population of Spoon-billed Sandpiper. Working alongside researchers from BirdLife International and Birds Russia who will be travelling with us, we plan to revisit many of these areas to monitor changes and search for new breeding colonies. There will be unique opportunities for photography, for hiking and ‘birding’ in country where literally only a few ‘westerners’ have ever been and we know there is a rich diversity of species.

Day 11 to 12: Meinypil’gyno
Meinypil’gyno, located on a 40km long shingle spit is the most important site in the world for breeding Spoon-billed Sandpiper. Here about fifteen pairs are monitored by members of the Spoon-billed Sandpiper Recovery Taskforce. We will be guests of the Taskforce and if possible we may be guided to one of their monitored nests. The area is extremely rich in other wildlife, so we may also find Emperor Goose, Pacific Diver, White-billed Diver and Sandhill Crane. The lagoon entrance often has Largha Seal, Gray and Beluga Whales and a spectacular number of gulls.

Day 13: Cape Navarin and Keynygypil’gyn Lagoon
This coastline is rich in marine mammals and one creature we will be looking for in particular, is the walrus, as there is a known haul out. The animals do regularly move between locations, so finding them is always very much a matter of luck, although we have had success here in the past. Good numbers of Gray Whales often congregate here too. To the north of Cape Navarin is Keynygypil’gyn Lagoon. On previous visits we have found this an excellent location for waderfowl and waders including Emperor Geese, Greater White-fronted Geese, Brent Geese, Whooper Swan, King Eiders, Red Knots and Aleutian Terns.

Day 14: Port of Anadyr
As we cruise into Anadyr Bay, there is an excellent chance of seeing more Beluga Whales and after a final breakfast on board the Spirit of Enderby, it will be time to disembark. We will provide complimentary transfers to a downtown hotel and the airport. It will be time to say goodbye, it has been a wonderful journey! We hope to see you on our next voyage.

Enquire for a full itinerary.

© C Collins; © M Kelly; Kamchatka Brown Bears © C Collins; Walrus and Zodiac © K Ovsyanikova
The Chukotka region is one of 85 regions which make up the Russian Federation, officially known as the Chukotka Autonomous District, it was the last part of Siberia to be ‘conquered’ or ‘subdued’ by the Cossack invaders from the west. The indigenous people of this region include Chukchi, Inuit, Even, Koryak, Chuvan and Yukaghir, the non-native inhabitants are predominantly Russian. The Soviet regime initially treated these indigenous people well, but the collapse of the Communist regime in the early 1990s spelt disaster for the people as they had become dependent upon the state. The election of Roman Abramovich as Governor of Chukotka in December 2000 changed the course of its history. His vision, generosity and leadership gave the people hope, and today Chukotka is taking its rightful place in the Russian Federation. It is rich in natural resources and wildlife is abundant, but like all Arctic fauna, it is under pressure because of significant climate change.

North of Chukotka where the Chukchi Sea meets the Arctic Ocean lies the nature reserve and World Heritage site, Wrangel Island, which has outstanding wildlife values. Sometimes referred to as a Polar Bear Maternity Ward, because of the high density of denning Polar Bears, it is one of those islands that never disappointments those who are keen on natural history or enthusiasts of Arctic history. As the ice retreats each summer (further and faster than ever before) Polar Bears come ashore and we see good numbers of these, likewise walrus find refuge here each summer normally in large numbers. Birds like Snow Geese and Snowy Owls also breed here. And of course Wrangel Island is central to the story of the wreck of the Karluk and it features in other Arctic exploration stories.

On this special Chukotka expedition we will meet the people; see and listen to their stories and learn of their love for and strong connection with the land and the sea. We will celebrate with them at their annual Regatta and Festival. We will explore the vast expansive tundra with its wild flowers and dwarf tree species and we will watch for brown bears, reindeer, Arctic Foxes, ground squirrels, if we are lucky we may also see a Wolverine. We will explore Wrangel Island with its Polar Bears, walrus and rich Arctic history and at sea we will keep a look out for whales.
We Zodiac cruise spectacular bird cliffs which could provide great photographic opportunities. We also plan time exploring the rich tundra landscape for birds and plants.

Day 5: Whale Bone Alley and Gil’mimyl Hot Springs
The significant and intriguing archaeological site of ‘Whale Bone Alley’ on Yttygran Island dates to the 14th century, its origins and purpose have been the cause of much debate. Whalebones stretch along the beach in the form of a pathway for nearly half a kilometre. Gray Whales are frequently seen in the vicinity and there may be a chance to go whale-watching by Zodiac. This afternoon we plan a landing at nearby Gil’mimyl Hot Springs.

Day 6: Cape Dezhnev
Sea conditions permitting, we plan to land at Cape Dezhnev early this morning; this is the north-eastern most point of the Eurasian continent. The name commemorates the accomplishment of the Cossack, Semyon Dezhnev, who was the first European to sail through this strait in 1648 (80 years before Bering did). Nearby is the former Inuit village of Naukan, the inhabitants were relocated to nearby villages by the Soviet administration in 1958 but photographs and stories make the site come alive.

Day 7: At Sea
Relax as we navigate northwards towards Wrangel Island. Ice conditions will determine our speed and course and will ultimately dictate whether we will actually be able to reach the island.

Days 8 to 10: Wrangel Island
As we approach the island we will spend time searching the ice for Polar Bears, Ringed Seals and Walrus. Should there be opportunities to land we will explore the tundra to look for species which breed here. We have allowed three days on and around the island to take advantage of whatever conditions we encounter and will be utilising the local knowledge of the Park Rangers to make multiple landings and ice cruising.

Day 11: At Sea
We sail south towards Kolyuchin Island. The day is filled with illustrated lectures, opportunities to spend time on deck, relaxing in the ship’s bar and catching up with some reading or downloading and editing photos.

Day 12: Kolyuchin Island / Kolyuchin Inlet
This morning we plan a landing and/or Zodiac cruise at Kolyuchin Island. When the ice recedes large numbers of walrus sometimes haul out on the island. At the western end of the island is the remains of a Polar Research Station and nearby are some amazing bird cliffs, where it is possible to get magnificent views (and photographs) of puffins and guillemots. This afternoon we will cruise to nearby Kolyuchin Inlet, a massive tidal estuary and ideal habitat for many bird species, it is early enough in the season for the majority of them to either be on nests or have young. It is an easy landing with lots of opportunity for ‘birding’.

Day 13: Nova Chaplino and the Annual Beringia Regatta and Festival
We plan to be here for opening day of the annual Beringia Regatta and Festival which includes Baidara (traditional walrus skin covered boats) races as well as cultural group performances and games. It is one of the most colourful festivals in the Chukotka calendar and attracts people from many villages. There will be a range of activities at the Regatta and Festival and local foods for you to sample and souvenirs to purchase. This is a festival that gets to the very heart and soul of the people, their culture and their land.

Day 14: At Sea
As we make our way back to Anadyr we will recap the many experiences we have enjoyed on this special Chukotka expedition.

Day 15: Anadyr
After breakfast passengers will be taken ashore, a complimentary transfer to the airport or to a central downtown hotel will conclude the expedition. Enquire for a full itinerary.
For those departing Nome, Alaska your adventure begins with a flight across the Bering Sea and International Date Line to the remote port of Anadyr.

All expedition members will arrive in Anadyr; depending on your time of arrival you may have the opportunity to explore Anadyr, before getting to know your fellow voyagers and expedition team on board the Spirit of Enderby. We will depart when everybody is on board.

At sea today, there will be briefings and lectures. It is also a chance for some ‘birding’ cetacean watching and settling into ship life. Late this afternoon we plan to Zodiac cruise some spectacular bird cliffs in Preobrazhenskiy Bay.

Yttygran, Nuneangan and Arakamchechen Islands

Yttygran Island is home to the monumental ancient aboriginal site known as Whale Bone Alley, Whalebones stretch along the beach for nearly half a kilometre. Gray Whales are frequently seen around the island, we will also cruise by Nuneangan and Arakamchechen Islands where seabirds nest and walrus can be found.

This unique expedition crosses the Arctic Circle and includes the isolated and pristine Wrangel and Herald Islands and a significant section of the wild North Eastern Siberian coastline. It is a journey only made possible in recent years by the thawing in the politics of the region and the retreat of summer pack ice in the Chukchi Sea. The very small distance between Russia and the USA along this border area was known as the Ice Curtain, behind which then and now lies one of the last great undiscovered wilderness areas in the world.

The voyage journeys through the narrow Bering Strait, which separates Russia from the United States of America, and then travels west along the Chukotka coastline before crossing the De Long Strait to Wrangel Island. There we will spend four to five days under the guidance of local rangers on the nature reserve. Untouched by glaciers during the last ice age, this island is a treasure trove of Arctic biodiversity and is perhaps best known for the multitude of Polar Bears that breed here. We hope to catch many glimpses of this beautiful animal. The island also boasts the world’s largest population of Pacific Walrus and lies near major feeding grounds for the Gray Whales that migrate thousands of kilometres north from their breeding grounds in Baja, Mexico. Reindeer, Musk Ox and Snow Geese can normally be seen further inland. A visit to massive bird cliffs on nearby Herald Island is also planned. The ‘mammoth steppe’ vegetation complex, a rich and diverse relic from the Pleistocene epoch nurtures over 400 plant species and never fails to astound visitors with its sublime beauty. The number and type of endemic plant species, the diversity within plant communities, the presence of relatively recent mammoth tusks and skulls, a range of terrain types and geological formations in the small geographical space are all visible evidence of Wrangel’s rich natural history and its unique evolutionary status within the Arctic.

The human history of Wrangel Island is fascinating on its own. Highlights include a 3,400 year old Paleo-Eskimo camp in Krassin Bay, controversy over discovery and ownership of the island, the amazing story of the survivors of the Karluk, Ada Blackjack the heroine of the island, the Soviet occupation and militarisation and more recently, the establishment of this world class nature reserve. A host of similarly enthralling stories hail from several optional landings along the northern coasts of Chukotka. Our expert expedition team will take you on guided walks, Zodiac cruises and provide lectures to help you better understand and appreciate this unique High Arctic landscape.
Day 4: Cape Dezhnev and Uelen Village
Sea conditions permitting, we will land at Cape Dezhnev early this morning. The northeastmost point of the Eurasian continent, it is sometimes possible to see the coast of America from this remote and lonely outpost. A few nautical miles to the west of Cape Dezhnev we visit Uelen Village the most northeastern village in Russia. The population is predominantly Chukchi and the village is one of the largest centres for traditional Chukchi and Inuit art in the world. We’ll be entertained by villagers and visit the bone-carving workshop during our visit.

Day 5: Kolyuchin Island
This small island was once an important Russian Polar Research Station and one of a number dotted across the Arctic. Near the derelict buildings are some of the most spectacular bird cliffs in the Arctic where puffins, guillemots and gulls can be observed and photographed up close.

Days 6 to 10: Wrangel and Herald Islands
Ice and weather conditions permitting, we will spend the next few days on Wrangel Island and we will also attempt to include a visit to nearby Herald Island. There are many landings that we can make to search out wildlife, wild flowers and Arctic landscapes. Polar Bears will be high on our list of animals to see and with a little patience we should be rewarded with a number of encounters. Musk Oxen and reindeer were introduced to the island in 1975 and 1948 though reindeer numbers are low. We also have a chance to visit Dragi Harbour where the survivors of the Karluk which was crushed by ice in 1914 scrambled ashore and lived until they were rescued. Wrangel Island is a Russian Federal Nature Reserve of international significance and importance particularly as it is a major Polar Bear denning area. Also each summer thousands of birds migrate here to breed, including Snow Geese, Snowy Owls, skuas, Arctic Terns, Ross’s, Sabine and Ivory Gulls.

Day 11: North Siberian Coast
Bounded by narrow sand ridges with numerous lagoons and inlets, this area offers plenty of places to land and explore this extensive coastline. We will be on the lookout for whales, walrus and other wildlife. We will see Chukchi villages whose residents survive in an unforgiving climate, hunting seals and whales just as their ancestors did.

Day 12: Kolyuchin Inlet
So huge that it is visible from satellite photos, this inlet contains vast numbers of waterfowl and migratory waders. We concentrate our visit on the Belaka Spit near the mouth of the inlet. It is a wild, desolate landscape that is strangely beautiful. We search the dunes and tidal areas for birdlife including Emperor Geese and Spoon-billed Sandpipers. Gray Whales frequent the area and are sometimes spotted feeding only metres offshore.

Day 13: Bering Strait and Chukotka Coast
Early morning we will pass the Diomede Islands, sometimes called Tomorrow Island and Yesterday Isle because they straddle the International Date Line. Here Russia and America are separated by only 2.3 nautical miles of ocean. We will remain in Russian territory as we cruise south past the islands. Later this afternoon we make an expedition landing on the Chukotka coast, our last chance to enjoy the wildlife and tundra landscape.

Day 14: At Sea
Relax as we sail across Anadyrskiy Bay towards Anadyr.

Day 15: Anadyr
After breakfast it will be time to say our farewells. There will be a complimentary transfer to the airport or to a central downtown hotel.

Enquire for a full itinerary.
Day 0: Nome
For those departing Nome, Alaska your adventure begins with a flight across the Bering Sea and International Date Line, to the remote port of Anadyr.

Day 1: Anadyr
All expedition members will arrive in Anadyr, the administrative centre of the Chukotka region, and transfer to the Spirit of Enderby.

Day 2: Egvekinot
We spend the day in and around the town of Egvekinot on the shores of Kresta Bay. The town was built by Gulag prisoners who were then forced to construct a road to the mine. We explore the town which has an excellent museum, the road and tundra as well as visit the Arctic Circle.

Day 3: Bukhta Gavrilla
This coastline is rich in marine mammals and one creature we will be looking for, in particular, is the walrus. The bukhta (or bay) was named after Commander Vitus Bering’s ship, the St Gabriel, of the First Kamchatka Expedition. Behind the expansive beach there is a lagoon we can explore for waterfowl and waders.

Day 4: Pika River and Meinypil’gyno
We start the day with a visit to the delta of Pika River – a well known walrus haul out. Later in the day, we visit Meinypil’gyno, a small settlement located on a 40km long shingle spit. It is a traditional village although renovated under the recent Chukotka government; we enjoy local hospitality from the village ensemble who perform some of their traditional dances for us.

The eastern seaboard of Russia dominates the North Pacific and yet very few people know anything about it, let alone have experienced it. This isolation has protected one of its most valuable assets – its wilderness and to some degree, its wildlife.

The area was considered an important ‘frontier zone’ during the Cold War, so it was off-limits to foreigners. Even Russians had to get special permission to travel here. These limitations were changed in 1991/92 with Perestroika but that didn’t make it more accessible. If anything it is probably less accessible now than it was, as there are fewer people living in the region and the state-subsidised transport system has collapsed. There is no money to replace the ageing fleets of aircraft and ships and few people can afford the prices that are charged to travel in this region today. This makes it the perfect destination for Expedition Cruising.

In the winter much of the shoreline is choked by ice. During spring and summer the region is a hive of activity. In September the thousands of birds that migrated here to take advantage of the phenomenal abundance of food will be preparing to leave. The reindeer and mountain sheep will be feeding in preparation for the harsh winter, while fat Kamchatka Brown Bears, which have fed extensively on berries in the early summer, then feasted on salmon in the rivers and creeks, will be dozing in the late summer sunshine. Late summer and early autumn is a beautiful time to discover this wilderness. The onset of autumn paints vibrant colours on the tundra cloaked hill sides making the landscape a picture perfect postcard.

On this journey from Anadyr to Petropavlovsk-Kamchatskiy we will make numerous landings along these remote coastlines so that you can discover for yourself this untamed and beautiful landscape. We will select sites that few people visit such as river mouths, fiords, bays and islands that in our experience offer the natural history enthusiast, the photographer, the historian and travellers the most unique of opportunities. Come with us and discover the jewel that is the Russian Far East.
Day 5: Bukhta Natalii
Along the Koryak Coast there are many beautiful fiords (bukhtas or bays) and none are more beautiful than Bukhta Natalii. This fiord has two smaller fiords that drain into it from the south. We hike from one bay to another whilst surrounded by the magnificent mountain landscapes and tundra vegetation.

Day 6: Tintikun Lagoon
Much of the southern Govena Peninsula was recently made into a state reserve. There are a number of fiords included in the reserve; one of the most spectacular is Tintikun Lagoon which is one of the most picturesque locations found anywhere in the world. A large population of brown bears inhabits this area, if we are fortunate we should see a number of them.

Day 7: Koryaksky Reserve and Verhoturova Island
We will start the morning in Kamchatka Brown Bear country, an undisturbed habitat within the Koryaksky Reserve, where we will go bear watching. Brown bears frequently visit this area which is completely protected and rarely visited. In the afternoon we visit Verhoturova Island where Tufted and Horned Puffins, Pigeon, Common and Brunnich’s Guillemots and also Parakeet and Least Auklets can be seen. On nearby rocky islets there is a regular non-breeding haul out of Steller Sea Lions.

Day 8: Karaginskiy Island
A few miles to the south of Verhoturova Island is the much larger Karaginskiy Island. Here we encounter some of the first “forests” of the voyage. This is a change from the tundra that we have seen, a sure sign that we are getting further south. Autumn is the best time for the wild berries and we can marvel at the richness of the local flora, as many of them should be at their best.

Days 9 to 10: Commander Islands
The wildlife-rich Commander Islands were first discovered by Commander Vitus Bering when his ship was wrecked here in 1741. He perished on the island along with many of his men. The reports from those that survived led to a “fur rush” and the settlement of the islands. There are two large islands (Bering and Medny) with two smaller islands Ary Kamren and Toporkov. We intend to explore the islands through a combination of landings and Zodiac cruises. We plan to stop at the village of Nikolskoye. We visit the fur seal rookery at North-West Cape and Zodiac cruise around the impressive bird colony at Ary Kamren. We will also possibly visit the gravesite of Commander Vitus Bering or the remarkable Medny Island.

Day 11: Olga Bay
Olga Bay is a part of the very large Kronotskiy Reserve, which also includes the world-famous Valley of the Geysers. The habitat has lush Kamchatka forests coming right down to the beach. The area around Olga Bay is frequented by large numbers of Gray Whales that are usually quite friendly to visiting boats. The rising volcanoes in the background will provide a beautiful setting to explore real Kamchatka wilderness.

Day 12: Zhupanova River and Bukhta Bechevinskaya
This morning we make our way along the Zhupanova River by Zodiac. This journey allows us to explore a river habitat which is common in Kamchatka. Steller’s Sea Eagles are known to nest in the lower reaches of the river.

Day 13: Petropavlovsk-Kamchatskiy
During the night the Spirit of Enderby will enter Avacha Bay which is one of the greatest natural harbours in the world. There will be a complimentary transfer to the airport or to a central downtown hotel.

VOYAGE #1833 DETAILS
Prices:
Heritage Suite ...................... $10,300 pp
Mini Suite ....................... $  9,500 pp
Superior Plus ................. $  9,000 pp
Superior ......................... $  8,300 pp
Main Deck ..................... $  7,800 pp
Main Deck Triple ........... $  7,200 pp

Additional Charges:
Private charter flight
Nome to Anadyr ................ $  1,000 pp
Local Payment ................. $     500 pp

Price Includes:
Pre/Post cruise transfers, all on board ship accommodation, meals and all expedition shore excursions.

Price Excludes:
All items of a personal nature, laundry, drinks, gratuities, International/domestic flights, visas and travel insurance.
EXCLUSIVE WRANGEL ISLAND EXTENSIONS

OVERLAND TRAVERSES

In co-operation with the Wrangel Island Nature Reserve we are excited to offer a limited number of seats on a very special Overland Traverse through the heart of this incredible landscape. For curious explorers who join us to circumnavigate Wrangel Island, there is no reason to just wonder what lies beyond the coast, over the crest of the hills and mountains. The High Arctic environment that very few people will ever experience is now accessible and exclusively available to passengers travelling with Heritage Expeditions on all ‘Across the Top of the World’ expeditions.

We are offering a limited number of seats on six very special 3-day (2-night) Overland Traverses. Transport is by a six wheel Russian built Tundra vehicle brought to the island in 2010. Each traverse is led by rangers from Wrangel Island. We have been offering these traverses since 2011 and those who have been lucky enough to participate literally ‘raved’ over their experiences. Numbers are strictly limited; we encourage you to book early to avoid disappointment.

Day 1: Doubtful Harbour
On arrival the Overlanders will go ashore, spend the afternoon and evening exploring the area including the nearby spit known for large haul outs of walrus. Visit Devil’s Creek, the only archaeological site on the island where remains of a Paleo-Eskimos summer camp were discovered recently. The overnight accommodation will be Wrangel Ranger huts at Somritelnya.

Day 2: Somnitelnya
Travel north firstly over the southern tundra slopes climbing gradually to a mountain pass through the Somritelnya Mountains. A steep descent takes us to a tributary of the Mammoth River, the longest river on the island. In the evening we will enjoy a walk on the tundra slopes with possible sightings of Snowy Owls, Lemmings, Arctic Foxes and a huge variety of High Arctic plants. Stay overnight at the Peak Tundra hut, a field hut for studies of the Snow Geese nesting nearby.

Day 3: Academic Tundra
Continue down the Tundra River to the Academic Tundra, an extensive area that makes up over half the island. There are opportunities to see amazing fields of wild flowers, Musk Ox, and potentially reindeer, although numbers have been greatly reduced by recent harsh winters. We will return to the ship at midday near the Drum Head Mountains (also known as Dream Head Mountains) on the north coast of the island.

Enquire for a full itinerary.

Northbound and Southbound options available. Southbound itinerary will operate in reverse to the above itinerary.

OVERLAND TRAVERSES DETAILS

Price: ... $1,450 (All prices are per person in USD)
Price Includes: Transport, accommodation (basic field huts) and meals. Please note this is in addition to the cost of the cruise.
Price Excludes: Travel insurance, gratuities and other items of a personal nature.
Note: This Wrangel Island extension is an optional activity and conducted in conjunction with our voyage but independently operated by the Park Rangers. It is subject to minimum numbers, reserve regulations, weather and ice conditions. Participants should be aware that there is no discount or compensation for missed landings that the main expedition makes possibly including Herald Island while they are participating in the extension.

HIGH ARCTIC EXPEDITION

Our ‘Across the Top of the World’ expeditions have opened up new opportunities for travellers which were previously only available to a few select Russian scientists.

Participants on our Wrangel Island ‘High Arctic Expedition’ will travel north to the island on our second “Across the Top of the World” expedition on 6th August and remain there until the ship returns on our third ‘Across the Top of the World’

Staff will accompany you from the reserve along with an interpreter/cook from Heritage Expeditions. You will be expected to help with camp chores but the long daylight hours will mean endless opportunities for exploring and photography. There is no fixed itinerary but among the places you will explore are the Mammoth River, the Goose River, Komsomol, Drum Head (also known as Dream Head), Peak Tundra, the Unknown River, Red Flag, Cape Waring and the Clark River.

Enjoy unbelievable wildlife and wilderness photographic opportunities in a High Arctic environment that have previously only been available to researchers on special assignments. We cannot guarantee the weather, but we do guarantee an experience in the High Arctic that has never been available before. You will rejoin our vessel when it returns to Wrangel Island and travel back to Anadyr where your adventure will end.

For more details on this expedition – please contact our office. It is restricted to just five participants and these will be allocated on a first come first serve basis.

HIGH ARCTIC DETAILS

Dates: 6th August to 3rd September 2018
Prices:

Berth Price ......................... $18,500 pp
(based on Main Deck cabin)
Land Portion .................................. $6,500 pp

Additional Charges:
Local Payment ......................... $500 pp
(All prices are per person in USD)

Price Includes: Return transport to and from Anadyr from Wrangel Island and participation in the itinerary plus meals, transport, accommodation (basic field huts) and guiding on Wrangel Island.

Price Excludes: International and/or domestic flights, travel insurance, gratuities and other items of a personal nature.

Note: These Wrangel Island extensions are optional activities and conducted in conjunction with our voyage but independently operated by the Park Rangers. They are subject to minimum numbers, reserve regulations, weather and ice conditions. Participants should be aware that there is no discount or compensation for missed opportunities.
Like Heritage Expeditions, Forest & Bird was founded by inspirational people determined to save and protect New Zealand’s incredible environment.

From rolling up their sleeves and planting trees, to restoring stream banks, campaigning for greater predator control, going to court to protect freshwater and native forests - Forest & Bird defends nature at every level. With more than 80,000 supporters, the charity is at the forefront of conservation in New Zealand and one of the country’s most loved environmental organisations.

Heritage Expeditions have been supporting Forest & Bird for over five years by running special fundraising expeditions where a proportion of every passenger’s fare is donated to fund the charity’s work. Gifts like this have funded legal action to defend native habitats and vulnerable species, created campaigns to change public and government attitudes to the environment and provided practical support to volunteer conservationists throughout New Zealand.

This year, funds raised by Heritage Expeditions could help to protect the incredible wildlife you will witness on your trip. Some of the rarest birds in the world - the albatross and yellow-eyed penguin - and the New Zealand Sea Lion that has the highest threat status of nationally critical, could stand a better chance of survival if Forest & Bird has the funds to call for greater protection.

To find out how you can personally help protect some of nature’s greatest treasures visit www.forestandbird.org.nz

In 2010 Heritage Expeditions became a BirdLife Species Champion and remains committed to helping BirdLife International’s work in protecting the world’s most threatened species and in particular the Spoon-billed Sandpiper.

Of the world’s 10,000 different bird species, one in eight is now threatened with extinction. The Spoon-billed Sandpiper is among 189 that are considered “Critically Endangered” and are teetering right on the brink of existence.

If you are more than 30 years of age, at least 21 species of birds have become extinct during your lifetime and as the rate of loss is now escalating, without help many more are set to join them over the next decade. Heritage Expeditions has made the commitment to give financial and practical support to the Spoon-billed Sandpiper recovery project and we invite you to join with us today to help stop this species becoming extinct.

Because the Spoon-billed Sandpiper is a migratory species, breeding in the Russian Far East and wintering in South-East Asia, its conservation plan involves many partners. Species Guardians are local organisations or individuals that BirdLife International recognises as having the best knowledge, experience and capability to make a positive change for a particular threatened species in their region.

If you or your company would like to become a BirdLife Species Champion (Spoon-billed Sandpiper is just one of the many species requiring support) we urge you to contact species.champions@birdlife.org for more information.

The Spoon-billed Sandpiper has two official Species Guardians - one in Myanmar and the other in Thailand. There is also a group working in the village of Meinypil’gyno in the Russian Far East which is near to where the bird breeds.

Heritage Expeditions’ role as a Species Champion is different to that of a Species Guardian. We are committed to a significant annual financial donation and have made our vessel Spirit of Enderby available to transport equipment, support staff and even the birds themselves.

In 2011, we transported Spoon-billed Sandpiper eggs and chicks from Meinypil’gyno to Anadyr as part of the Conservation Breeding Program being under taken by the Wildfowl and Wetlands Trust in Slimbridge, England in association with BirdLife International. These birds are now thriving and it is hoped that more will join them to ensure an ongoing captive breeding population is well established as insurance against their demise in the wild. Ultimately it is hoped that their progeny will be returned to bolster numbers in the regions they originated.

Like Heritage Expeditions, Forest & Bird was founded by inspirational people determined to save and protect New Zealand’s incredible environment.
Day 1: Madang, Papua New Guinea
Arrive in the port town of Madang and transfer to the Madang Resort for the first night. This evening meet with your fellow travellers and the expedition team over dinner at the resort.

Day 2: Madang
Madang is a thriving community renowned for its traditional artists, world class diving opportunities and the richness of its surrounding forests. This morning we leave Madang for the highlands close to the township; here the tall forests contain a richly diverse wildlife. We arrive back in Madang with time to explore the colourful markets with your Guides. Optional excursions this morning for bird enthusiasts. Late morning board the Spirit of Enderby, settle into your cabin and join the captain and your expedition team on the bridge as we set sail.

Day 3: Sepik River
Sure to be one of the highlights of our expedition. The Sepik River is the longest river in Papua New Guinea, it is a rich arterial that has fostered great traditional artists. We plan to explore the river by Zodiac following tributaries and channels in search of local wildlife. We also meet with the villagers and marvel at their artistry.

Days 4 to 5: Manus Province
Seldom visited and little known, Manus Island is considered a jewel in the crown of Papua New Guinea. Biologically isolated, the islands are home to a high proportion of endemic species including the Superb Pitta which is...
Kayaking with cultural interaction

Clockwise: Victoria Crowned Pigeon © A Russ; Sepik River village visit © A Russ; Kavieng with cultural interaction © A Bakker

likely to be one of the birding highlights of the expedition. The waters around Manus offer some of the most spectacular and rich reefs in the region, seldom explored waters promising a myriad of opportunities.

Day 6: Mussa Island
Mussa Island represents one of the western-most extensions of the Lapita culture. Spend time with the local people to learn about their special culture and life on this remote outpost in the Pacific.

Day 7: Kavieng, New Ireland
Historic Kavieng has significant evidence from the large Japanese occupation. Birders will leave early for the highlands while the rest of the group will spend the morning exploring the town of Kavieng and its history. Later snorkel in the clear waters of the local reefs.

Day 8: Rabaul, New Britain
Six beautifully cone-shaped volcanoes ring Rabaul’s dramatic flooded-caldera harbour. Visit the bubbling hot springs and take in magnificent views of the harbour and volcanoes from Observatory Ridge.

Day 9: Nissan Island
A tropical atoll bathed in rich tropical currents Nissan Island’s waters abound in marine life. Seldom has anybody had the opportunity to discover this world which promises abundant pelagic fish life and pristine coral reefs. Ashore there are still reminders of the brief but intensive World War II activities on this island, meet with the friendly locals and search the dense woods for some of the elusive birds that occur here.

Day 10: Bougainville Island
We plan to be amongst the first expeditioners to re-discover the treasures of Bougainville, long isolated and in a strange way protected by the conflict which swirled around its shores. A pristine island paradise it is home to some of the greatest biodiversity in the region both above and below the waters. We plan to explore the area around Arawa which offers great opportunities to access the island’s interior and reefs.

Day 11: Choiseul Island
Today we arrive in the Solomon Islands on the remote northern coast of Choiseul Island. This was once the home of the Choiseul Crested Pigeon and while it no longer walks the forest floor many other species still enliven the forest. We Zodiac cruise deep into the mangrove forest towards the Sul River Falls searching for Dugong and crocodiles.

Day 12: New Georgia Islands
The volcanic New Georgia Islands are found in the Western Province of the Solomon Islands. Birding enthusiasts will relish landing on Kolombangara Island, where we hope to see the rare Raviana Rail along with other endemic bird species.

Day 13: Santa Isabel Island
The Amaron Islands are north-west of Santa Isabel, an area rich in marine biodiversity and one of the most important rookeries in the western Pacific for the endangered Hawksbill Turtle. The islands also support a high diversity of terrestrial fauna, with 41 species of birds, six species of bats, and at least seven species of terrestrial reptiles. Sensational snorkelling can be experienced around the islands.

Day 14: Honiara, Solomon Islands
Honiara was founded as a military base during World War II and was witness to the Naval Battle of Guadalcanal. Tour Honiara, visiting historical sites including Henderson Airfield, war memorials and the open-air war museum while the birders head to the rain-forested slopes of Mount Austen in search of some of the Solomon Islands’ most spectacular birds including the Solomon Sea Eagle.

For those disembarking a transfer to either a central city hotel or to the airport will conclude your voyage OR join us to discover the Secrets of Melanesia.

Enquire for a full itinerary.

ON THIS VOYAGE WE CAN OFFER A UNIQUE KAYAKING EXPERIENCE.

There is no better way to fit in with the locals, often paddling in their own dugouts, and to experience the stunning coral reefs. These self propelled craft allow you to enjoy exploratory excursions through a tropical paradise, interact with the locals and discover at a different pace, sometimes beyond the reach of our Zodiacs.

VOYAGE #1856 DETAILS

Prices:
Heritage Suite ......................... $11,500 pp
Mini Suite .............................. $10,700 pp
Superior Plus ......................... $ 9,700 pp
Superior ................................. $ 8,995 pp
Main Deck ......................... $ 7,995 pp
Main Deck Triple ..................... $ 6,995 pp

Additional Charges:
Discovery Fund ......................... $ 600 pp
Birding Supplement ................... $ 500 pp
Kayaking Supplement ................ $ 995 pp
(All prices are per person in USD)

Price Includes:
Pre/Post cruise transfers, one night hotel accommodation in a twin share room (incl. dinner/breakfast), all on board ship accommodation with meals and all shore excursions and activities excluding optional specialised birding and kayaking programmes. Programme of lectures by noted naturalists.

Price Excludes:
All items of a personal nature, laundry, drinks, gratuities. International/domestic flights, visas, extensions and travel insurance.
Day 1: Honiara, Solomon Islands
Arrive in the port town of Honiara and transfer to the Solomon Kitano Mendana Hotel for the first night. This evening meet with your fellow travellers over dinner at the resort.

Day 2: Honiara, Solomon Islands
This morning enjoy a tour of Honiara, visiting historical sites including the iconic Japanese and American war memorials. Birdwatchers will head to Mt Austen in search of some of the Solomon Islands’ most spectacular birds including the Solomon Sea Eagle. Board the Spirit of Enderby this afternoon.

Day 3: San Jorge Island and Santa Isabel
One of the largest in the Solomon Islands, most of Isabel remains unexplored and undiscovered. We explore the remote southern shores around Thousand Ships Harbour. Beautiful uninhabited islands dot the waters and verdant forest covers slopes which surround the harbour as we are treated to a rapturous welcome on tiny Ngongosila Island where the houses stand shoulder to shoulder. In this one small area several tribal groups overlap and these differences are readily apparent in dance and language. This afternoon the beautiful uninhabited Leli Island is the ideal snorkel site.

Day 4: Malaita
Mountainous Malaita has pristine rivers and unexploited tropical forests, we enter the seldom visited Kwai Harbour, here the local people choose to live on small artificial islands off the coastline, we are treated to a rapturous welcome on tiny Ngongosila Island where the houses stand shoulder to shoulder. In this one small area several tribal groups overlap and these differences are readily apparent in dance and language. This afternoon the beautiful uninhabited Leli Island is the ideal snorkel site.

Sail into a world that few have ever experienced; idyllic islands and isolated villages where unique time-honoured traditions and elaborately costumed dancers welcome us into their world. Sail from Honiara, the capital of the Solomon Islands, to discover the beauty of the outer Solomon Islands. Relax as our ship glides into secluded bays, and takes us to remote oceanic islands where the art of traditional navigation lives today. On Santa Isabel the rhythms of life continue little changed, with daily life centered on the village and family. Malaita is culturally rich, the traditional currency, Malaitan shell-money, is still made on the island and is used as a dowry, and worn as a status symbol.

Vanuatu has produced a kaleidoscope of cultures and more than 100 indigenous languages. With over 80 habitable islands, islanders have closely guarded their own cultures and languages. Our expedition embraces some of these cultures and languages and offers a window into the happiest country in the world.

Our journey offers some of the greatest underwater experiences in the world, with an abundance of marine life and coral gardens that draws you in to explore a magical underwater world. During frequent snorkel excursions throughout the expedition everybody will have the opportunity to appreciate the beauty beneath the waves.

For birders this itinerary offers once in a lifetime species on remote islands where few have been before, endemic birdlife such as the Solomon Sea Eagle or the Vanikoro White-eye may be seen. The birding potential is exceptional and to allow birders to maximise the opportunities on the expedition there will be an optional specialised birding programme with customised excursions.

A picture postcard paradise awaits us as we uncover the Secrets of Melanesia.
Monarch or marvel at the delicate Vanikoro walk in search of the endemic White-eye and Durville in 1827. Join the naturalists on a forest Perouse, erected by fellow explorer Dumont 1788. On the shore we visit a monument to Le Boussole and Astrolabe, struck the reef in was wrecked here after both his vessels, La Béranger and Boussole. The Duff Islands are a cluster of 11 small islands on the edge of the vast Pacific Ocean. We plan to head ashore at Ranon on the northern coast where the traditional Rom dance is still practised and custom carving reverberate through the ages.

Day 5: Makira
Makira is the most easterly of the main islands in the Solomon’s archipelago. This morning we anchor in the calm waters of Star Harbour. Join the naturalists for a Zodiac exploration of the abundant mangrove forests that line the shores and take a short walk to Makira’s south coast where the villagers live much as they have for millennia. We spend time with the locals, who share with us their traditional song and dance. If we are lucky the local boys might be surfing on their hand carved palm wood boards.

Day 6: Nendó – Temotu Province
Nendó is the largest of the Santa Cruz Islands. The Spanish navigator Álvaro de Mendía de Neira unsuccessfully tried to establish a colony there in 1595. This is the home of red feather money, sourced from the Scarlet Honeyeater. Venturing inland we visit a village where the ancient traditions are still very much alive. Watch the manufacture of red feather money and join the locals in dances which reverberate through the ages.

Day 7: Duff Islands
The Duff Islands are a cluster of 11 small islands on the edge of the vast Pacific Ocean. We navigate the Zodiaks through the shallow passages in the reef to visit the only inhabited island, Taumako. Here we are welcomed by the Polynesian speaking locals who live on hand crafted artificial islands of coral stone within the lagoon. These islands are exceptionally remote and the people largely cut off from the outside world; learn about their continued use of traditional sailing canoes.

Day 8: Vanikolo
Today we explore the archipelago of Vanikolo, with its five islands encapsulated by a dramatic barrier reef which offers superb snorkelling. French explorer Jean-François de La Pérouse was wrecked here after both his vessels, La Boussole and Astrolabe, struck the reef in 1788. On the shore we visit a monument to Le Pérose, erected by fellow explorer Dumont D’Urville in 1827. Join the naturalists on a forest walk in search of the endemic White-eye and Monarch or marvel at the delicate Vanikoro Orchid. We also have a good chance to see the recently rediscovered Vanikoro Flying Fox.

Day 9: Vanua Lava
This morning we arrive in Vanuatu at the northern outpost of Vanua Lava, the largest island in the Banks Islands which is crowned by the volcanically active Mt. Yasur. Visit the administrative centre of Sola or for a more active option, climb through the waterfalls behind the town for some excellent views over the bay. This afternoon we explore the nearby offshore islands for snorkelling and beach combing. The surrounding waters are home to the recently discovered Vanuatu Petrel.

Day 10: Espiritu Santo
Enjoy a full day on Vanuatu’s largest island, Santo: location of James Michener’s Tales of the South Pacific. Early morning sees the birders ashore in search of many of Vanuatu’s endemic birds. Take the opportunity to swim in the beautiful waters of Champagne Beach. This afternoon we use the Zodiaks to visit the iconic blue holes of Santo. For those with an interest in the history of this island there is a visit to Lugainville and Million Dollar Point.

Day 11: Ambrym
The Spirit of Enderby will make an inaugural visit to Ambrym, renowned as the island of volcanoes and magic throughout Vanuatu. We plan to head ashore at Ranan on the northern coast where the traditional Rom dance is still practised and custom carving is alive and well. A short walk through the forest brings us to the “arena” where masked dancers emerge from the forest. The forests of Ambrym offer some excellent walks to go in search of the local birds and plants, accompanied by our naturalists. This afternoon enjoy a final snorkel excursion.

Day 12: Port Vila, Vanuatu
Arrive into Port Vila early morning and disembark. Upon disembarking a transfer to your central hotel or the airport will conclude your voyage. Upon disembarking a transfer to your central hotel or the airport will conclude your voyage.

VOYAGE #1858 DETAILS

Prices:
Heritage Suite ................ $ 9,495 pp
Mini Suite .................... $ 8,750 pp
Superior Plus ............... $ 8,100 pp
Superior ..................... $ 7,495 pp
Main Deck .................. $ 6,495 pp
Main Deck Triple .......... $ 5,495 pp

Addtional Charges:
Discovery Fund
(Payable on board) ........ $ 600 pp
Birding Supplement ........ $ 450 pp
Kayaking Supplement ....... $ 915 pp

(All prices are per person in USD)

Price Includes:
Pre/Post cruise transfers, one night hotel accommodation in a twin share room (incl. dinner/breakfast), all on board ship accommodation with meals and all shore excursions and activities excluding optional specialised birding and kayaking programmes. Programme of lectures by noted naturalists.

Price Excludes:
All items of a personal nature, laundry, drinks, gratuities, International/domestic flights, visas, extensions and travel insurance.

Enquire for a full itinerary.
Few people would know where these subtropical islands are. That is one of their many attractions, visitors are rare. They lie 1000km north-east of New Zealand about half way to Tonga and well off the main shipping routes.

Possibly as early as the 10th century, but certainly by the 14th century, Polynesians knew about these islands and had settled them, as well as using them as a staging post for voyages to New Zealand. However when Europeans discovered them in 1788 they had been abandoned and were uninhabited.

There are four islands within the Kermadec group and all are the summits of huge undersea volcanoes situated along the western edge of the Kermadec Trench, part of the Pacific Ring of Fire. They have a unique assemblage of subtropical and temperate plant, bird and marine species, testimony to the process of evolution arising from climate and isolation.

Raoul Island was settled by the Bell family in 1878 and they finally left in 1914. Other settlers came and went, but permanent settlement was discouraged after 1939. The New Zealand government has maintained a weather station on the island since 1938. The introduced plants and animals left behind by the settlers have had a significant impact on the island’s ecosystem, but now an ambitious conservation program is attempting to restore Raoul Island to its original splendor. The goats, cats and rats have been removed and many introduced plants controlled. Bird numbers and diversity are increasing and endemic plants are recovering, a testimony to what can be achieved with a vision and hard work.

An extensive Marine Reserve protects the unique marine ecosystem that surrounds these islands. With virtually no disturbance (certainly no fishing and only a handful of divers each year) the diving and snorkelling can only be described as amazing and unique. As with the terrestrial species there is both subtropical and temperate species to be encountered.

This is not an annual expedition. It is off the beaten track, even for us, but it is so rare to have the opportunity to explore such unique marine and terrestrial ecosystems that we are constantly drawn back. We hope you will join us on what will be our 6th Kermadec Island expedition.
**Day 3: L’Esperance Rock and Curtis/ Cheeseman Islands**

Today we continue our journey northwards, arriving in the afternoon at the southernmost island in the group: L’Esperance Rock. Later we visit Curtis and nearby Cheeseman Island. If the weather and sea conditions are suitable we will cruise by Zodiac (no landings are permitted).

All of these islands are havens for breeding seabirds and we are likely to encounter impressive numbers as we cruise offshore. In addition to the more common species, we will be on the lookout for White-bellied Storm-Petrel and the Kermadec White-faced Storm-Petrel. We are also likely to encounter some tropical seabirds that occur nowhere else in New Zealand, such as Masked Booby, Red-tailed Tropicbird, and Black Noddy.

**Days 4 to 7: Raoul Island**

We have four days scheduled for activities at Raoul Island, including options for snorkelling and hikes ashore. The weather and sea conditions will dictate our activities to a certain extent. The seas surrounding the Kermadecs are the only true example of subtropical waters in New Zealand, and are sufficiently distant from the mainland to have escaped heavy commercial fishing. The extensive Marine Reserve ensures added protection and guarantees some of the best diving in the South Pacific. We hope to offer opportunities to snorkel if weather allows.

During our time at Raoul Island we will also cruise the Meyer Islets by Zodiac to witness the seabirds returning to the Islets in the evenings. Many of these birds are endemic, including the Kermadec Petrel, the White Napped Petrel, and the Kermadec race of the Little Shearwater. On shore we can get great views of the endemic Kermadec Red-crowned Parakeet and it is also one of the easiest places to see Spotless Crakes. We should also get good views of Black Noddy, Grey Ternlet, White Tern and the beautiful Red-tailed Tropicbird.

The following are some of the walks that we maybe able to do on Raoul Island depending on weather and time.

- Boat Cove to the Department of Conservation Base
- Green Lake Walk
- Water Supply Walk
- Denham Bay Hut
- Mahoe Hut

**Day 8: Macauley Island**

We arrive at Macauley Island early in the morning. The original forest cover was destroyed by goats and since their removal in the 1970s the vegetation is recovering. Landings are not permitted on this island so we will Zodiac cruise if sea conditions are suitable.

**Days 9 to 10: At Sea**

These days present an opportunity to catch your breath after our activities at Raoul and Macauley Islands. Our staff will be offering lectures and further presentations on the islands and some of the conservation issues surrounding them.

**Day 11: Tauranga**

Our vessel will berth in Tauranga this morning. Enjoy breakfast on board and a last minute opportunity to bid farewell to your expedition team then you disembark and board our complimentary coach transfer to the central city or local airport.

Enquire for a full itinerary.
Day 1: Tauranga, New Zealand

Arrive in Tauranga and transfer to the ship. Settle into your cabin and join your expedition team and captain for a welcome on board.

Day 2: Hauraki Gulf

Our seabirding will start in the Hauraki Gulf where we will look for the critically endangered New Zealand Storm-Petrel as well as Little Penguin, Grey Ternlet, Buller’s, Fluttering and Little Shearwaters and Grey-faced and Black Petrels.

Days 3 to 4: At Sea

En route to Norfolk Island, we have a good chance of finding Gould’s, Black-winged, Kermadec, White-necked and Grey-faced Petrels, plus Wedge-tailed and Short-tailed Shearwaters.

Day 5: Norfolk Island

After clearing Australian Customs, we plan to visit Norfolk Island’s remnant forest, home to four endemics – the Norfolk Island Parakeet, Norfolk Gerygone, Norfolk Robin and Slender-billed White-eye.

Day 6: At Sea

At sea on a northward course, we cross a large underwater seamount, a productive area for seabirds including Tahiti, Collared, White-necked, Providence and Kermadec Petrels.

Day 7: New Caledonia

We visit the Parc de la Rivière Bleue National Park where we will search for the endemics including the incomparable Kagu and highly range-restricted Crow Honeyeater. Other birds could include New Caledonian Goshawk, Horned and New Caledonian Parakeets, New Caledonian Imperial Pigeon, Southern

Known in birding circles as the ‘WPO’, this expedition incorporates many key birding areas in the West Pacific. First offered in 2007, it is now considered one of the ‘must do’ expeditions for any birder because of opportunities to see some of the rarest pelagic seabirds in the world plus many island endemics. But it is not only for ‘birders’, as the cetacean list is outstanding and if you ever tire of birding or cetacean watching then there are numerous snorkelling/swimming_RELAXING opportunities.

After departing Tauranga, we sail for the Hauraki Gulf where there are numerous endemic species, including the recently discovered New Zealand Storm-Petrel. From there it’s northward to Norfolk Island and then New Caledonia where we search for the amazing Kagu and other endemics at the Rivière Bleue National Park.

We then spend five exciting days in the Solomon Islands birding on Rennell, Makira, Guadalcanal, Santa Isabel and Kolombangara, before cruising across the New Britain Trench, an area known to be extremely rich in cetaceans. As we sail along the coasts of Bougainville and New Ireland, we will look for two extremely poorly known seabirds, Heinroth’s Shearwater and the recently rediscovered Beck’s Petrel.

Next stop is Truk Island (Micronesia) for some more intensive birding before we set a course for the Bonin Islands south of Japan. Our route will take us to Chichi-jima, Haha-jima and Torishima Islands before we visit Miyake-jima, where we will look for the last specialties of the expedition. Our voyage will then conclude at Yokohama in Japan.

This expedition is accompanied by some of the best pelagic birding guides in the world who have extensive experience of the seabirds of the West Pacific and have visited the islands we will be landing on multiple times before. Birding starts at dawn and finishes at sundown. Our guides are there throughout the day to assist you and the ‘reading of the bird list’ each evening is legendary for its detail and discussion.

A message for the keen birders and cetacean watchers reading this. Space doesn’t allow us to list all species on a day-by-day basis in this itinerary. Please ask for an expedition dossier or a bird and mammal list from previous expeditions.
Day 14: Santa Isabel Region, Barara Fa Island, Poror Channel
Enjoy a day on Santa Isabel and its surrounding islands as we explore the inlets and reef systems of the spectacular Poror Channel. We plan to land on Yakuao Island and visit its verdant rainforest where we hope to find the highly localised Yellow-throated White-eye and Red-capped Myzomela plus Ultramarine Kingfisher. After lunch, snorkel and relax on a white sandy beach or return to the forest to look for Melanesian Megapode and Black-and-white Monarch.

Day 15: Kolombangara Island
We intend to head into the hills to visit the Imbu Rano Conservation Area to explore dense upland forest. We hope to see the spectacular Solomon Islands Sea Eagle, Cardinal, Duchess and Meek’s Lorikeets, White-capped Monarch, Crimson-rumped Myzomela, Ducorps’ Cockatoo and Metallic and Singing Starlings. We may also look for the elusive Roviana Rail as we leave the reserve. After we depart we will be scanning the seas for whales and dolphins as this is a good area for cetaceans. Birders will also want to keep a lookout for Heinroth’s Shearwater which can be found here too.

Day 16: At Sea
Today we are at sea off Bougainville and hope to see Heinroth’s Shearwater. These waters are also great for cetaceans including Sperm Whale, False Killer Whale and Fraser’s Dolphin.

Day 17: Off the coast of New Ireland
Today we cruise along the coast of New Ireland, where our target is the recently rediscovered Beck’s Petrel with another chance for Heinroth’s Shearwater. This is another area where a number of different species of cetaceans have been seen previously including Melon-headed Whale, Dwarf and Pygmy Sperm Whales and Orca.

Day 18 to 19: At Sea
We will cross the Equator and the species we will be on the lookout for include Bulwer’s Petrel, Tropical Shearwater, White-tailed Tropicbird and Sooty Tern.

Days 20 to 21: Caroline Islands
On Weno Island we hope to find Caroline Islands White-eye, Micronesian Myzomela, Micronesian Starling, Oceanic Flycatcher, Caroline Reed Warbler, Caroline Ground-Dove, Caroline Islands Swiftlet and Purple-capped Fruit-Dove. There may also be an optional excursion to Tal South to look for Faichuuk White-eye and Chuuk Monarch.

Days 22 to 25: At Sea
The birding can be quiet but as we head northwards new species could include Matsuaida’s Storm-Petrel, Bonin Petrel as well as Bannerman’s and Christmas Shearwaters. As we approach the Bonin Islands, we stand a good chance of finding Humpback Whales which can occur here in reasonable numbers.

Day 26: Chichi-jima
After clearing into Japan at Chichi-jima, we will explore the settlement looking for Micronesian White-eye, Brown-eared Bulbul and Japanese Bush Warbler.

Day 27: Haha-jima and Higashi Shima
We plan to spend the morning on Haha-jima, the only place in the world where the stunning Bonin Honeyeater can be found. In the late afternoon, we will look for the recently described and very rare Bryan’s Shearwater off the east coast of Chichi-jima.

Day 28: At Sea
Seabird possibilities include Tristram’s Storm-Petrel, Bonin Petrel and Bannerman’s Shearwater.

Day 29: Torishima Island
Landings are not permitted but we cruise offshore and hope to find Short-tailed Albatross. Other species could include Black-footed and Laysan Albatrosses, Streaked Shearwater, Tristram’s and Matsuaida’s Storm-Petrels.

Day 30: Miyake-jima Island
We plan to land on Miyake-jima and visit the Tsubota Nature Centre where the forest trails provide an opportunity to see endemics such as Izu Thrush, Jima’s Leaf-warbler and Owston’s Tit. In the afternoon, we plan to cruise close to an islet where Japanese Murrelet’s breed before continuing north to Yokohama.

Day 31: Yokohama, Japan
Disembark the ship and transfer to Yokohama railway station.

Enquire for a full itinerary.
Day 1: Invercargill
Meet this evening for an informal get-together at the hotel for dinner, meet fellow adventurers on your voyage and some of our expedition team.

Day 2: Port of Bluff
Enjoy a visit to the Southland Museum to view the special Subantarctic display before transferring to the Port of Bluff where we board the Spirit of Enderby.

Day 3: The Snares – North East Island
Cruise by Zodiac if weather and sea conditions are suitable along the sheltered eastern side of North East Island. We should see the endemic Snares Crested Penguin, Snares Island Tomtit and Fernbirds. Also we should see Cape Pigeons, Antarctic Terns, White-fronted Terns and Red-billed Gulls. There are hundreds of thousands of Sooty Shearwaters nesting here. Buller’s Albatross breed here from late December onwards.

Day 4: Auckland Islands – Enderby Island
Enderby Island is a great place to view birds and wildlife. We visit Sandy Bay, the main breeding ground for the rare New Zealand (Hooker’s) Sea Lion and just one of three breeding grounds on the Auckland Islands. There are chances to observe the Southern Royal Albatross, Northern Giant Petrel, Auckland Island Shag, Auckland Island Flightless Teal, Auckland Island Tomtit, Bellbird, Pipit, Red-crowned Parakeet, Yellow-eyed Penguin and Light-mantled Sooty Albatross. We will also keep a lookout for the rare Subantarctic Snipe. On Derry Castle Reef there is a good chance of seeing the Bar-tailed Godwit, Turnstone and perhaps other migratory waders.

Listen to the names: Snares, Bounty, Antipodes, Auckland, Campbell, Macquarie and Chatham Islands. They are music to the ears of ‘Birders’. Apart from the Chathams, these islands are probably more isolated now than they were when they were discovered in the late 1700s and early 1800s and were regularly visited by sealers, whalers and government steamers searching for castaway sailors. It is relatively simple to get to the Chatham Islands but opportunities to visit the others are rare. This expedition, one of a number operated each year by Heritage Expeditions, is the only one to include all of these islands.

The islands occupy the tempestuous latitudes of the Roaring Forties and the Furious Fifties but they are also known as the Albatross Latitudes and with good reason. Ten of the world’s albatross species breed in the region; five of them nowhere else but here! In fact this zone where the air is never still, hosts the most diverse collection of seabirds in the world. More than 40 species breed down here – that is at least 11 percent of the entire world’s seabird population.

With the exception of the Chathams, the islands are all designated UNESCO World Heritage sites and are afforded the highest conservation status and protection by the Australian and New Zealand governments, so passage to their shores is not granted lightly. There are also islands that we visit within the Chatham Archipelago with similar status and protection.

This expedition has huge appeal to pelagic enthusiasts, penguin fanatics and those interested in island endemics. You don’t have to be a keen birder though to enjoy this voyage. People interested in islands and island ecology, botany, geology and an increasing number of photographers have enjoyed this trip immensely, as have those interested in the history of southern ocean discovery and exploration.

This is one of our ‘signature expeditions’ which has operated annually for over 20 years, so you will benefit from the knowledge and expertise gained over that time.

BIRDING DOWN UNDER
SUBANTARCTIC ISLANDS OF NEW ZEALAND AND AUSTRALIA PLUS THE CHATHAM ISLANDS

Cape Petrels and Zodiac © R Robinson

28 | WWW.HERITAGE-EXPEDITIONS.COM
Day 5: Auckland Islands – Camley Harbour
These islands have witnessed many a shipwreck in days gone by and harbour tales of castaways and coastwatchers. If weather and sea conditions are suitable energetic expeditioners are able to climb to the South West Cape Shy Albatross colony where Gibson’s Wandering Albatross nest amongst the tussocks above the colony.

Day 6: At Sea
We can expect some of the best pelagic birding on this leg of the journey from the Auckland Islands to Macquarie Island with great views of species such as the Royal Albatrosses, Wandering Albatrosses, Shy Albatross, Black-browed Albatross, White-chinned Petrel, diving-petrel, Little Shearwaters, storm-petrel and to confuse everybody, numerous prion species.

Days 7 to 8: Macquarie Island
The only place in the world where the beautiful Royal Penguin breeds, this remote outpost supports a breath-taking concentration of wildlife. You will never forget your first experience of a noisy ‘penguin city’ where you will be witness to a thousand ‘penguin concentration’. You will never forget your first experience of a noisy ‘penguin city’ where you will be witness to a thousand ‘penguin concentration’. You will never forget your first experience of a noisy ‘penguin city’ where you will be witness to a thousand ‘penguin concentration’. You will never forget your first experience of a noisy ‘penguin city’ where you will be witness to a thousand ‘penguin concentration’. You will never forget your first experience of a noisy ‘penguin city’ where you will be witness to a thousand ‘penguin concentration'.

Day 9: At Sea
We will be keeping a keen lookout for cetaceans, albatross and petrels today, relax in the library.

Day 10: Campbell Island – Perseverance Harbour
We drop anchor in Perseverance Harbour. Once on shore we walk to the nesting site of the Southern Royal Albatross or to Northwest Bay, passing beautiful megaherbs growing on the hills. During the day ashore we should see the Campbell Island Shag, Southern Skua, Antarctic Tern, Dunock, New Zealand Pippet, Campbell Island Teal and hopefully the elusive Campbell Island Snipe.

Day 11: At Sea
Join us on the bridge, where we keep a keen lookout for species commonly seen in this area: Black-browed Albatross, Campbell Island Albatross, Light-mantled Sooty Albatross, Salvin’s Albatross, Sooty Shearwater and Little Shearwater. There should be plenty of petrels and again the hard to identify prion species.

Day 12: Antipodes Islands
One of the most isolated, least known and rugged of the Subantarctic Islands; landings are not permitted here, so we cruise along the coast looking for the endemic Antipodes Island and Reischek’s Parakeet. We may also see the Antipodes subspecies of the New Zealand Pippet, and with half the world’s population of Erect-crested Penguins here, we should encounter one or two as well as Antarctic Terns and Kelp Gulls.

Day 13: Bounty Islands
These inhospitable granite islets are home to thousands of Salvin’s Albatross, Erect-crested Penguins, Fulmar Prions and the endemic Bounty Island Shag, the world’s rarest. At sea we should spot Wandering Albatross species, Northern Royal Albatross, Mottled Petrel, Soft-plumaged Petrel, Broad-billed Prion, White-chinned Petrel and Black-bellied Storm-Petrels as well as Wilson’s Storm-Petrel.

Day 14: At Sea and Pyramid Rock
We continue north towards the Chatham Islands, with similar species accompanying us as yesterday. Towards evening as we approach the islands we are closer to the Subantarctic and sub tropical convergence and we see a subtle change in the species composition. Late this afternoon we arrive at the spectacular Pyramid Rock, the only breeding place of the Chatham Island Albatross.

Day 15: Chatham Islands – Waitangi
This morning we go ashore on the main island where we might see the endemic Chatham Island Shag and along the coast the Chatham Island Oystercatcher. We visit a private bush reserve on the south coast to see the Chatham Island Wabler, Chatham Island Pigeon and Tui. This afternoon we have another look for the Magenta and Chatham Island Petrels.

Day 16: South East Island and Mangere Islands
Arrive early morning at South East Island one of the world’s greatest nature reserves here we plan to Zodiac cruise to see the endangered Shore Plover. We will also keep our eyes peeled for the Pitt Island Shag. Before we depart the archipelago we visit the Mangere Islands from where the endemic Black Robin was rescued.

Days 17 to 18: At Sea
En route to Dunedin we will cross the Chatham Rise, here nutrient-rich waters allow for an overlap between northern pelagic species and birds from southern latitudes. We can expect to see Royal Albatross, Wandering Albatross, Westland Black Petrel, Cook’s Petrel and much more.

Day 19: Dunedin
Our adventure ends at this historic Otago Harbour. Early this morning we arrive in port and after a final breakfast we say our farewells before disembarking and transferring by complimentary coach to either a central city point or to the airport.

Enquire for a full Itinerary.

Price Includes:
- Accommodation with meals and all on board ship expedition shore excursions.
- Pre/Post cruise transfers, one night hotel accommodation in a twin share room (incl. dinner/breakfast), all on board ship accommodation and meals and all expedition shore excursions.
- All items of a personal nature, laundry, drinks, gratuities, international/domestic flights, visas and travel insurance.

Price Excludes:
- (All prices are per person in USD)
- (incl. dinner/breakfast), all on board ship accommodation and meals and all expedition shore excursions.
- All items of a personal nature, laundry, drinks, gratuities, international/domestic flights, visas and travel insurance.

WWW.HERITAGE-EXPEDITIONS.COM | 29
This is without doubt one of the most inspirational and informative journeys or expeditions into the Southern Ocean ecosystem that one can make anywhere in the world. Long recognised for their rich biodiversity, the Subantarctic Islands lying to the south of New Zealand are UNESCO World Heritage sites. This places them in a select group of only 180 natural sites that have been designated as ‘the most important and significant natural habitats’ on the planet. They are also afforded the highest conservation status and protection by the Australian and New Zealand governments and access to these islands is by permit only. On this expedition we offer you the unique chance to explore, photograph and understand these wonderful places in the company of some of the most knowledgeable and passionate guides.

As a young biologist, Heritage Expeditions founder Rodney Russ first visited these islands in 1972 with the New Zealand Wildlife Service. He organised New Zealand’s first commercial expedition there in 1989, and many years and over 100 expeditions later, he is still as passionate about the islands as he was in 1972. It was only natural that his family should travel with him in the business and be as passionate about the conservation of this region as he is. As the original concessionaire we enjoy good relationships with the conservation departments and some of the access permits we hold are unique to these expeditions.

The name we have given to this voyage ‘Galapagos of the Southern Ocean’ reflects the astounding natural biodiversity and the importance of these islands as a wildlife refuge. (The book ‘Galapagos of the Antarctic’ written by Rodney Russ and Aleks Terauds and published by Heritage Expeditions describes all of these islands in great detail.) The islands all lie in the cool temperate zone with a unique climate and are home to a vast array of wildlife including albatross, penguins, petrels, prions, shearwaters and marine mammals like sea lions, fur seals and elephant seals. The flora is equally fascinating; the majority of it being like the birds and endemic to these islands.

This expedition includes four of the Subantarctic Islands, The Snares, Auckland, Macquarie and Campbell. Each one is different and each one is unique, just like this expedition.
Day 5: Auckland Islands – Carnley Harbour
These islands have witnessed many a shipwreck in days gone by. Loaded in human history, they harbour tales of castaways, bullion and coastwatchers through to today’s scientific visitors. Today we land in Carnley Harbour and if weather and sea conditions permit visit the Shy Molympaw colony at South West Cape or if weather is not suitable we will select one of a number of other sites available to us.

Day 6: At Sea
As we make our way through an area known as the Furious Fifties in the tumultuous Southern Ocean, we will learn more about the flora and fauna as we prepare for our arrival at Macquarie Island. En route there are great birding opportunities which may include the Wandering Albatross, Royal Albatross, Black-browed Albatross, Light-mantled Sooty Albatross, Salvin’s Albatross, Grey-headed Albatross, Northern and Southern Giant Petrel, Sooty Shearwater and Little Shearwater. We will endeavour to spot the Fairy Prion, Fulmar Prion and Antarctic Prion – never an easy task – but we should get some great views. Other species to be on the lookout for include the Soft-plumaged Petrel, Mottled Petrel, White-headed Petrel, Grey-faced Petrel, White-chinned Petrel, Grey-backed Storm-Petrel, Wilson’s Storm-Petrel and the Black-bellied Storm-Petrel.

Days 7 to 8: Macquarie Island
Described by one Australian explorer as “One of the wonder spots of the world” this is the only place in the world where the beautiful Royal Penguin breeds. Three other species of penguins; the King, Gentoo and Rockhopper also breed here. You will never forget your first experience of a noisy ‘penguin city’, where the dapper inhabitants show no fear of their strange visitors and where you will be immersed in a tumult of chattering, feeding chicks; territorial disputes; petty pilfering and courtship displays. This all happens amongst the hundreds of Southern Elephant Seals lolling on the beaches and dunes. On arrival we meet with scientists and Park Rangers based here who will accompany us on all our landings.

Day 9: At Sea
We head north from Macquarie Island through waters rich in seabirds towards Campbell Island. We invite you to join the captain on the bridge, to keep a keen lookout for birds and for whales. Today there will also be briefings and lectures on Campbell Island in preparation for our visit there.

Days 10 to 11: Campbell Island – Perseverance Harbour
We spend two days exploring the island by foot taking in the panorama of rocky islets and sea stacks; once the lonely preserve of settlers and seal hunters and now returned to nature. Enjoy an easy walk to the nesting site of the Southern Royal Albatross at Col Lyall or walk across the hills to Northwest Bay and see the strange and beautiful megaherbs growing on the hills. These huge pink and yellow wild flowers have adapted well to the harsh conditions. We also seek out other wildlife such as Campbell Island Shags, Light-mantled Sooty Albatross and, on the beaches beyond, young male sea lions testing their strength.

Day 12: At Sea
At sea en route to the Port of Bluff, take the opportunity to relax and reflect on an amazing experience. We will recap the highlights of our expedition and enjoy a farewell dinner tonight as we complete the last few miles of our journey.

Day 13: Invercargill
We arrive at the Port of Bluff early in the morning. After breakfast, customs formalities and a last minute opportunity to bid farewell to your expedition team, you disembark and board our complimentary coach transfer to downtown Invercargill or Invercargill Airport. Enquire for a full itinerary.

Clockwise: Entering the Rata forest, Enderby Island © J Kirk-Anderson; Royal and King Penguins © S Blanc; Hooker’s Sea Lion © G Riehle; Campbell Albatross © E Bell

VOYAGE #1862 & #1866 DETAILS

Prices:
- Heritage Suite ....................... $10,400 pp
- Mini Suite ............................. $ 9,750 pp
- Superior Plus ......................... $ 9,250 pp
- Superior ............................... $ 8,700 pp
- Main Deck ............................. $ 8,300 pp
- Main Deck Triple ..................... $ 7,000 pp

Additional Charges:
- Landing Fees .......................... $ 800 pp

Price Includes:
- Pre/Post cruise transfers, one night hotel accommodation in a twin share room (incl. dinner/breakfast), all on board ship accommodation, meals and all expedition shore excursions.

Price Excludes:
- All items of a personal nature, laundry, drinks, gratuities, international/domestic flights, visas and travel insurance.
Day 1: Invercargill
Meet at an Invercargill central city hotel and be transferred to the Port of Bluff for embarkation. The captain and expedition team will be waiting to greet you on arrival at the ship. Explore the Spirit of Enderby and join the captain on the bridge or fellow travellers on deck as we set sail.

Day 2: At Sea
As we make our way through the Southern Ocean we can expect some of the best pelagic birding on this leg of the journey with great views during the crossing which may include Wandering Albatross, Royal Albatross, Light-mantled Sooty Albatross, Campbell Island Albatross and Little Shearwater.

Day 3: Campbell Island
We have one day to explore Campbell Island, New Zealand’s southernmost Subantarctic territory. We will offer a number of options which will enable you to explore the island including an extended walk to Northwest Bay. There will also be an easier walk to the Col Lyall Saddle. All of these options will allow you the opportunity and time to enjoy the Southern Royal Albatross which nest here in large numbers. We also visit areas of the island which contain outstanding examples of the megaherbs for which the island is renowned. Birds we may see include Teal, Snipe, Rockhopper Penguins and Antarctic Tern.

Day 4: Auckland Islands – Carnley Harbour
This very large sheltered harbor is rich in human history, we plan to arrive mid-morning entering the harbour through the eastern entrance which is guarded on both sides by dramatic cliffs and rugged tussock covered hills. Our activities here today are totally weather dependent. If the weather is fine there will be

BEYOND FIORDLAND: NEW ZEALAND’S WILDEST ISLANDS
EXPLORING THE SUBANTARCTIC ISLANDS OF NEW ZEALAND, STEWART ISLAND AND FIORDLAND

Heritage Expeditions pioneered expedition cruising in 1985 by cruising the rugged and unique southern coastline of New Zealand’s South Island, including Fiordland and Stewart Island. From those first days exploring the wilderness from their tiny yacht base with just five travellers aboard, the Russ family realised their dream that responsible tourism, enacted in a genuine and responsible way in conjunction with local government, had the ability to assist in the protection of vulnerable areas. From there, Heritage Expeditions grew to escorting 50 conservation minded passengers per expedition to the world’s most special regions but our passion for New Zealand’s wilderness never diminished.

Now, after a 15 year absence from mainland New Zealand, we are excited to return, in full circle, to where Heritage Expeditions’ legacy began and this time the expedition will also include New Zealand’s Subantarctic Islands, which has been a popular and essential part of Heritage Expeditions’ programme for many years.

As we head back to explore the remote ice-carved mountains, verdant forests and winding fiords of Fiordland, it will be easy to see why this incredible region inspired our dream for responsible travel. We will travel the calm waters of Fiordland in solitude, away from the crowds, on the lookout for marine life, elusive birds and stunning vistas. Established in 1952, Fiordland National Park is now over 1.2 million hectares in size, and encompasses mountain, lake, fiord and rainforest environments. We plan to explore some of the most unique and wild parts of Fiordland as we sail though the beautiful fiords and landscapes.

We will also explore Stewart Island’s Ulva Island, free of introduced pests and home to a range of birdlife. Stewart Island, New Zealand’s 3rd largest island is rich in history and wildlife, we will take the time to enjoy Ulva Island/Te Wharawhara, to listen to the native bird song and take a closer look at the history of Paterson Inlet.

These islands and region represent a priceless ecosystem and showcases the work that the New Zealand Government’s Department of Conversation has and is undertaking to protect, preserve and re-introduce New Zealand’s amazing wildlife, this is a once in a lifetime expedition to explore remote parts of New Zealand’s Southern region, an area known for its range of birdlife and jaw dropping scenery on a grand scale and where we hope to see a large number of New Zealand’s Threatened Species.
an opportunity to climb to the South West Cape and visit the Shy Mollymawk colony. Above the colony we occasionally see Gibson’s Wandering Albatross breeding. Alternatively there will be an opportunity to Zodiac cruise along the coast of Adams Island, Western Harbour and Victoria Passage. We may visit Camp Cove, the Tagua Bay coastwatcher’s station and lookout, or Epigwatt where the remains of the ‘Grafton’ which was wrecked here in 1864 can be seen.

Day 5: Auckland Islands – Enderby Island
Enderby Island is one of the most beautiful islands in this group, this northernmost island in the archipelago is an outstanding wildlife and birding location and is relatively easy to land on and walk around. Our plan is to land at Sandy Bay, one of these breeding areas in the Auckland Islands, for the Hooker’s or New Zealand Sea Lion. During our day ashore there will be several walking options, and time to spend just sitting and enjoying the wildlife. Birds that we are likely to encounter include Southern Royal Albatross, Northern Giant Petrel, Auckland Island Shag, Auckland Island Flightless Teal, Auckland Island Tomtit, Bellbird, Red-crowned Parakeet, Yellow-eyed Penguin and Light-mantled Sooty Albatross.

Day 6: The Snares – North East Island
The closest Subantarctic Islands to New Zealand, comprising of two main islands and a group of five islands called the Western Chain; they are uninhabited and enjoy the highest protection as Nature Reserves. Zodiac cruising along the sheltered eastern side of the main island we should see the endemic Snares Crested Penguin, Snares Island Tomtit and Fernbirds.

Day 7: Stewart Island – Paterson Inlet/Ulva Island
New Zealand’s third island is a wonderfully tranquil place; the scenery of untouched bushland is stunning. We will explore Ulva Island which is rich in history and wildlife, being a predator-free island from 1997 the bird song and wildlife is some of the best. In Paterson Inlet you will have time at Boulder Bay and West End Beach, or just enjoy some time around Post Office Bay and Sydney Cove. Wildlife you may get to see while walking the tracks include Stewart Island Robin, Stewart Island Weka, South Island Kaka, Kereru (wood pigeon), Mohua (yellowhead), Red Crowned Parakeet, Fantail, Belbird and Tui. There are many more species that may also be seen. In the afternoon visit the historic Norwegian whaling station in Prices Inlet and Kaipipi Bay.

Days 8 to 10: Fiordland
This is an area rich in history, majestic scenery and abundant in wildlife. Captain Cook and his crew landed here on HMS Resolution in 1773, the first Europeans to visit Fiordland, spending five weeks in Dusky Sound, historically this region is very important and shaped the future of the New Zealand. From the middle of the 19th Century this unexplored interior Fiordland coastline attracted the attention of those in search of hidden greenstone or New Zealand jade. Fiordland’s West Coast is only accessible by sea, making it the most remote region of New Zealand’s mainland, its isolation has been beneficial because its beauty remains unspoiled and its historic sites undisturbed. Waterfalls, streams, rivers and fiords are enveloped with misty veils that come and go. A rugged terrain, the thickly forested floors are covered with ferns, lichens and mosses. Bottlenose Dolphins, Fiordland Crested Penguins and Little Penguins are all resident in the fiords; during our time here we will look out for them. Our schedule gives us the flexibility to visit as much as possible; areas we plan to visit during our voyage in Fiordland include Doubtful Sound, Dusky Sounds and Acheron Passage, Acheron Harbour, Southerm's Point and Pickersgill Harbour. Our final plan will be determined by the weather.

Day 11: Invercargill
We arrive at the Port of Bluff early in the morning. After breakfast disembark and board our complimentary coach transfer to either a central city point or to the airport.

Enquire for a full Itinerary.

This is your chance to directly contribute to the future of New Zealand’s most precious regions. When you book, we’ll donate 5% of the cabin price to the Department of Conservation’s valuable work in the Subantarctic and Fiordland. Plus there will be the opportunity along the way to get your hands dirty for a few hours (should you wish) and personally help with the latest conversation projects in the area.

VOYAGE #1864 DETAILS

Prices:
Heritage Suite ......................... $ 8,800 pp
Mini Suite ............................ $ 8,250 pp
Superior Plus ......................... $ 7,800 pp
Superior ............................. $ 7,300 pp
Main Deck ............................ $ 6,995 pp
Main Deck Triple ..................... $ 5,995 pp

Additional Charges:
Landing Fees .......................... $ 400 pp
(All prices are per person in USD)

Price Includes:
Pre/Post cruise transfers, all on board ship accommodation, meals and all expedition shore excursions.

Price Excludes:
All items of a personal nature, laundry, drinks, gratuities, international/domestic flights, visas and travel insurance.
Day 1: Invercargill
Meet at an Invercargill central city hotel and be transferred to the Port of Bluff for embarkation. The captain and expedition team will be waiting for your arrival on the Spirit of Enderby. Familiarise yourself on board and then join the captain on the bridge or fellow travellers on deck as we set sail and our adventure begins.

Day 2: The Snares – North East Island
The largest of this group of islands is North East Island, a nature reserve of international importance and home to more nesting seabirds than all of the British Isles put together. A group of islands that have had no introduced mammals, they are a pristine haven for wildlife. Snagged with hidden reefs we learn how the islands got their name. We will cruise the jagged coastline by Zodiac allowing us to see some of the features of the island. From the water we can view the unique large tree daisies Olearia lyallii and Brachyglottis stewartiae which dominate much of the island, creating a forest canopy and draping the hills. Our cruise should also allow us to encounter some of the birdlife that inhabits these islands, including the endemic Snares Crested Penguin. We may also catch glimpses of the Snares Island Tomtit and Fernbird which are unique to these islands. On the cliffs we will likely see Buller’s Albatross whose Maori name translates as ‘flying wind’ which could be an apt description of The Snares. This species only nests here and at the Solander Islands.

Day 3: Auckland Islands – Enderby Island
Enderby Island is a wildlife rich island that has no equal in the Southern Ocean. Offering a

FORGOTTEN ISLANDS OF THE SOUTH PACIFIC
SUBANTARCTIC ISLANDS OF NEW ZEALAND

You won’t find them mentioned in a travel brochure on your high street; you won’t find them in most guidebooks, you probably don’t know anyone that has ever been there and they don’t even appear on some maps of the South Pacific – these are the ‘forgotten islands’. Despite their low profile, they are among the most remarkable wildlife reserves in the Southern Ocean, designated UNESCO World Heritage sites and afforded the highest protection of any nature reserves in New Zealand. Remote, uninhabited and on no regular shipping route, access is further restricted by a strict Management Plan which limits the number of people allowed ashore each year.

Departing the Port of Bluff (Invercargill) the first of these islands we visit are The Snares. No landings are permitted because the islands are honey-combed with seabird burrows. Of particular interest are the Snares Crested Penguin, a Fernbird and Tomtit all of which are endemic. We should see them all as we enjoy the dramatic coastline and tree daisy forest from our Zodiac cruise.

In the Auckland Islands, the largest of the island groups, we will have the chance to spend the day ashore on Enderby Island, arguably the most amazing Subantarctic Island. Here you can hike through the windswept Rata forests, and along the exposed coastal cliffs. The wildlife is never far away and its lack of fear means close encounters, great for photography and observations. In Carnley Harbour in the south of the Auckland Islands there are a number of fascinating sites, including a Shy Albatross colony, abandoned Coastwatcher’s huts, a shipwreck and castaway depots that we can visit. The weather will dictate what we do.

Campbell Island, the southernmost island of this expedition, is an example of what can be achieved in restoring islands. In recent years sheep, cattle, cats and rats have all been eliminated and the island is rapidly recovering. The great English botanist Sir Joseph Hooker, a friend of Charles Darwin, visited Campbell Island in the 1840s and described the flowering fields of ‘megaherbs’ to be “second to none outside of the tropics”. We can say the same now, because of the removal of these introduced animals. This island is also the home of the majestic Southern Royal Albatross, the endemic Campbell Island Flightless Teal and Snipe.

These islands represent a priceless ecosystem. Joining this expedition redefines natural history travel and will leave you wishing you could have spent more time there.

Southern Royal Albatross © A Terauds

Day 1: Invercargill
Meet at an Invercargill central city hotel and be transferred to the Port of Bluff for embarkation. The captain and expedition team will be waiting for your arrival on the Spirit of Enderby. Familiarise yourself on board and then join the captain on the bridge or fellow travellers on deck as we set sail and our adventure begins.

Day 2: The Snares – North East Island
The largest of this group of islands is North East Island, a nature reserve of international importance and home to more nesting seabirds than all of the British Isles put together. A group of islands that have had no introduced mammals, they are a pristine haven for wildlife. Snagged with hidden reefs we learn how the islands got their name. This species only nests here and at the Solander Islands.

Day 3: Auckland Islands – Enderby Island
Enderby Island is a wildlife rich island that has no equal in the Southern Ocean. Offering a
Campbell Island is known for its megaherbs – herbaceous, perennial wild flowers characterised by their great size, with huge leaves and very colourful flowers. They have developed as an adaptation to the harsh weather conditions on the islands. Our visit should coincide with the flowering of the Pleurophyllum speciosum, an endemic daisy carpeting the hills and starting in size with leaves sometimes half a metre wide. Adapting unusually to survive the harsh climate, its nearest relatives can be found in the Canary Islands. There will be a range of walks offered. You can explore an abandoned Meteorological Station at the head of the harbour or take the Col Lyal Saddle walk which offers an opportunity to view and photograph the Southern Royal Albatross nesting amongst the flowers and tussocks. Alternatively, walk to remote Northwest Bay across the tussock tops and megaherb fields to an isolated coastline that Southern Elephant Seals haul out on and New Zealand Sea Lions and Yellow-eyed Penguins call home. Or we could climb the beautifully-named Mt Honey which offers dramatic views from its summit.

Day 7: At Sea

A day at sea provides a great opportunity to reflect on the voyage and the Subantarctic islands that we have visited. Today spend time on deck and view pelagic bird species that come close. We may also see cetaceans such as the Dusky Dolphins which sometimes surf the bow waves of the ship, and if sea conditions are good, a number of different whale species are a possibility. The day is interspersed with illustrated lectures of the biology and history of the area we have visited and the Southern Ocean.

Day 8: Invercargill

On arrival at the Port of Bluff this morning, we have our final breakfast and say our farewells before disembarking and taking a complimentary coach transfer to either a central city point in historic Invercargill or to the airport.

Enquire for a full itinerary.

IN THE WAKE OF SCOTT AND SHACKLETON

ROSS SEA, ANTARCTICA
The Ross Sea region of Antarctica is one of the most remote places on Planet Earth and one of the most fascinating places in the continent’s human history. With shipping restricted by impenetrable pack ice to just two brief months each austral summer, few people have ever visited this strange and beautiful territory, with opportunities for non-scientific personnel limited to a handful of tourist expedition ships. Heritage Expeditions offers such a voyage on its own fully equipped and ice-strengthened ship, crewed by some of the most experienced officers and sailors in the world and staffed by some of the most passionate and knowledgeable Guides. This is a unique opportunity to experience nature on a scale so grand there are no words to describe it.

The Ross Sea takes its name from Sir James Clark Ross who discovered it in 1841. The British Royal Geographical Society chose the Ross Sea for the now famous British National Antarctic Expedition in 1901-04 led by Robert Falcon Scott. That one expedition spawned what is sometimes referred to as the ‘Race to the Pole’. Ernest Shackleton almost succeeded in 1907-09 and the Japanese explorer Nobu Shirase tried in 1910-12. Scott thought it was his, but was beaten by his rival, Norwegian Roald Amundsen in the summer of 1911. Shackleton’s Trans Antarctic expedition in 1914-17 marked the end of this ‘heroic’ or ‘golden age’ of exploration, but many of the relics of this era, including some huts, remain. The dramatic landscape described by these early explorers is unchanged. Mt Erebus, Mt Discovery and the Transantarctic Mountains are as inspiring today as they were 100 years ago. The penguin rookeries described by the early biologists fluctuate in numbers from year to year but they still occupy the same sites. The seals which are no longer hunted for food, lie around on ice floes seemingly unperturbed. The whales, which were hunted so ruthlessly here in the 1920s, are slowly coming back, but it is a long way back from the edge of extinction, and some species have done better than others. Snow Petrels, Wilson’s Storm-Petrels, Antarctic Prions and South Polar Skuas all breed in this seemingly inhospitable environment.

There is so much to do and so much to see here, from exploring historic huts and sites to visiting penguin rookeries, marvelling at the glacial ice tongues and ice shelves and understanding the icebergs and sea ice. Then there are all the seabirds, seals and whales to observe and photograph, modern scientific bases and field camps to visit and simply the opportunity to spend time drinking in the marvellous landscape that has always enthralled visitors.

Lying like stepping stones to the Antarctic continent are the little known Subantarctic Islands. Our journey includes The Snares, Auckland, Macquarie and Campbell Island. They break our long journey but more importantly they help prepare us for what lies ahead, for these islands are part of the amazing and dynamic Southern Ocean ecosystem of which Antarctica is at the very heart. It is the power house which drives this ecosystem upon which the world depends.
Day 1: Invercargill

Arrive at Invercargill, New Zealand’s southernmost city and rich in Scottish history. Grab your last-minute luxuries before meeting your fellow expeditioners for an informal get-together over dinner.

Day 2: Port of Bluff

Enjoy a visit to the museum to view the Subantarctic display before transferring to the Port of Bluff, where you will board the Spirit of Enderby. Settle into your cabin and join your expedition team and the captain for a welcome on board.

Day 3: The Snares – North East Island

Staggeringly, The Snares are home to more nesting seabirds than all of the British Isles put together. Zodiac cruising the coast we learn how the islands got their name and in the sheltered bays we should see the endemic Snares Crested Penguin, the Cape Petrel and Buller’s Albatross nesting on the imposing cliffs.

Days 4 to 5: Auckland Islands

Characterised by towering cliffs and rugged sea stacks, these islands have borne witness to many a shipwreck in days gone by. We spend the day ashore on Enderby Island which is perhaps the most beautiful of all the Subantarctic Islands. Here we find parakeets flitting above carpets of red, white and yellow wild flowers and on the beaches beyond, the rare Hooker’s or New Zealand Sea Lion. We land in Carnley Harbour and if conditions are suitable climb to a Shy Albatross colony, otherwise we explore sites within the harbour.

Day 6: At Sea

Take the chance to learn more about the biology and history of these islands and the tempestuous Southern Ocean through informal lectures with our experts. This particular stretch of ocean is very productive and we can expect many seabirds, including five or six kinds of albatross and numerous species of petrel.

Days 7 to 8: Macquarie Island

This remote, rocky outpost which endures roaring westerly winds, supports one of the highest concentrations of wildlife in the Southern Hemisphere. Four species of penguin, King, Royal, Rockhopper and Gentoo breed here. You will never forget your first experience in a ceaselessly active ‘penguin city’, where the dapper inhabitants show no fear of their strange visitors. We will also meet with the Park Rangers, visit the Australian Antarctic Base and observe the hundreds of Southern Elephant Seals along the beaches.

Days 9 to 12: At Sea

Soaring albatross and petrels circle the vessel as we steam south through the Southern Ocean. Lectures now concentrate on the Ross Sea region and beyond the bow of the ship; drifting icebergs of extraordinary shapes begin to appear. Maneouvring in close for your first ice photographs we pass the Antarctic Circle and into the continent’s realm of 24-hour daylight.

Days 13 to 22: Antarctica’s Ross Sea Region

With unpredictable ice and weather conditions, a day-by-day itinerary is not possible but we assess the conditions daily and take every opportunity to make landings and launch the Zodiacs. You can anticipate wildlife viewing, visits to scientific bases and historic sites, as well as the spectacular white and blue scenery.

We hope to visit the following areas:

Cape Adare:
A large flat spit of land, teeming with the staggering sight of Antarctica’s largest Adelie Penguin rookery: a tumult of chattering, feeding chicks; territorial disputes; petty pilfering and courtship displays. Among the shifting mass of penguins we will find Carsten Borchgrevink’s Hut, the oldest in Antarctica, an overwintering shelter for the first expedition to the Antarctic continent in 1899.
Cape Hallett: The enormous Admiralty Range heralds our arrival: wild and extraordinary, the mountains rear up from the sea to over 4,000m, bounded by colossal glaciers. We land at an abandoned base site, now home to large numbers of Adelie Penguins and Weddell Seals.

Franklin Island: Desolately beautiful and rugged, this is home to a large Adelie Penguin population and other nesting seabirds. We attempt a landing and explore the coastline.

Possession Islands: Rarely-visited, small and rugged, these rocks support tens of thousands of penguins. Observe the birds’ busy and humorous activity, with the Admiralty Mountains forming a superb backdrop across the water.

Ross Ice Shelf: The world’s largest body of floating ice and a natural barrier, at times creating hazardous weather, with sheets of snow blown at gale force by winds off the polar ice cap. Just 800 miles from the South Pole, this daunting spectacle prevented many early explorers from venturing further south. We cruise along its dizzying 30m high ice cliffs, perhaps lucky enough to see icebergs ‘calving’.

Ross Island: Mount Erebus/Cape Bird/Shackleton’s Hut/ Scott’s Hut(s) and visits to a scientific field station (Scott and McMurdo Stations are high on our wish list but ice, weather and station operational requirements often make them inaccessible). Ross Island was and is the ‘hub of activity’ in the Ross Sea, dominated by Mt Erebus, a monstrous active volcano named after the ancient Greek God of Darkness. The carefully preserved huts of the ‘Heroic Era’ help make the history come alive. If we can reach the bases we get a modern perspective on Antarctic Research.

Terra Nova Bay: An Italian research station where the scientists are always hospitable and enjoy showing us around their lonely but beautiful home. They share with us their scientific research and also, perhaps, the best ‘cafe espresso’ in Antarctica!

Days 23 to 26: At Sea Taking time to rest and enjoy shipboard life in the bar or library after the excitement and long daylight hours of the Antarctic, we have time for lectures on our final destination and for some pelagic bird spotting.

Days 27 to 28: Campbell Island – Perseverance Harbour We drop anchor in Perseverance Harbour, an occasional refuge for Southern Right Whales who come here to calve. Walk to the nesting site of the Southern Royal Albatross and see the strange and beautiful megaherbs growing on the hills. These huge wild flowers that have adapted to the harsh conditions have unusual colourings and weirdly-shaped leaves. We also seek out other wildlife such as Campbell Island Shags, Light-mantled Sooty Albatross and sea lions.

Day 29: At Sea Relax and reflect on a remarkable journey as you join our experts for a recap of highlights and enjoy a farewell dinner tonight.

Day 30: Invercargill We disembark in the Port of Bluff and this adventure ends as we disperse to begin others. After fond farewells we transfer you to a central city point or to the airport. Enquire for a full itinerary.
IN THE WAKE OF MAWSON
COMMONWEALTH BAY, EAST ANTARCTICA

Sir Douglas Mawson is arguably the grandfather of Antarctic science. The Australian Antarctic Expedition 1911-1914 is notable for its achievements and sadly its tragedies.

Encouraged by the success of Shackleton’s 1908-09 Nimrod expedition, of which he was a member, Douglas Mawson planned his own expedition to explore the Antarctic coastline directly south of Australia. The Australasian Antarctic Expedition sailed from Hobart on the 2nd of December 1911, making a brief stop at Macquarie Island to establish a radio base and then making landfall at Cape Denison in Commonwealth Bay. Unbeknownst to Mawson and his men, they had discovered the windiest place on the planet – renowned as the ‘home of the blizzard’. Tragedy struck the expedition when Ninnis and Mertz, the other two members of Mawson’s three-man Far Eastern Sledging Party, died. Mawson returned to base blinded by snow and having cheated death on more than one occasion. He made it back so late in the season that he had to overwinter in Antarctica as his relief ship had sailed.

Mawson’s Hut at Cape Denison still stands; protected against the extreme weather for which the region is renowned. Cape Denison has historically been one of the very few ice free and readily accessible areas along the East Antarctic coastline. However when the Mertz Glacier tongue broke off in 2010 it blocked the annual movement of sea ice preventing any shipping and effectively isolating the area, we have been monitoring conditions in this region since and now see opportunities to return and explore this majestic, remote coastline.

IN THE WAKE OF MAWSON
COMMONWEALTH BAY, EAST ANTARCTICA

Expeditioners on ice © S Blanc

26 DAY VOYAGE
10TH DEC 2018 – 3RD JAN 2019
INDICATIVE DATES ONLY
SAILING ON AKADEMIK SHOKALSKIY

Day 1: Invercargill
Meet your fellow voyagers and expedition staff for an informal get-together over dinner at the hotel, where you will stay overnight.

Day 2: Port of Bluff
We transfer you to the port where staff will welcome you on board the Akademik Shokalskiy and as you settle into your cabin, our adventure begins.

Day 3: The Snares – North East Island
North East Island is the largest of The Snares and staggering, this one island is claimed by some to be home to more nesting seabirds than all of the British Isles together. Zodiac cruising the rugged coastline we learn how the islands got their name and encounter Snares Crested Penguins, Cape Petrel and Buller’s Albatross on the imposing cliffs. We are also likely to encounter Antarctic Terns, White-fronted Terns, Red-billed Gulls, Tomtits and Fernbirds.

Days 4 to 5: Auckland Islands
Characterised by towering cliffs and rugged sea stacks, these islands have borne witness to many a shipwreck in days gone by. We spend the day ashore on Enderby Island which is perhaps the most beautiful of all the Subantarctic Islands. Here we find parakeets flitting above carpets of red, white and yellow wild flowers and on the beaches beyond, the rare Hooker’s or New Zealand Sea Lion. We land in Carnley Harbour and if conditions are suitable climb to a Shy Albatross colony, otherwise we explore sites within the harbour.
Day 6: At Sea
Take the chance to learn more about the biology and history of these islands and the tempestuous Southern Ocean through informal lectures with our experts. This particular stretch of ocean is very productive and we can expect many seabirds, including five or six kinds of albatross and numerous species of petrel.

Days 7 to 8: Macquarie Island
This remote, rocky outpost which endures roaring westerly winds, supports one of the highest concentrations of wildlife in the Southern Hemisphere. Four species of penguin, King, Royal, Rockhopper and Gentoo breed here. You will never forget your first experience in a ceaselessly active ‘penguin city’, where the dapper inhabitants show no fear of their strange visitors. We will also meet with the Park Rangers, visit the Australian Antarctic Base and observe the hundreds of Southern Elephant Seals along the beaches.

Days 9 to 11: At Sea
Soaring albatross and petrels circle the vessel as we steam ever southward through the Southern Ocean. Lectures now concentrate on the Antarctic region and beyond the bow of the ship; drifting icebergs of extraordinary shapes begin to appear. Maneuvering in close for your first ice photographs we pass the Antarctic Circle and into the continent’s realm of 24-hour daylight. Relax in the ship’s bar and catch up with some reading in the library. If you have brought your laptop with you there will be time to download and edit photos while they are fresh in your mind.

Days 12 to 18: Commonwealth Bay
Our first landing on the remote East Antarctic coastline will be Cape Denison, Commonwealth Bay. Notoriously known as the ‘home of the blizzard’, Here we will see (and experience) Mawson’s Hut and its environs which include other relics from the 1911-14 expedition and Adelie Penguins. West from Cape Denison is the French Research Base, Dumont D’Urville which, if permission is granted and ice conditions permit, we will visit. There is also an Emperor Penguin colony nearby. Breeding season will be over but there could be birds around. Other landings could include Port Martin (abandoned French Base) and the McKellar Islands. We will also cruise in the Zodias looking for wildlife.

Days 19 to 22: At Sea
Taking time to rest and enjoy shipboard life in the bar or library after the excitement and long daylight hours of the Antarctic, we have time for lectures on our final destination and for some pelagic bird spotting.

Days 23 to 24: Campbell Island – Perseverance Harbour
We drop anchor in Perseverance Harbour, an occasional refuge for Southern Right Whales who come here to calve. Walk to the nesting site of the Southern Royal Albatross and see the strange and beautiful megaherbs growing on the hills. These huge wild flowers that have adapted to the harsh conditions have unusual colourings and weirdly-shaped leaves. We also seek out other wildlife such as Campbell Island Shags, Light-mantled Sooty Albatross and sea lions.

Day 25: At Sea
At sea en route to the Port of Bluff, take the opportunity to relax and enjoy our last few days of shipboard life and to reflect on an amazing experience. On your last evening we will review and celebrate our discoveries over a farewell dinner.

Day 26: Invercargill
We arrive at the Port of Bluff early in the morning. After breakfast, customs formalities and a last minute opportunity to bid farewell to your expedition team, you disembark and board our complimentary coach transfer to a central city drop off or Invercargill Airport.

Enquire for a full itinerary.

VOYAGE #1978 DETAILS

Prices:
Heritage Suite ................................... $22,000 pp
Mini Suite ...................................... $20,750 pp
Superior Plus ................................... $19,800 pp
Superior ......................................... $18,500 pp
Main Deck ...................................... $16,000 pp

Additional Charges:
Landing Fees ................................... $880 pp

Price Includes:
Pre/Post cruise transfers, one night hotel accommodation in a twin share room (incl. dinner/breakfast), all on board ship accommodation, meals and all expedition shore excursions.

Price Excludes:
All items of a personal nature, laundry, drinks, gratuities, international/domestic flights, visas and travel insurance.

ESSENTIAL INFORMATION

Detailed Information
Fully detailed dossiers for every voyage listed in this brochure are available on request from our office. These dossiers also act as the final definitive statement of inclusions and other details and are therefore an essential part of the booking contract. After booking we will provide you with Pre-departure Information and Expedition Notes.

Age Requirements
Our expeditions are designed for adults, but may be suitable for mature teenagers. Anyone under the age of 18 must be accompanied by a parent or guardian. Please note that we do not provide an on board children’s programme and children will be the responsibility of their parent or guardian whilst on board.

Flight Information
We do not package international flights to connect with our voyages but in some cases we will charter flights to aid travel to destinations that are not always serviced with regular scheduled air services.

Passport & Visa Requirements
You are required to travel with a current passport (with at least six months’ validity) and visa for all of our expeditions. Other regulations may apply and you should check with the nearest embassy or consulate of the countries that you plan to visit, (please note that Macquarie Island is part of Australia and a valid visa may be required to visit). Medical Matters
These are expeditions for persons in generally good health. We will be travelling to remote areas with limited sophisticated medical facilities. The ship has a medical officer and a small infirmary on board but medical attention is limited to basic care. The fee for medical services rendered or medicines supplied will be added to your account.

You will be forwarded a link to a confidential medical questionnaire 4 months prior to departure which we ask that you and, in some cases, your doctor complete and return promptly to enable us to assess if there may be difficulties in you joining the expedition. If there is any substantial change in your medical circumstances between the completion of that document and the expedition departure it is important that you advise us accordingly.

Equipment & Clothing Requirements
Our Pre-departure Information details any essential clothing and equipment that is required.

Travel Insurance
You must have it! You may be barred from embarkation if you have no proof of adequate insurance including full medical evacuation cover. If you are arranging your own insurance, you should check that any pre-existing medical conditions are covered as well as all included activities such as snorkelling, landings, Zodiac excursions and charter flights. We recommend purchasing insurance at time of booking in the event of cancellation. Please see points 5 and 6 of the Booking Terms and Conditions for more information.

Adventurous Travel
However good our organisation is, we are at the mercy of the unexpected and this type of expedition can never be entirely predicted. If you are not prepared for this you should not travel with us. Because these are not ordinary package holidays, the outline itineraries given in this brochure are statements of intent rather than promises. Local weather, politics, airlines, transport or a host of other uncontrollable factors can mean a change in itinerary, it is unlikely that the itinerary would be substantially altered, but if changes are necessary the Expedition Leader will decide the best alternative. Where a delay or change does occur, we will do everything we can to minimise its effects, but we cannot be held responsible for the result of delays or changes outside our control.

Cabin Arrangements
Double beds are available in suite accommodation only. Single clients are matched with a sharer of the same gender in a twin-share cabin. Payment of a single supplement guarantees the sole use of a cabin (1.8 times the p/p rate for cabins, 2 times for suites).

Ship Communications
The radio room on the ship is equipped with a satellite telephone and email for on board communication.

BOOKING YOUR EXPEDITION

Booking Conditions
To make a booking you must send us a completed booking form and a deposit of 25% for your selected voyage. We will then invoice you for the balance, which must be paid no later than 90 days (with the exception of voyages to the Antarctic, the Northern Sea Route and Wrangel Island where it is 120 days) before departure. If you book less than 90 days before departure, full payment is due immediately.

Once you have decided which voyage is for you, please check availability by calling our office or visiting your travel agent. We can normally hold space (option) for you for 7 days while you send in the booking form. We strongly recommend that you read the brochure description, dossiers, general pages and booking conditions carefully.

Most travellers to Russia require a valid visa as well as regional permits to visit the Russian Far East.

The Heritage Expeditions office can arrange a visa invitation as well as the necessary permits required, but we must work to local government deadlines, so we strongly recommend booking as early as possible.

Completing The Booking Form
• Ensure your name is spelt exactly as it appears in your passport.
• Please specify any special dietary requirements as soon as possible.
• Please attach a copy of the passport you will be travelling on and inform us immediately if this changes for any reason. Check that your passport is valid for the required time beyond your period of stay, if not you may need to obtain a new passport.
• Would you like a single cabin? If so please request this on the booking form.
• Are you insured? We do require you to be insured and have suitable cover for the expedition.
• Where did you hear about us? E.g. Recommendation from whom, advertisement, Internet search etc.

IMPORTANT: Please ensure that you sign the booking form. This indicates that you have read the booking conditions and agree to abide by them and also, having read the information provided, you understand what is involved in the voyage. If there are minors (under the age of 18) in your party, you should sign the booking form for them and this indicates that you are taking responsibility for them.

Then
• Send the fully completed booking form with a deposit of 25%.
• You may pay your deposit over the telephone by Visa or Mastercard and this will secure your place (direct bookings only). We also accept telegraphic transfers; please contact us for our bank account details.
• A signed booking form must be received in our office within 14 days of bookings made by phone.
• Forward a colour copy/scan of the photo page of your valid passport you will be travelling on.
• Please note a 2.5% fee will be added for any payments made by credit card following your initial deposit.
• It has come to our attention recently that some telegraphic transfers have had bank fees deducted from intermediary banks. Please note that all bank fees are to the customer’s charge. All outstanding balances, including minor values due to bank fee shortfall will need to be paid in full prior to departure. To avoid your payment coming through short, please instruct your bank to pay all bank fees and to instruct the intermediary (correspondent) bank that all charges are to be returned to the originating bank.

What Happens Next?
Your booking will normally be confirmed within a week, although in busy periods it may take a little longer.

Final Payment
The balance of your payment is due 90 days (120 days for the Antarctic, the Northern Sea Route and Wrangel Island voyages) before departure. The exact date will be shown on your invoice. Although we accept credit cards (Visa or Mastercard) these will be subject to a 2.5% fee (direct bookings only), we do prefer the final balance to be paid by telegraphic transfer.

Lastly
Between 14 to 30 days before departure we will send out your final joining instructions. Please check these details carefully, if you have not received your final joining instructions at least 1 week before departure, please contact us. If you have any concerns about these details or any last questions about your holiday please do not hesitate to contact us immediately.

BOOKING TERMS AND CONDITIONS

Thank you for choosing to book with Heritage Expeditions Ltd. (hereinafter referred to as “HE”). Before you make any binding booking, we would recommend you (hereinafter referred to as ‘contracting party’) carefully read the following travel conditions. These specific travel conditions and the term ‘contracting party’ apply to both private persons (hereinafter referred to as ‘bookings’) and travel organisations (see paragraph 1.2).

1. Reservation of trip/travel contract formation

1.1 If the contract comes about by means of a written acceptance by the contracting party to the offer of HE upon which a binding travel contract with HE is effected, conditions and/or limitations set out in paragraph 1.3 up to and including paragraph 11.3 apply. In case the contracting party, in addition to himself/herself, lists one or more other persons on one notification form, this contracting party is automatically responsible for all obligations ensuing from the travel contract (in line with the general terms and conditions of HE concerning himself/herself and the other persons booked.

1.2 If the contracting party makes provision about means of a written acceptance by a (travel) organiser (a case of, but not limited to, tour operators, agencies, travel agents, foundations, societies etc.), this (travel) organisation enters into a binding travel contract with HE. The travel organisation in question is then exclusively considered as the contracting party to which all conditions apply: 25% of total deposit on signing the contract, 25% of total price 12 calendar months prior to departure, 50% of total price 180 days prior to departure. After payment has been received, the travel documents will be dispatched.

1.3 If, according to the above, payment is made to the (travel) organisation, the client(s) of the (travel) organisation, incorrect or incomplete transmission of (personal) data could result in faulty vouchers, etc. for which HE is not responsible.

1.4 On receipt of the written booking form, the trip that has been booked will be confirmed by HE by means of a confirmation invoice sent to the contracting party.

1.5 Single travellers who wish to share their cabin(s) with another person must state so in the booking form. In this case, whether or not a cabin-mate is available, single travellers who require a single occupancy of cabins will be charged 1.8 the published fare on all cabins except suite cabins, which will be charged at 2 times the published fare.

2. The travel offer/the travel elements

2.1 The scope of the travel offer (the travel programme) booked by the contracting party is contractually recorded in the travel confirmation sent later in combination with the description from HE’s most up to date brochure/programme description.

2.2 Any deviation from the travel elements described in the brochure and publications are valid only if confirmed in writing. This may be in the original offer, travel confirmation or a letter sent later.

3. Payment

3.1 On the implementation of the travel contract, the contracting party must pay to HE an advance of 25% of the total price due 90 days (with the exception of voyages travelling to the Antarctic, the Northern Sea Route and Wrangel Island where it is due 120 days) before departure. In case of a (travel) organisation, this is guaranteed in the following payment conditions apply: 25% of total deposit on signing the contract, 25% of total price 12 calendar months prior to departure, 50% of total price 180 days prior to departure.

3.2 After payment has been received, the travel documents will be dispatched.

3.3 If, in case of the contracting party failing to fulfill their payment obligations, HE will send him/her a written reminder and he/she will have the opportunity to make immediate payment. After payment is still not made, the contracting party is liable to pay interest on the amount due of 0.5% for each month or part of a month that this remains unpaid. Furthermore, he/she will be held liable to pay compensation for legal collection costs equal to an additional 15% of the sum claimed, with a minimum amount of USD 50. If the contracting party fails to comply with his/her payment obligations, HE reserves the right to cancel the contract on the day of default. HE is entitled to charge the cancellation costs incurred (in line with paragraph 6.3 or as agreed otherwise in the travel confirmation).

3.4 If, regarding the above, payment is made to the (travel) organisation, the client(s) of the (travel) organisation, incorrect or incomplete transmission of (personal) data could result in faulty vouchers, etc. for which HE is not responsible.

3.5 In case of complaints, claims, loss of travel documents, force majeure events, other things, changes made to the travel confirmation, are permitted only if they do not substantially alter the nature of the trip. If this includes, among other things, changes to the itinerary, duration of the trip,ricing of the trip, change of accommodation, change of the diving leader, HE is obliged to inform, in writing, the contracting party of such changes. Such changes will not be used by the contracting party as reason for cancelling the travel contract.

3.6 The agreed price is based on the prices, exchange rates, duties and taxes as known to HE at the time the publication went to press and at the time of the travel confirmation. HE reserves the right to raise the agreed price on the grounds of, among other things, unforeseen increases (e.g. exchange rates, sudden increased prices of accommodation providers, airlines, duties, taxes, harbour duties and fuel prices). In the event that HE considers a price alteration is considered necessary, HE is obliged to inform the contracting party of this, in writing, at the very latest 20 days before the day of departure. Price increases not permitted within 20 days of the start of the journey. In the case of a price increase of more than 10% of the total price of the trip, the contracting party is entitled to cancel the trip without incurring any costs.

5. Cancellation of the trip by HE

5.1 If the minimum number of participants has not been achieved, HE is entitled to cancel the planned trip up to 30 days before departure. Any payment already received from the contracting party will be paid back by HE if the contracting party does not agree to accept an alternative trip offered by HE.

5.2 HE has the right to cancel the trip in the case of force majeure (e.g. war, uprising, natural disasters, abnormal/unexpected weather and ice conditions, legal stipulations of the local/ regional authorities and other acts of God*), if HE or the travel organiser must pay back the contract price to the travel organiser, in the case of a (travel) organisation, the client(s) of the (travel) organiser, in obtaining a return trip/flight. The contracting party is not responsible for the costs of this.

5.3 If HE, by virtue of the provisions of paragraph 5.1, is unable to provide the trip, only the equivalent of the billed price will be paid back to the contracting party, any additional costs will not be held liable for the contracting party has incurred in preparation of the offer or reservation of travel components (such as but not limited to: flights, hotels, connecting flights, travel insurances) which, in combination with the trip booked with HE, may have been booked elsewhere.

6. Cancellation of the trip by the contracting party

6.1 The contracting party may cancel the travel contract (in writing) at any time before the beginning of the trip, in the case of the cancellation occurring up to 90 days before or after the main journey, minor changes in the travel programme are permitted. HE is obliged to inform, in writing, the contracting party of such changes. Such changes will not be used by the contracting party as reason for cancelling the travel contract.

6.2 The agreed price is based on the prices, exchange rates, duties and taxes as known to HE at the time the publication went to press and at the time of the travel confirmation. HE reserves the right to raise the agreed price on the grounds of, among other things, unforeseen increases (e.g. exchange rates, sudden increased prices of accommodation providers, airlines, duties, taxes, harbour duties and fuel prices). If HE considers a price alteration is considered necessary, HE is obliged to inform the contracting party of this, in writing, at the very latest 20 days before the day of departure. Price increases not permitted within 20 days of the start of the journey. In the case of a price increase of more than 10% of the total price of the trip, the contracting party is entitled to cancel the trip without incurring any costs.

7. Liability of HE

7.1 HE is obliged to provide correct details of the trip according to the travel contract and in line with the expectations the traveller may reasonably have on the grounds of the contract. HE is responsible for the selection of accommodation/ transport providers, ships, hotels, resorts etc. composition and the quality conditions, services and/or the stipulations, description of the travel elements in the HE travel brochure/programme etc. publications, the processing of the travel confirmation, reservation of the travel elements and control and dispatch of the travel documents.

8. Exclusion and limitation of the liability of HE

8.1 HE acts as intermediary for the sale of accommodation/transport services. The traveller may stay in a hotel, on a voyage on a ship, services of dive boats and provision of excursions etc. On the other hand, the contracting party and therefore HE’s liability is excluded. In these cases, the conditions of the relevant providers of accommodation/ transport services and/or the stipulations of [inter]national law applies and all liability of HE (in the case of contracts, civil law damage and loss of possessions/ baggage, personal injury, death) is excluded.

In the case of claims, HE will try to mediate between the provisions of the respective travel insurance and the contracting party. HE is not responsible for optional travel insurance and/or the diving leader the contracting party elsewhere (optional excursions etc.)

8.2 All travel elements booked with HE, which relate to stays on board a ship and/or excursions or programmes off ship (such as but not limited to excursions or programmes off ship in the water, incl. scuba diving, swimming and snorkelling, are at 100% client liability. In case the contracting party – in the case of a (travel) organisation: the client(s) or the (travel) organiser, in obtaining a return trip/flight – wishes to make changes to the booked trip (e.g. the departure date, destination or type of accommodation), this is considered a cancellation and the cancellation costs stated in paragraph 6 apply.

6.3 It is possible for the contracting party – in the case of a (travel) organiser (a case of, but not limited to: (bodily) damage, loss of deposit on the case of the cancellation by the (travel) organiser, to take out cancellation insurance to cover the possible cancellation penalty of the trip (see also paragraph 10.4).

10.4 The Northern Sea Route and Wrangel Island where loss of deposit is within 127 days and full loss within 120 days)

6.2 If the contracting party, after booking, wishes to make changes to the booked trip (e.g. the departure date, destination or type of accommodation), this is considered a cancellation and the cancellation costs stated in paragraph 6 apply.

6.3 It is possible for the contracting party – in the case of a (travel) organiser (a case of, but not limited to: (bodily) damage, loss of deposit on
may not result in (permanent) injury or death. The conditions for participation are stated precisely in our diving instructions. In any case the contracting party must have a health certificate signed by a doctor and an internationally accepted diving certificate, in case of the land programmes, the contracting party should enjoy generally sound health. We advise the contracting party – in the case of a (travel) organisation – to always take out travel insurance, supplementary coverage by accident insurance (see also paragraph 10.4).

8.4 HE will not be held liable for loss, damage and robbery of travel documents, baggage or other possessions.

8.5 He shall accept no liability for damage for which he is in part or wholly responsible, either on board or on shore, at an earlier date.

8.6 HE will not be held liable for damage as a consequence of the travel arrangements being correctly implemented, if the deficiency in the execution of the contract is attributable to the contracting party.

8.7 The trips offered by HE are conducted mainly in ‘marginal zones’ and require the qualification of the guiding trips to places where infrastructure and (medical) facilities may be poor. On these trips, the contracting party fully understands that booking the trip with HE is not comparable to booking an everyday standard trip. If, because of weather, sea currents, nautical reasons, large amounts of floating ice etc., the decision is made to change the programme, every effort will be made to offer an alternative, in certain exceptional cases, however, this will not always be possible. In such cases nonfulfilment of the obligations of the contracting party will not be grounds for claims, if the programme cannot be carried out according to the travel description and (certain) places described in the travel programme cannot be visited, HE will not be held liable for damage suffered and/or the spoiling of holiday enjoyment. The Expedition leader is at all times authorized to change elements of the programme, if he/she is of the opinion that it would be to the benefit of the carrying out of the programme. In such a case HE will not be held liable for damage suffered and/or the spoiling of holiday enjoyment.

9. Obligations of the contracting party

9.1 In the case of a (travel) organisation: instead of ‘contracting party’ [in paragraphs 9.1 up to and including 9.4] read also ‘the client(s) of the [travel] organiser’.

The contracting party is obliged to observe all instructions given by HE and the travel leadership (e.g. Expedition leader(s), guide(s), diving leader(s), crew of the vessel, local agent and the personnel of accommodation providers such as hotels, resorts and diving locations) in order to benefit the sound execution of the trip. Furthermore, the contracting party is 100% liable for damage caused by improper behaviour, e.g. towards fellow travellers, material damage to the hotels, ships or resorts, to be judged according to the standards of behaviour of the model traveller.

9.2 Any contracting party who causes such disturbance, or who threatens to cause such disturbance, that the proper execution of (part of) a trip is seriously hindered or could result in danger for the contracting party and/or the fellow travellers, can by or on behalf of HE (trip leadership or the local representatives) be excluded from (participation of) the trip (components). In the case of exclusion, the contracting party is not entitled to make any claim for restitution of (part of) the trip.

9.3 If disturbing behaviour or damage (as described in paragraphs 9.1 and 9.2) should occur, all costs resulting from this shall be charged to the contracting party.

9.4 If the contracting party does not enjoy generally sound health and/or does not have the required diving certificates and/ or diving experience as required for participation in the trip, in the interest of the contracting party or his/her fellow travellers, HE is entitled to decide to offer an alternative programme for the contracting party in question as an extreme case, to include this person from (certain) excursions or (parts of the diving programme). These limitations apply also if the contracting party is not in possession of correct (diving) gear, as stated in HE’s publications. In the case of exclusion, or (of a mandatory alternative programme) the contracting party is not entitled to make any claim for restitution of (all or a part of) the price.

9.5 The contracting party is obliged to inform HE’s trip leadership of any negligence in the execution of the travel contract noted by him/her at the location, or in case of a (travel) organisation: noted by the client(s) of the (travel) organisation. This should be done as quickly as possible, in writing, or other appropriate form of communication, to HE’s, relevant Expedition leader, who shall immediately do their utmost to find an appropriate solution. As far as handling complaints is concerned, the following persons are responsible for general complaints during a ship voyage: the Expedition leader. If there is no Expedition leader present on board, the captain is responsible. In the case of hotel and land programmes: the manager of the hotel/organisation.

9.6 If an immediate solution for the complaints cannot be found, the contracting party – in the case of a (travel) organiser the client(s) of the (travel) organisation – should present these complaints to the relevant (travel) organisation where the trip was booked, up to and including 9.4) read also ‘the client(s) of the (travel) organiser’.

10. Baggage/travel documents and insurance

10.1 The contracting party must have in his/her possession on departure and during the trip the necessary travel documents such as a valid passport or, where permitted, a tourist card and any required visa, diving certificates, diving logbook including a health certificate from the doctor, proof of inoculations and vaccinations. If the participant is unable to take (part of) the trip due to a lack of any of these documents, HE will not be held (financially) responsible, unless HE had undertaken to provide it.

10.2 Baggage/Travel documents and insurance will not be held liable for e.g. baggage loss or damage, flight delays or flight change, whereas the responsibility for payment of these costs belongs solely to the passenger. HE strongly advises that passengers ensure that such eventualities are covered by travel insurance, if not covered by travel insurance the responsibility still remains with the passenger and HE specifically declines any responsibility whatsoever.

11. General

11.1 If the duration of the trip as stated in the publication is given in days, the day of departure and the day of arrival, irrespective of departure or arrival times, are counted as full days. The definite departure and arrival times are given in the travel documents.

11.2 The laws of New Zealand apply to this contract and its content belongs to Heritage Expeditions Ltd, Antarctic House, 53B Montreal Street, PO Box 2718, Christchurch 8240, New Zealand.
