CONSERVATION & ADVENTURE
EXPEDITION CRUISING
2020/2021

Heritage Expeditions
Antarctica • Western and South Pacific
Subantarctic Islands • Russian Far East
Gray Whale encounter from Zodiac, Beringia National Park © S. Blanc
Welcome to our 2020-21 brochure and our 36th annual edition! Pioneers in expedition travel, we are a proudly family owned and operated company dedicated to delivering authentic, in-depth expedition experiences and one-of-a-kind wildlife encounters aboard our comfortable, yet robust purpose-built expeditions ships.

Founded in 1984 to share and explore the seldom visited and far reaches of New Zealand with like-minded inquisitive travellers, Heritage Expeditions continues to forge new ground while remaining true to our founding principles. Today the Heritage Expeditions’ world spans from the remote Ross Sea and East Antarctica through to the historic shores of the Russian Arctic including Wrangel Island, exploring the amazing diversity of landscapes, people and wildlife in between on our voyages of discovery.

During the year we have provided travellers with experiences and encounters of a lifetime including floating alongside Emperor Penguins on the ice in the Ross Sea; cruising alongside a North Pacific Right Whale, one of the world’s rarest whale species and our second encounter in two years, at the Commander Islands; discovering a new species of sea bird the ‘Heritage Lava Petrel’ off the Solomon Islands; record sightings of the world’s rarest seabird the Magenta Petrel/Chatham Island Taiko off the Chatham Islands; returning to the wonderland of Fiordland and climbing Secretary Island, and a 101 Polar Bear sightings on our final Wrangel Island expedition of the season.

This year our flagship expedition vessel Spirit of Enderby was refurbished and Wi-Fi internet access installed, we launched our first Indonesian voyage exploring Raja Ampat and Cenderawasih Bay, are returning to East Antarctica and Mawson’s Huts following the historic region’s first ice-free summer in 8 years, as well as one of the world’s greatest seaways the Russian Arctic’s Northeast Passage, and have added a new voyage dedicated to exploring the Chatham, Antipodes and Bounty Islands to our 2021 schedule.

We look forward to sharing another exciting season of expedition voyages aboard both Spirit of Enderby and her sister vessel Akademik Shokalskiy experiencing the greatest wildlife opportunities, most immersive cultural experiences and unrivalled access to the world’s most wild and beautiful places!

Yours in Adventure

Aaron & Nathan Russ

WHAT IS EXPEDITION CRUISING?

EXpedition cruising is a unique form of travel

xpedition cruising offers travellers (not tourists) the opportunity to go where few have been before, and experience wilderness, wildlife and cultures in a genuine and responsible way.

Expedition cruise ships are smaller vessels, designed to navigate areas inaccessible to larger ships. These smaller vessels avoid the negative impact of large cruise ships and groups on a culture or ecosystem. Participants go ashore in small groups by Zodiac at unique destinations with the clear objective of gaining a greater understanding and appreciation of the region or culture, not simply for sightseeing.

The staff aboard expedition cruise ships are teachers and interpreters, not entertainers. Their objective is to inform, enthuse and create ambassadors for conservation. Genuine expedition cruising appeals to people from all walks of life from around the world and can be enjoyed regardless of age, interests, knowledge or physical prowess.

New Zealand based Heritage Expeditions, founded in 1984 by Rodney and Shirley Russ, is one of the few companies that still offers genuine expedition cruises. Heritage Expeditions pioneered expedition cruising in the Subantarctic islands of New Zealand and Australia.

Soon after the Ross Sea region of Antarctica was added and, more recently, the Russian Far East and the South Pacific have been included in the company’s long list of regular destinations.

Heritage Expeditions’ vessels Spirit of Enderby and Akademik Shokalskiy can accommodate up to 50 and 48 passengers respectively. Spirit of Enderby has been recently refurbished and both boast Australasian chefs creating international-quality cuisine. The cabins are clean and comfortable, with the majority offering private facilities. Their officers and crew are among the most experienced in the world, and are complemented by a passionate and knowledgeable international expedition team. Spirit of Enderby and Akademik Shokalskiy offer a unique point of difference being among the world’s last, family-operated expedition vessels of their size and ice class setting the standard in authentic small ship expedition cruising.

Heritage Expeditions was founded, and is still owned and operated, by a family of biologists and adventurers committed to providing authentic expedition cruising.
Heritage Expeditions makes every effort to respect the environment in all aspects of its operation. We are leaders in Responsible Travel to remote places around the globe and our objective is to tread and cruise lightly wherever we go.

We minimise waste and employ recycling practices on our ships and in our head office by selecting environmentally friendly products and produce. Our goal in managing our vessels is to minimise fuel consumption and emissions with regular servicing and a proactive maintenance program. We annually clean and antifoul our vessels’ hulls to reduce the risk of biofouling. When selecting our specialist expedition equipment, we research this carefully to ensure that they are the most suitable and environmentally responsible.

We travel in small groups (max of 50 pax on Spirit of Enderby and up to 48 pax on Akademik Shokalskiy) and endeavour to maintain high guide to guest ratios. Each expedition is led by an experienced Expedition Leader familiar with the region being visited and, where at all possible, we employ local experts. We make sure that all expedition members are respectful of local customs and traditions, and are aware of, and abide by, the conditions of our entry permits to nature reserves and specially protected areas.

Heritage Expeditions supports numerous worldwide conservation programs with funds, advocacy and logistical support. We are proud to be a Species Champion for the critically endangered Spoon-billed Sandpiper with BirdLife International. We are not afraid to take a stand on issues we feel strongly about and joined with Whale and Dolphin Conservation in a successful lawsuit against the U.S. Fish and Wildlife Service opposing the importation of wild Beluga Whales from Russia into a United States aquarium. We have also partnered with both New Zealand and Russian government agencies to negotiate and develop sustainable and best practice tourism policies for their respective world-class nature reserves.

Heritage Expeditions works closely with the Department of Conservation (DOC) to ensure that our impact on New Zealand’s National Parks and reserves is minimal. We are an approved concession holder, ensuring that your visit with us to conservation lands adheres to best practice and contributes to the management of these protected areas.

In Russia we work closely with several National Parks and Federal Reserves, including Beringia National Park and the Wrangel Island Reserve. Our goal is to minimise impact on the environment and on the wildlife, while ensuring a world-class experience for all our expeditioners.

Heritage Expeditions holds active membership in a number of conservation and travel organisations including the International Association of Antarctic Tour Operators (IAATO), Association of Arctic Expedition Cruise Operators (AECO) and the Tourism Sustainability Commitment.
Spirit of Enderby (Professor Khromov) and her sister ship Akademik Shokalskiy are fully ice-strengthened expedition vessels, built in 1984 for polar and oceanographic research. They are perfect for expedition travel. Carrying just 50 and 48 passengers respectively, Heritage Expeditions is one of the few remaining companies still offering true, small ship exploration.

Our flagship Spirit of Enderby was refurbished in May 2019 and both vessels provide comfortable accommodation in twin share cabins, approximately half of which have private facilities. All cabins have outside windows or portholes and ample storage, while the ships feature bar/library lounge areas and dedicated lecture rooms.

The real focus and emphasis of every expedition however, is getting you ashore as often as possible for as long as possible with maximum safety and comfort. Our expeditions are accompanied by some of the most experienced naturalists and guides who have devoted a lifetime to field research in the areas that we visit, and our ships are crewed by a very enthusiastic and experienced Russian Captain and crew.

**Heritage Suites**: Large lounge area, separate bedroom with double bed and a single bed or sofa in the lounge, writing desk, wardrobe and drawers. Private bathroom with shower, toilet and washbasin. Large forward and side facing windows allow great views. Mini Suites: Separate bedroom with a double bed and a single bed or sofa in the lounge, writing desk, wardrobe and drawers. Private bathroom with shower, toilet and washbasin. Mini Suites have windows.

**Superior Plus Cabins**: Two lower berths, writing desk, wardrobe and drawers. Private bathroom with shower, toilet and washbasin. These cabins have windows.

**Superior Cabins**: One bunk (one upper and one lower berth), writing desk, wardrobe and drawers. Private bathroom with shower, toilet and washbasin. These cabins have windows.

**Main Deck Cabins**: Two lower berths, writing desk, wardrobe and drawers. Private washbasin. Nearby shower and toilet facilities are shared with other Main Deck cabins. These cabins have a porthole.

**Main Deck Triple**: One bunk (one upper and one lower berth) and one additional lower berth, writing desk, wardrobe and drawers. Private washbasin. Nearby shower and toilet facilities are shared with other Main Deck cabins. These cabins have a porthole.
EXPEDITION STAFF

As a family-owned and operated company, we have also assembled a world renowned team of experts to travel with you and to interpret the natural and human history along the way.

Aaron Russ has grown up surrounded by wildlife and wilderness, working in the family business from a young age. He has been Expedition Leader on over 100 expeditions to the world’s most remote regions. With a degree in zoology, a passion for photography and a desire to showcase the world’s premier natural history destinations, expedition leading comes naturally.

Nathan Russ, the younger of Rodney’s two sons, has worked as a chef on a number of expedition vessels around the world. A keen and capable Expedition Leader, he has led numerous expeditions including Svalbard, Antarctica, the Subantarctic Islands, Melanesia and all of our voyages in Russia. When not on an expedition, he manages the company’s vessels.

Chris Colles is a former accountant turned Birder. His role in researching and arranging the now famous Western Pacific Odyssey (WPO) Expedition is legendary. He brings the same passion and knowledge to many of these “Birding” expeditions. His attitude to birding is professional and infectious. A true team player he is always there to help and share his knowledge.

David Harrowfield has had a lifelong interest in Antarctica and has made numerous visits to the Ross Sea region with New Zealand’s Antarctic Heritage Trust. He has published extensively and is a frequent visitor to the Scott Polar Research Institute UK. David looks forward to sharing your Antarctic and Subantarctic experience.

Julia Mishina was born and raised in Kamchatka. Her first vocation was teaching, but she has been involved in travel and tourism for a number of years. She is responsible for obtaining the permits and permissions required to operate our expeditions and regularly joins us on our voyages as an Assistant Expedition Leader.

Agnès Brenière’s love of nature began when she grew up in the French Alps. A self-taught naturalist, she graduated in environmental law and management. Agnès has managed to combine her love of nature with a passion for travel into a satisfying career as an expedition guide, where she is happier in the Polar Regions.

Adam Walkyn was born in the Canadian Prairies, and has found his niche in Expedition Travel as a guide and naturalist. Knowledgeable and unflappable he is the perfect guide and companion when travelling to remote shores. He returns to the Russian Far East and Southern Ocean for another season – because in his words “there is still so much more to see and share”.

Maxim Ilin grew up in Archangel, a popular departure point for Arctic expeditions, which led his interest in history and saw him obtain a specialist degree from the Northern Federal University. Working in museums and the UNESCO-listed Solovetsky Islands in the White Sea, Max has a particular interest in the Russian colonisation of the north and the early Soviet period including Gulag history, and looks forward to sharing his knowledge.

Courtney Rayes’ passion for the life aquatic steered her towards a career in marine biological science. An avid scuba diver, Courtney spent a year-long scholarship working on marine conservation projects around the world including marine education in Papua New Guinea. When she’s not running a small marine consultancy in New Zealand, guiding and educating, Courtney can be found in or out on the water.

Adam Walleyn was a former accountant turned Birder. His role in researching and arranging the now famous Western Pacific Odyssey (WPO) Expedition is legendary. He brings the same passion and knowledge to many of these “Birding” expeditions. His attitude to birding is professional and infectious. A true team player he is always there to help and share his knowledge.

Courtney Rayes’ passion for the life aquatic steered her towards a career in marine biological science. An avid scuba diver, Courtney spent a year-long scholarship working on marine conservation projects around the world including marine education in Papua New Guinea. When she’s not running a small marine consultancy in New Zealand, guiding and educating, Courtney can be found in or out on the water.

Chris Todd grew up exploring New Zealand’s great outdoors, studied natural history, nature conservation and National Park management, has run an ecological restoration business and worked for the Department of Conservation and Forest & Bird. He enjoys sharing his love and knowledge of wildlife and wild places.

Julia Mishina was born and raised in Kamchatka. Her first vocation was teaching, but she has been involved in travel and tourism for a number of years. She is responsible for obtaining the permits and permissions required to operate our expeditions and regularly joins us on our voyages as an Assistant Expedition Leader.

Agnes Breniere’s love of nature began when she grew up in the French Alps. A self-taught naturalist, she graduated in environmental law and management. Agnes has managed to combine her love of nature with a passion for travel into a satisfying career as an expedition guide, where she is happier in the Polar Regions.

Samuel Blanc grew up in the French Alps. After three years working as a naturalist guide in France and Spain, Samuel spent 15 months at the French Antarctic research station Dumont d’Urville. There he studied seals, petrels, skuas, Adelie and Emperor Penguins. A keen photographer and passionate Polar Region specialist he joins us again to share his knowledge.

Sam Brown grew up in Bangor University’s botanic garden, North Wales. After 18 years surrounded by plants and animals, it was only natural that he went on to complete an Ecology degree. Dan has set up his own ecological consultancy which provides field and technical support to a variety of organisations on biodiversity-related projects.

The Pacific Ring of Fire manifests itself in numerous places on the rim of the Pacific Ocean – but nowhere is more dramatic than Russia’s Far East. Along one of the world’s most active plate boundaries, the Pacific plate subducts under the North American plate and the resulting volcanic and geothermal activity has built a unique and amazing landscape. Upwelling from the deep trenches formed by this action and currents around the many islands creates perfect conditions for seabirds and cetaceans. Consequently the area is one of the richest in the world, both in terms of the number of species, which can be seen, and their sheer abundance. For many birders, the undoubted highlight is the auk and during our voyage it is possible to see up to 14 species including Tufted and Horned Puffins, Parakeet, Whiskered and Rhinoceros Auklets, as well as Spectacled and Pigeon Guillemots.

Other seabirds we regularly encounter include Laysan Albatross, Mottled Petrel, Fork-tailed Storm-petrel, Red-faced Cormorant, Red-legged Kittiwake and Aleutian Tern. For those keen on cetaceans we can reasonably expect to see Fin, Sperm and Humpback Whales, as well as Orca (Killer Whale), Baird’s Beaked Whale and Dall’s Porpoise.

The region’s human history is equally interesting and fascinating. The original settlers were the Ainu and Itelmen. They were displaced with the arrival of the Cossacks in the 18th Century after the Explorer Vitus Bering had put the region on the map. The Soviet empire encompassed the region and at the height of the Cold War, Russia’s formidable Pacific Fleet was based here. The secrecy surrounding the fleet resulted in the region being ‘closed’ even to Russians who had to get special permits to travel to and within the area. It is only now, two decades since Perestroika, that people can travel relatively freely here, although there is still very little in the way of infrastructure for visitors.

The region we explore on this expedition falls into three quite distinct and unique geographical destinations: the Kamchatka Peninsula, the Commander Islands (the western extremity of the Aleutian chain of islands), and the Kuril Islands. Each region is very different. Each has its own story and, in many cases, localised plants and birds. Join us as we go in search of those people, plants, animals and birds that make this part of the Pacific Ring of Fire so special.

A message for the keen birders and cetacean watchers. Space doesn’t allow us to list all species on a day-by-day basis in this itinerary. Please ask for an expedition dossier or a bird and mammal list from previous expeditions.
**Day 1: Petropavlovsk-Kamchatsky**

You will be transferred to the vessel and we will depart for the Commander Islands. You are welcome on the bridge as we sail from what some people consider the best natural harbour in the world. There is also some good birding as we leave the shoreline behind.

**Day 2: At Sea**

A day at sea as we cruise across the Kamchatka Trench towards the Commander Islands, we will keep a look out for the cetaceans that this area is well-known for. It is also a good time to be on deck as the birding is good with Fork-tailed Storm-petrel and Red-legged Kittiwake amongst the likely sightings. Enjoy several lectures and briefings as we prepare for the days ahead.

**Days 3 to 4: Commander Islands**

There are two main islands in the Commander group, Bering and Medny, and during our two days we will explore several sites combining the best of the natural and cultural history. There is an excellent chance of finding Rock Sandpiper, Mongolian River, Pechora Pipit and Grey-crowned Rosy-finch, as well as the endemic subspecies of Arctic Fox. Zodiac cruising can be extremely rewarding here with several species of auks, as well as the Red-legged Kittiwake, often spotted. The area is also extremely rich in marine mammals. Potential species include Sperm, Humpback, Northern Minke and Baird’s Beaked Whales, as well as Orcas, Steller Sea Lions, Northern Fur Seals and Pacific Sea Otters. We include a visit to the small settlement of Nikolskoye and the harbour in the world. There is also some good birding with close looks at Tufted Puffin and Whiskered Auklet. Ashore we could encounter Grey-tailed Tattler, Middendorff’s Grasshopper Warbler and Black-faced Bunting.

**Day 5: Zhupanova River, Kamchatka**

We will spend several hours in the Zodiacs cruising on the scenic Zhupanova River where we should get great views of Steller’s Sea Eagles as the birds often nest in the trees adjacent to the river. Other highlights could include Far Eastern Curlew, Long-toed Stint, Kamchatka Gull and Aleutian Tern. There is also a major salmon fishery on the river which we can visit.

**Day 6: Bukta Russkaya, Kamchatka**

In this deep ford on the Kamchatka Peninsula we will look for the endangered Kittlitz’s Murrelet as well as Long-tailed Murrelet. We plan a short excursion at the head of the ford where there is a chance of seeing brown bears. At the entrance to the ford, where we can Zodiac cruise, there are almost always Orcas and Steller Sea Lions.

**Day 7: Atlasova and Onekotan Islands**

Very early in the morning we will pass through Second Kuril Strait which has one of the highest densities of Sea Otters in the Kuril Islands. Our landing on Atlasova Island is great for birders and non birders alike. There are the remains of a Gulag to explore and numerous species to see. This evening on Onekotan Island we can stretch our legs through an amazing field of wild flowers as we walk to Black Lake.

**Day 8: Ekmak and Toporkovsky Islands**

During an early morning Zodiac cruise at Ekmak Island we should see various alcids, with close looks at Tufted Puffin and Whiskered Auklet. This afternoon at Toporkovsky Island in the shadow of the active Mutaiva Island volcano we can expect to find Harlequin Ducks, Red-faced Cormorants, Tufted Puffins and Brünnich’s Guillemots. Ashore we could encounter Grey-tailed Tattler, Middendorff’s Grasshopper Warbler and Black-faced Bunting.

**Day 9: Simushir and Yanikichka Islands**

We will enter a flooded caldera at the northern end of Simushir Island where a once top secret Soviet submarine base lies abandoned. In the surrounding area look for Siberian Rubythroat, Eurasian Nutcracker, Pine Grosbeak and Japanese Grey Bunting. Our visit to Yanikichka Island is likely to be one of the highlights of the voyage as the sheer number of alcids which breed here is incredible, with spectacular concentrations of Crested and Whiskered Aukslets.

**Day 10: Chirpoy and Urup Islands**

This morning, depending on weather, we will either Zodiac cruise or land on Chirpoy Island where there are some dramatic volcanic landscapes and headlands covered in breeding seabirds. This afternoon’s landing on Urup Island is a chance to stretch your legs on an extended walk, beachcomb and look for Sea Otters or birds in the forest behind the beach.

**Day 11: Iturup Island**

This morning we land at the small settlement of Kurik from where local buses/trucks will take us into the volcanic highlands to thermal hot pools where you can enjoy a soak or go birding. Possible species we could encounter include Kamchatka Leaf-warbler, Japanese Robin, Siberian Accentor, Pine Grosbeak and Japanese Bush-warbler.

**Day 12: Kunashir Island**

Kunashir is the largest island in the Kuril chain. We plan a landing in the Kuriksky Reserve and will explore an extensive area of woodland, where there are some good walks and birding. Species we could encounter include Siberian Rubythroat, Eurasian Nutcracker, Pine Grosbeak and Japanese Grey Bunting.

**Enquire for a full itinerary and/or a Bird and Mammal List.**

**Price Includes:**

- Accommodation, meals and all expedition excursions on board the ship (All prices are per person in US$).

**Price Excludes:**

- Local payment (payable on board), pre/post cruise transfers, all on board ship accommodation, meals and all expedition shore excursions.

- All items of a personal nature, laundry, drinks, gratuities, International/domestic flights, visas and travel insurance.
Perhaps no other sea in the world has witnessed as much human suffering and misery as the Sea of Okhotsk. Between 1932 and 1953 it is estimated that over 3 million prisoners (the vast majority of them innocent) were transported across the Sea of Okhotsk to the Gulags of the Kolyma Goldfields. It is estimated that only 500,000 of those prisoners survived to make the journey home. The town and port of Magadan were built to process these prisoners.

The upper regions of the Sea of Okhotsk remain frozen for much of the year and winter storms make it an inhospitable place. However, the lure of a rich fishery and, more recently, oil and gas discoveries means this sea is still being exploited, so nothing has changed. In 1854, no fewer than 160 American and British whaling ships were there hunting whales. Despite this seemingly relentless exploitation the wildlife thrives, including the beautifully marked and rare Ribbon Seals. On three small islands within this sea hundreds of Steller Sea Lions haul out each year to breed. One of these, Tyuleniy Island is home to one of the largest concentrations and breeding colonies of Northern Fur Seals in the Russian Far East.

Seabird numbers in the Sea of Okhotsk can only be described as spectacular. There are islands like Talan where the sky darkens when the Crested Auklets start massing offshore of an evening. Other birds include guillemots, puffins, auklets and fulmars. But the richness of birdlife is not restricted to pelagic species. The Sea of Okhotsk has one of the highest concentrations of the majestic Steller’s Sea Eagle of anywhere in the Russian Far East. Waterfowl are common as are many migratory species. Harder to see, but not uncommon on this expedition, are the magnificent Kamchatka Brown Bear and other mammals such as the Arctic Ground Squirrel.

This is a truly unique expedition in that it travels through a little known and seldom visited region. A region with a rich history and very significant and important wildlife values, both terrestrial and marine. There are still discoveries to be made and so for the inquisitive, adventurous and open minded traveller this is a ‘must do’ expedition.
Day 1: Sakhalin Island, Port of Korsakov

This morning we board a coach for transfer to the Port of Korsakov some 40 minutes south of the city of Yuzhno-Sakhalinsk where we will board the ship. Once on board you will be shown to your cabins and there will be a chance to unpack and explore the vessel. There will be briefings and introduction to the ship, staff and crew after we sail towards the Sea of Okhotsk.

Day 2: Tyuleniy Island

We visit little known Tyuleniy Island off the south-east coast of Sakhalin Island. This small island is a strong hold for Northern Fur Seals and Steller Sea Lions. Fur seal numbers have increased since an International Convention signed in 1911. Birds and sea lions are everywhere, in the air, in the water and on the land. Many of our landings are among the last places in the Sea of Okhotsk to become ice free each year. This late ice can sometimes restrict how far we can explore. On the other hand, ice increases our chances of seeing some of the seals including Bearded, Ringed, Largha and Ribbon Seals that breed here. If we can land, there will be birding, botany and photography excursions led by our team of on board naturalists.

Day 3: Piltun Bay, Sakhalin Island

It was the discovery of oil and gas in this region which put Sakhalin Island on many people’s maps. Piltun Bay is an important habitat for the small population of Western Gray Whales. Researchers monitor the population during the summer months. We go in search of the Gray Whales that live here, travelling by Zodiac inshore to the shallower waters where they are known to feed.

Day 4: Iony Island

Iony Island lies in the middle of the Sea of Okhotsk, it is really just a rock, but what it lacks in physical size it more than makes up for in wildlife. Birds and sea lions are everywhere, in the air, in the water and on the land. Many of our landings are among the last places in the Sea of Okhotsk to become ice free each year. This late ice can sometimes restrict how far we can explore. On the other hand, ice increases our chances of seeing some of the seals including Bearded, Ringed, Largha and Ribbon Seals that breed here. If we can land, there will be birding, botany and photography excursions led by our team of on board naturalists.

Days 5 to 6: Shantar Archipelago

Lying in the western sector of the Sea of Okhotsk, close to the continent, the islands in this archipelago are amongst the last places in the Sea of Okhotsk to become ice free each year. This late ice can sometimes restrict how far we can explore. On the other hand, ice increases our chances of seeing some of the seals including Bearded, Ringed, Largha and Ribbon Seals that breed here. If we can land, there will be birding, botany and photography excursions led by our team of on board naturalists.

Day 7: Mal‘minkie Islands

Here there are birds everywhere, in the air, in the water and on the land. Numerous species breed here including large numbers of Spectacled Guillemots. Other species include Ancient Murrelet, Rhinoceros Auklet, Parakeet Auklet, Horned and Tufted Puffin, Crested Auklet and both Common and Brünnich’s Guillemot. There is also a good population of Steller’s Sea Eagles on the island and adjacent mainland. Landing on the island is restricted to a small gravel spit; however on the mainland we can stretch our legs and explore the taiga forest.

Day 8: Okhotsk Town

This town has featured in Russian Far East history since the early days. Cossack explorers came from the west. Vitus Bering travelled overland from St Petersburg to Okhotsk in 1725, and again in 1733, as well as to Kamchatka and beyond. Today Okhotsk is the region’s fishing centre. The port exports significant quantities of salmon and other fish. We visit the town, landing by Zodiac up the river near its centre. The local people are generous and welcoming, and will provide entertainment in the town centre with a cultural display.

Day 9: Talan Island

An internationally known, but very difficult bird island to get to, Talan is famous largely because of the hundreds of thousands of Crested Auklets that nest there. There are also an extraordinary number of Black-legged Kittiwakes nesting along the cliffs and, not surprisingly, a large population of Steller’s Sea Eagles. We plan to circumnavigate the island by Zodiac before landing and then return in the late evening to witness the huge flocks of Crested Auklets amassing offshore before returning to the island.

Day 10: Koni Peninsula

This is a mountainous region to the south-east of the town of Magadan, part of which is included in the Magadanskiy Zapovednik Reserve. This reserve protects among other animals brown bear and Snow Sheep. Many of our landings are expeditionary, in that although we have landed at a number of places along the coast, many will be new and unknown to us, so we are never quite sure what we will find. That is part of what makes this style of travel so interesting.

Day 11: Yamskaye Islands

These islands are claimed by some biologists to be the largest bird colony in the North Pacific. According to bird counts there are an estimated 7 million birds nesting on Matykil Island, the largest in the group. Birds include Common and Brünnich’s Guillemot, Crested, Parakeet and Least Auklets, Tufted and Horned Puffins and Northern Fulmar. The most abundant of these is the Least Auklet. We Zodiac around the coast as no landings are permitted.

Day 12: Magadan

The name Magadan is synonymous with Stalin’s oppressive Gulags, or prisons, but there is very little evidence now of this town’s tragic past. The local museum has an excellent display about the Gulags but the most poignant reminder is the ‘Mask of Sorrows’, a large monument on a hill overlooking the town. Today Magadan is a town of about 100,000 people. Fishing is important and gold mining is experiencing a revival. The infamous Kolyma Highway or the ‘Road of Bones’, connects Magadan with Yakutsk and the rest of Russia. We plan to arrive here midday where our journey ends. You will be transferred to a central hotel or the airport.

Enquire for a full itinerary and/or a Bird and Mammal List.

* The price listed includes the additional local payment of $500 which is payable in US$ cash onboard the ship. [All prices are per person in US$]

Price Includes:

- Local payment (payable on board), pre/post cruise transfers, all on board ship accommodation, meals and all expedition shore excursions.

Price Excludes:

- All items of a personal nature, laundry, drinks, gratuities. International/domestic flights, visas and travel insurance.
Siberia’s eastern coastline is undoubtedly one of the most remote and least visited regions of the globe. It is home to several groups of indigenous people, including the Itelmen, Koryak, Even and Chukchi. Fur trappers and sealers plundered the region’s natural resources in the name of the Tsar in the early 17th Century. Stalin and subsequent leaders encouraged economic development in this part of the Soviet Union. Soviet towns were built, bonuses were paid to those who would immigrate and work there and attempts were made to collectivise the traditional way of life.

As the iron curtain was drawn and the Cold War escalated, this region became forbidden territory. Travel to and within the area was strictly controlled, the number of military installations increased, early radar warning stations proliferated and Russia’s Pacific fleet patrolled the coastline.

This all changed in the early 1990s with Perestroika and the collapse of the Soviet Union. Military installations were abandoned, there were mass migrations of workers back west and towns and industries were simply abandoned. As the heavily subsidised economy collapsed, the indigenous people were forced back to traditional ways of life. Permits to travel through the area did, however, become a little easier to obtain.

Twenty five years on, travel through this region is still heavily regulated and virtually impossible for the independent traveller. There is little or no infrastructure, only a few kilometres of road, and no hotels apart from in the main towns of Petropavlovsk-Kamchatskiy and Anadyr. These towns have scheduled air services, but access to the rest of the region either by air or sea, even for locals, is at best ‘unpredictable’.

Throughout its chequered human history its rich natural history has largely gone unnoticed and unknown by the rest of the world. It is an amazing coastline dominated by the volcanoes of Kamchatka in the south, the fiords of what was formally the Koryak region, and the rich estuarine areas and tundra of Chukotka.

This coastline has one of the most diverse assemblages of wildlife and habitats of anywhere of a similar latitude on the globe, with virtually no people or visitors to disturb them. One of the most iconic species is the critically endangered Spoon-billed Sandpiper that is endemic to the region. Since 2011 we have supported BirdLife International and Birds Russia research teams working with this species. This support now includes other seabirds and waders as researchers monitor potential changes in their populations and distribution due to a variety of reasons including climate change.
**Day 1: Petropavlovsk-Kamchatskiy**

Arrive into Petropavlovsk-Kamchatskiy, the capital and administrative centre of the Kamchatka Region and transfer to the port to board our ship.

---

**Day 2: Zhupanova River**

We plan to spend the morning Zodiac cruising on the Zhupanova River. Our main target here is the Steller’s Sea Eagle and there are usually some occupied nests close to the river. Good numbers of Largha Seals are also often hauled out on sandbars in the river and we should see a good variety of waterfowl and waders. By late afternoon we should be over deep water heading for the Commander Islands and new species to look for include Laysan Albatross, Motiffed Petrel and the Fork-tailed Storm-petrel. The Kamchatka Trench can also be excellent for cetaceans and we have previously seen Blue Whales on this crossing.

---

**Days 3 to 4: Commander Islands**

The wildlife-rich Commander Islands were first discovered by the Commander Vitus Bering when his ship was wrecked here in 1741. We intend to explore the islands through our own landings and Zodiac cruises and our first stop will be the village of Nikolskoye, where there is an interesting museum. Zodiac cruising is often spectacular of Nikolskoye, including Tundra Bean Goose, Steller’s Eider, Great Knot, Long-tailed Stint, Gyrfalcon, Siberian Accentor and Asian Rossy-finch. This area is also a stronghold of the Kittlitz’s Mumelet and we should see several during our journey. In our previous expeditions we have explored much of this coastline, documenting the distribution and abundance of many species. In 2011 we recorded a previously unknown breeding population of Spoon-billed Sandpiper. Working alongside researchers from BirdLife International and Birds Russia who will be travelling with us, we plan to revisit many of these areas to monitor changes and search for new breeding colonies. There will be unique opportunities for photography, hiking and ‘birding’ in country with a rich diversity of species, and where only a few ‘westerners’ have ever been before.

---

**Day 5: Karaginsky Island**

Our proposed landing site is a patchwork of boggy tundra, ponds and shingle spits where an interesting range of waders can be found including Pacific Golden Plover, Red-necked Stint and Red-necked Phalarope. We also hope to see Bluethroat and Pallas’s Reed Bunting.

---

**Day 6: Verkhhoturowa Island and Govenia Peninsula**

Verkhoturowa Island has some huge seabird colonies, and by following a short trail to the clifftop we should be able to enjoy some fantastic views of Tuffed Puffins, Brunnich’s Guillemots, Pelagic Cormorants and Black-legged Kittiwakes. Both Steller’s Eider and Harlequin Duck occur here too, and we may also see some Steller Sea Lions, as they are often hauled out on offshore rocks. Later in the day, there will be either a Zodiac cruise or landing on the Govena Peninsula. Good numbers of Kamchatka Brown Bears can often be found here.

---

**Day 7 to 10: Koryak and Chukotka Coast**

During these days of the expedition we will travel along this largely unknown part of the coast. It comprises deep forested fords where we should see brown bears, Red Fox and, with luck, mountain sheep and Kamchatka Marmots. In the many lagoons and shallow bays there is a vast array of birdlife including Tundra Bean Goose, Steller’s Eider, Great Knot, Long-tailed Stint, Gyrfalcon, Siberian Accentor and Asian Rossy-finch. This area is also a stronghold of the Kittlitz’s Mumelet and we should see several during our journey. In our previous expeditions we have explored much of this coastline, documenting the distribution and abundance of many species. In 2011 we recorded a previously unknown breeding population of Spoon-billed Sandpiper. Working alongside researchers from BirdLife International and Birds Russia who will be travelling with us, we plan to revisit many of these areas to monitor changes and search for new breeding colonies. There will be unique opportunities for photography, hiking and ‘birding’ in country with a rich diversity of species, and where only a few ‘westerners’ have ever been before.

---

**Day 11 to 12: Meinypil’gyno**

Meinypil’gyno, located on a 40-kilometre-long shingle spit, is the most important site in the world for breeding Spoon-billed Sandpiper. Here about 15 pairs are monitored by members of the Spoon-billed Sandpiper Task Force. We will be guests of the Taskforce and, if possible, we may be guided to one of their monitored nests. The area is extremely rich in other wildlife, so we may also find Emperor Goose, Pacific Diver, White-billed Diver and Sandhill Crane. The lagoon entrance often has Largha Seal, Gray and Beluga Whales and a spectacular number of gulls.

---

**Day 13: Cape Navarin and Kheyngypil’gyn Lagoon**

This coastline is rich in marine mammals and one creature we will be looking for, in particular, is the walrus as there is a known haul out. The animals do regularly move between locations, so finding them is always very much a matter of luck, although we have had success here in the past. Good numbers of Gray Whales often congregate here too. To the north of Cape Navarin is Kheyngypil’gyn Lagoon. On previous visits we have found this an excellent location for waterfowl and waders including Emperor Geese, Greater White-fronted Geese, Brent Geese, Hooper Swan, King Eiders, Red Knots and Aleutian Terns.

**Day 14: Port of Anadyr**

As we cruise into Anadyr Bay, there is an excellent chance of seeing more Beluga Whales. After a final breakfast on board our ship, it will be time to disembark. We will provide complimentary transfers to a downtown hotel or the airport.

Enquire for a full itinerary and/or a Bird and Mammal List.
CHUKOTKA – WHERE RUSSIA’S DAY BEGINS

15 DAY VOYAGE | A SPECIAL 15-DAY EXPEDITION INCLUDING WRANGLER ISLAND & THE ANNUAL BERINGIA REGATTA

The Chukotka region is one of 85 regions which make up the Russian Federation, officially known as the Chukotka Autonomous District, it was the last part of Siberia to be ‘conquered’ or ‘subdued’ by the Cossack invaders from the west. The indigenous people of this region include Chukchi, Inuit, Even, Koryak, Chuvan and Yukaghir, the non-native inhabitants are predominately Russian. The Soviet regime initially treated these indigenous people well, but the collapse of the Communist regime in the early 1990s spelt disaster for the people as they had become dependent upon the state. The election of Roman Abramovich as Governor of Chukotka in December 2000 changed the course of its history. His vision, generosity and leadership gave the people hope, and today Chukotka is taking its rightful place in the Russian Federation. It is rich in natural resources and wildlife is abundant, but like all Arctic fauna, it is under pressure because of significant climate change.

North of Chukotka, where the Chukchi Sea meets the Arctic Ocean, lies nature reserve and World Heritage site Wrangel Island, which has outstanding wildlife values. Sometimes referred to as the world’s Polar Bear Maternity Ward, because of the high density of denning Polar Bears, it is one of those islands that never disappoints those who are keen on natural and Arctic history. As the ice retreats each summer (further and faster than ever before) Polar Bears come ashore and we see good numbers of these, likewise walrus find refuge here each summer normally in large numbers. Birds like Snow Geese and Snowy Owls also breed here. And of course Wrangel Island is central to the story of the wreck of the Karluk and it features in other Arctic exploration stories.

On this special Chukotka expedition we will meet the locals; see and listen to their stories and experience their love for and strong connection with the land and the sea. We will celebrate with them at their annual Regatta and Festival. We will explore the vast expansive tundra with its wild flowers and dwarf tree species and we will watch for brown bears, reindeer, Arctic Foxes, ground squirrels and, if we are lucky, we may also see a Wolverine. We will explore Wrangel Island with its Polar Bears, walrus and rich Arctic history, while at sea we will look out for whales.
Day 0: Nome
For those departing from Nome, Alaska, your adventure begins with a flight across the Bering Sea and International Date Line, to the remote port of Anadyr.

Day 1: Anadyr
All expedition members will arrive in Anadyr, the administrative capital of Chukotka. Depending on your time of arrival you may have the opportunity to explore Anadyr before boarding the vessel. We will sail in the late afternoon for Eregktn.

Day 2: Eregktn
This small town was built by Gulag prisoners as a port to supply the rich Lul’ t’in mining complex some 200 kilometres inland, they were then forced to construct a road to the mine. We explore the town which has an excellent museum and plan to travel by Ural to explore along the road towards Lul’ t’in and into the tundra to gain an appreciation of this unique Arctic landscape close to the Arctic Circle.

Day 3: Konergino
Across Kresta Bay from Eregktn is the small reindeer herding village of Konergino. Reindeer herding is still an important part of the indigenous people’s culture and economy, the practice has remained largely unchanged over the centuries and revolves around ‘brigades’ looking after large herds of reindeer out on the tundra. Today is an introduction to, and an opportunity to understand, this practice.

Day 4: Presbrazhena Bay
We will be cruising along the south coast of Chukotka today and we will take the opportunity to stop at Presbrazhena Bay. We Zodiac cruise spectacular bird cliffs which could provide great photographic opportunities. We also plan time exploring the rich tundra landscape for birds and plants.

Day 5: Whale Bone Alley and Gil’mimyl Hot Springs
The significant and intriguing archaeological site of ‘Whale Bone Alley’ on Yttygran Island dates to the 14th Century, its origins and purpose have been the cause of much debate. Whale bones stretch along the beach in the form of a pathway for nearly half a kilometre. Gray Whales are frequently seen in the vicinity and there may be a chance to go whale-watching by Zodiac. This afternoon we plan a landing at nearby Gil’mimyl Hot Springs.

Day 6: Cape Dezhnev
Sea conditions permitting, we plan to land at Cape Dezhnev early this morning; this is the north-eastern most point of the Eurasian continent. The name commemorates the accomplishment of the CossackSymon Dezhevn who was the first European to sail through this strait in 1648 (80 years before Bering did). Nearby is the former Inuit village of Naukan, the inhabitants were relocated to nearby villages by the Soviet administration in 1958, but photographs and stories make the site come alive.

Day 7: At Sea
Relax as we navigate northwards towards Wrangel Island. Ice conditions will determine our speed and course, and will ultimately dictate whether we will actually be able to reach the island.

Day 8 to 10: Wrangel Island
As we approach the island we will spend time searching the ice for Polar Bears, Ringed Seals and walrus. Should there be opportunities to land we will explore the tundra to look for species which breed here. We have allowed three days on and around the island to take advantage of whatever conditions we encounter and will be utilising the local knowledge of the Park Rangers to make multiple landings and Zodiac cruise the ice.

Day 11: At Sea
We sail south towards Kolyuchin Island. The day is filled with illustrated lectures, opportunities to spend time on deck, relaxing in the ship’s bar and catching up with some reading or downloading and editing photos.

Day 12: Kolyuchin Island/Kolyuchin Inlet
This morning we plan a landing at/from Kolyuchin Inlet, a massive tidal estuary. This afternoon we will cruise to nearby Kolyuchin Inlet, a massive tidal estuary and ideal habitat for many bird species, it is early enough in the season for the majority of them to be either be on nests or have young. It is an easy landing with lots of opportunity for ‘birding’.

Day 13: Lavrentiya and the Annual Beringia Regatta and Festival
We plan to be here for opening day of the annual Beringia Regatta and Festival which includes Baidara (traditional war scarf covered boats) races as well as cultural group performances and games. It is one of the most colourful festivals in the Chukotka calendar and attracts people from many villages. There will be a range of activities at the Regatta and Festival, local foods for you to sample and souvenirs to purchase. This is a festival that gets to the very heart and soul of the people, their culture and their land.

Day 14: At Sea
As we make our way back to Anadyr we will recap the many experiences we have enjoyed on this special Chukotka expedition.

Day 15: Anadyr
After breakfast passengers will be taken ashore, a complimentary transfer to the airport or to a central downtown hotel will conclude the expedition.

Enquire for a full itinerary.

INFO@HERITAGE-EXPEDITIONS.COM
ACROSS THE TOP OF THE WORLD

15 DAY VOYAGE TO WRANGEL & HERALD ISLANDS

This unique expedition crosses the Arctic Circle and includes the isolated and pristine Wrangel and Herald Islands, and a significant section of the wild North Eastern Siberian coastline. It is a journey only made possible in recent years by the thawing in the politics of the region and the retreat of summer pack ice in the Chukchi Sea. The very small distance between Russia and the USA along this border area was known as the Ice Curtain, behind which, then and now, lies one of the last great undiscovered wilderness areas in the world.

The voyage journeys through the narrow Bering Strait, which separates Russia from the United States of America, and then travels west along the Chukotka coastline before crossing the De Long Strait to Wrangel Island. There we will spend four to five days under the guidance of local rangers on the nature reserve. Untouched by glaciers during the last ice age, this island is a treasure trove of Arctic biodiversity and is perhaps best known for the multitude of Polar Bears that breed here. We hope to catch many glimpses of this beautiful animal. The island also boasts the world’s largest population of Pacific Walrus and lies near major feeding grounds for the Gray Whales that migrate thousands of kilometres north from their breeding grounds in Baja, Mexico. Reindeer, Musk Oxen and Snow Geese can normally be seen further inland. A visit to massive bird cliffs on nearby Herald Island is also planned. The ‘mammoth steppe’ vegetation complex, a rich and diverse relic from the Pleistocene epoch, nurtures over 400 plant species and never fails to astound visitors with its sublime beauty. The number and type of endemic plant species, the diversity within plant communities, the presence of relatively recent mammoth tusks and skulls, a range of terrain types and geological formations in the small geographical space are all visible evidence of Wrangel Island’s rich natural history and its unique evolutionary status within the Arctic.

The human history of Wrangel Island is fascinating in its own right. Highlights include a 3,400-year-old Paleo-Eskimo camp in Krassin Bay, controversy over discovery and ownership of the Island, the amazing story of the survivors of the Karluk, Ada Blackjack the heroine of the Island, the Soviet occupation and militarisation and, more recently, the establishment of this world-class nature reserve. A host of similarly enthralling stories hail from several optional landings along the northern coasts of Chukotka. Our expert expedition team will take you on guided walks, Zodiac cruises and provide lectures to help you better understand and appreciate this unique High Arctic landscape.
Day 0: Nome
For those departing Nome, Alaska, your adventure begins with a flight across the Bering Sea and International Date Line to the remote port of Anadyr.

Day 1: Anadyr
All expedition members will arrive in Anadyr; depending on your time of arrival you may have the opportunity to explore Anadyr, before getting to know your fellow voyagers and expedition team on board the ship. We will depart when everybody is on board.

Day 2: Anadyrskiy Bay
At sea today, there will be some briefings and lectures. There is also a chance for some ‘birding’ and cetacean watching as we settle into ship life. Later this afternoon we plan to Zodiac cruise some of the spectacular bird cliffs in Preobrazhenskiy Bay.

Day 3: Yttygran, Nuneangan and Arakamchechen Islands
Yttygran Island is home to the monumental ancient aboriginal site known as Whale Bone Alley, where whalebones stretch along the beach for nearly half a kilometre. Gray Whales are frequently seen around the Island, we will also cruise by Nuneangan and Arakamchechen Islands where seabirds nest and walrus can be found.

Day 4: Cape Dezhnev and Uelen Village
Sea conditions permitting, we will land at Cape Dezhnev early this morning. The north-eastern most point of the Eurasian continent, it is sometimes possible to see the coast of America from this remote and lonely outpost. A few nautical miles to the west of Cape Dezhnev we visit Uelen Village, the most north-eastern village in Russia. The population is predominantly Chukchi and the village is one of the largest centres for traditional Chukchi and Inuit art in the world. We’ll be entertained by villagers and visit the bone-carving workshop.

Day 5: Kolyuchin Island
This small island was once an important Russian Polar Research Station and one of a number dotted across the Arctic. Near the derelict buildings are some of the most spectacular bird cliffs in the Arctic, where puffins, guillemots and gulls can be observed and photographed up close.

Days 6 to 10: Wrangel and Herald Islands
Ice and weather conditions permitting, we will spend the next few days on Wrangel Island and we will also attempt to include a visit to nearby Herald Island. There are many landings that we can make to search out wildlife, wild flowers and Arctic landscapes. Polar Bears will be high on our list of animals to see and with a little patience we should be rewarded with a number of encounters. Musk Oxen and reindeer were introduced to the island in 1975 and 1948, though reindeer numbers are low. We also have a chance to visit Dragi Harbour where the survivors of the Karluk which was crushed by ice in 1914 scrambled ashore and lived until they were rescued. Wrangel Island is a Russian Federal Nature Reserve of international significance and importance, particularly...
as it is a major Polar Bear denning area. Also, each summer thousands of birds migrate here to breed including Emperor Geese, Snowy Owls, skua, Arctic Terns, Ross’s, Sabine and Ivory Gulls.

Day 11: North Siberian Coast
Bounded by narrow sand ridges with numerous lagoons and inlets, this area offers plenty of places to land and explore this extensive coastline. We will be on the lookout for whales, walrus and other wildlife. We will see Chukchi villages whose residents survive in an unforgiving climate, hunting seals and whales just as their ancestors did.

Day 12: Kolyuchin Inlet
So huge that it is visible from satellite photos, this inlet contains vast numbers of waterfowl and migratory waders. We concentrate our visit on the Belaka Spit near the mouth of the inlet. It is a wild, desolate landscape that is strangely beautiful. We search the dunes and tidal areas for birdlife including Emperor Geese and Spoon-billed Sandpipers. Gray Whales frequent the area and are sometimes spotted feeding only metres offshore.

Day 13: Bering Strait and Chukotka Coast
Early morning we will pass the Diomede Islands, sometimes called Tomorrow Island and Yesterday Isle because they straddle the International Date Line. Here Russia and America are separated by only 2.3 nautical miles of ocean. We will remain in Russian territory as we cruise south past the islands. Later this afternoon we make an expedition landing on the Chukotka coast, our last chance to enjoy the wildlife and tundra landscape.

Day 14: At Sea
Relax as we sail across Anadyrskiy Bay towards Anadyr.

Day 15: Anadyr
After breakfast it will be time to say our farewells. There will be a complimentary transfer to the airport or to a central downtown hotel.

Enquire for a full itinerary and/or a Bird and Mammal List.

he eastern seaboard of Russia dominates the North Pacific and yet very few people know anything about it, let alone have experienced it. This isolation has protected one of its most valuable assets – its wilderness and to some degree, its wildlife.

The area was considered an important ‘frontier zone’ during the Cold War, so it was off-limits to foreigners. Even Russians had to get special permission to travel here. These limitations were changed in 1991/92 with Perestroika but that didn’t make it more accessible. If anything, it is probably less accessible now than it was, as there are fewer people living in the region and the state-subsidised transport system has collapsed. There is no money to replace the ageing fleets of aircraft and ships and few people can afford the prices that are charged to travel in this region today. This makes it the perfect destination for Expedition Cruising.

In the winter much of the shoreline is choked by ice. During spring and summer the region is a hive of activity. In September the thousands of birds that migrated here to take advantage of the phenomenal abundance of food will be preparing to leave. The reindeer and mountain sheep will be feeding in preparation for the harsh winter, while fat Kamchatka Brown Bears, which have fed extensively on berries in the early summer, then feasted on salmon in the rivers and creeks, will be dozing in the late summer sunshine. Late summer and early autumn is a beautiful time to discover this wilderness. The onset of autumn paints vibrant colours on the tundra cloaked hillside making the landscape a picture perfect postcard.

On this journey from Anadyr to Petropavlovsk-Kamchatskiy we will make numerous landings along these remote coastlines so that you can discover for yourself this untamed and beautiful landscape. We will select sites that few people visit such as river mouths, fiords, bays and islands that in our experience offer the natural history enthusiast, the photographer, the historian and travellers the most unique of opportunities. Come with us and discover the jewel that is the Russian Far East.
**Day 0: Nome**
For those departing Nome, Alaska, your adventure begins with a flight across the Bering Sea and International Date Line, to the remote port of Anadyr.

**Day 1: Anadyr**
All expedition members will arrive in Anadyr, the administrative centre of the Chukotka region, and transfer to the ship.

**Day 2: Egvekinot**
We spend the day in and around the town of Egvekinot on the shores of Kresta Bay. The town was built by Gulag prisoners who were then forced to construct a road to the mine. We explore the town which has an excellent museum, the road and tundra as well as visit the Arctic Circle.

**Day 3: Bukhta Gavilla**
This coastline is rich in marine mammals and one creature we will be looking for, in particular, is the walrus. The bukhta (or bay) was named after Commander Vitus Bering’s ship, the St Gabriël, of the First Kamchatka Expedition. Behind the expansive beach there is a lagoon we can explore for waterfowl and waders.

**Day 4: Pika River and Meinyp’il’gyno**
We start the day with a visit to the delta of Pika River – a well known walrus haul out. Later in the day, we visit Meinyp’il’gyno, a small settlement located on a 40 kilometre-long shingle spit. It is a traditional village although renovated under the recent Chukotka government; we enjoy local hospitality from the village ensemble who perform some of their traditional dances for us.

**Day 5: Bukhta Natalii**
Along the Koryak Coast there are many beautiful fiords (bukhtas or bays) and none are more beautiful than Bukhta Natalii. This fiord has two smaller fiords that drain into it from the south. We hike from one bay to another whilst surrounded by the magnificent mountain landscapes and tundra vegetation.

**Day 6: Tintikun Lagoon**
Much of the southern Govena Peninsula was recently made into a state reserve. There are a number of fiords included in the reserve; one of the most spectacular is Tintikun Lagoon which is one of the most picturesque locations found anywhere in the world. A large population of brown bears inhabits this area, if we are fortunate we should be able to see a number of them.

**Day 7: Koryaksky Reserve and Verhoturova Island**
We will start the morning in Kamchatka. Brown Bear country, an undisturbed habitat within the Koryaksky Reserve, where we will go bear watching. Brown bears frequently visit this area, which is completely protected and rarely visited. In the afternoon we visit Verhoturova Island where Tufted and Horned Puffins, Pigeon, Common and Brunnich’s Guillemots and also Parakeet and Least Auklets can be seen. On nearby rocky islets there is a regular, non-breeding haul out of Steller Sea Lions.

**Day 8: Karaginsky Island**
A few miles to the south of Verhoturova Island is the much larger Karaginsky Island. Here we encounter some of the first ‘forests’ of the voyage. This is a change from the tundra that we have seen, a sure sign that we are getting further south. Autumn is the best time for the wild berries and we can marvel at the richness of the local tara, as many of them should be at their best.

**Days 9 to 10: Commander Islands**
The wildlife-rich Commander Islands were first discovered by Commander Vitus Bering when his ship was wrecked here in 1741. He perished on the island along with many of his men. The reports from those that survived led to a ‘fur rush’ and the settlement of the islands. There are two large islands (Bering and Medny) with two smaller islands Arly Kamen and Toporkov. We intend to explore the islands through a combination of landings and Zodiac cruises. We plan to stop at the village of Nikoloskiye. We visit the fur seal rookery at North-West Cape and Zodiac cruise around the impressive bird colony at Arly Kamen. We will also possibly visit the grave site of Commander Vitus Bering at the remarkable Medny Island.

**Day 11: Olga Bay**
Olga Bay is a part of the very large Kronotskiy Reserve, which also includes the world-famous Valley of the Geysers. The habitat has lush Kamchatka forests coming right down to the beach. The area around Olga Bay is frequented by large numbers of Gray Whales that are usually quite friendly to visiting boats. The rising volcanoes in the background here provide a beautiful setting to explore real Kamchatka wilderness.

**Day 12: Zhupanova River**
This morning we make our way along the Zhupanova River by Zodiac. This journey allows us to explore a river habitat which is common in Kamchatka. Steller’s Sea Eagles are known to nest in the lower reaches of the river.

**Day 13: Petsypolskov-Kamchatskiy**
During the night the ship will enter Avacha Bay which is one of the greatest natural harbours in the world. There will be a complimentary transfer to the airport or to a central downtown hotel.

Enquire for a full itinerary and/or a Bird and Mammal List.

* The price listed includes the additional local payment of $500 which is payable in USA cash onboard the ship. (All prices are per person in US$).

### Additional Option:

Private charter flight Name to Anadyr

$ 1,000 pp

### Price Includes:

Local payment payable on board, pre/post cruise transfers, all on board ship accommodation, meals and all expedition shore excursions.

### Price Excludes:

- All items of a personal nature, laundry, drinks, gratuities. International/domestic flights, visas and travel insurance.
In co-operation with the Wrangel Island Nature Reserve we are excited to offer a limited number of seats on a very special Overland Traverse through the heart of this incredible landscape. For curious explorers who join us to circumnavigate Wrangel Island, there is no reason to just wonder what lies beyond the coast, over the crest of the hills and mountains. The High Arctic environment that very few people will ever experience is now accessible and exclusively available to passengers travelling with Heritage Expeditions on all 'Across the Top of the World' expeditions.

We are offering a limited number of seats on these very special 3-day (2-night) Overland Traverses. Transport is by a six-wheel, Russian-built Tundra vehicle brought to the Island in 2010. Each off-road traverse across this rugged island is led by rangers from Wrangel Island and offers lucky guests a first-hand experience into the wilds of this remote region. We have been offering these traverses since 2011 and numbers are strictly limited; we encourage you to book early to avoid disappointment.

**Day 1: Doubtful Harbour**

On arrival the Overlanders will go ashore, spend the afternoon and evening exploring the area including the nearby spit known for large haul outs of walrus. Visit Devil’s Creek, the only archaeological site on the island where remains of a Paleo-Eskimos summer camp were discovered recently. The overnight accommodation will be Wrangel Ranger huts at Somnitelnya.

**Day 2: Somnitelnya**

Travel north firstly over the southern tundra slopes climbing gradually to a mountain pass through the Somnitelnia Mountains. A steep descent takes us to a tributary of the Mammoth River, the longest river on the island. In the evening we will enjoy a walk on the tundra slopes with possible sightings of Snowy Owls, Lemmings, Arctic Foxes and a huge variety of High Arctic plants. Stay overnight at the Peak Tundra hut, a field hut for studies of the Snow Geese nesting nearby.

**Day 3: Academic Tundra**

Continue down the Tundra River to the Academic Tundra, an extensive area that makes up over half the island. There are opportunities to see amazing fields of wild flowers, Musk Ox, and potentially reindeer, although numbers have been greatly reduced by recent harsh winters. We will return to the ship at midday near the Drum Head Mountains (also known as the Dream Head Mountains) on the north coast of the island.

**Enquire for a full itinerary.**

Northbound and Southbound options available. Southbound itinerary will operate in reverse to the above itinerary.

**Price:** $1,450 (Price per person in US$)

**Price Includes:** Transport, accommodation (basic field huts) and meals. (This is in addition to the cost of the cruise).

**Price Excludes:** Travel insurance, gratuities and other items of a personal nature.

**Note:** These Wrangel Island extensions are optional activities and conducted in conjunction with our voyages but independently operated by the Park Rangers. They are subject to minimum numbers, reserve regulations, weather and ice conditions. Participants should be aware that there is no discount or compensation for missed landings that the main expeditions make, possibly including Herald Island, while participating in these extensions.
Travelling to and from the Russian Far East is not difficult or complicated, but you do need to plan in advance. Heritage Expeditions’ staff are in regular contact with a number of airlines that can provide safe and reliable connections to the main cities that the expeditions featured in this brochure depart from. Please ask your reservations agent for further information on our charter flight services to Anadyr.

This information is a guide to the options available for flights at the time of publishing.

**ANADYR**
*From Europe:* Nonstop direct flights available from Moscow.

*From America:* Heritage Expeditions has charter flights from/to Nome, Alaska for ’Across the Top of the World’ and ’Chukotka - Where Russia’s Day Begins’. Flights are also available to join ’Jewel of the Russian Far East’ and at the end of ’Siberia’s Forgotten Coast’. Seats are subject to availability at the time of reservation.

*From Australasia:* You can either travel via the USA to connect with our charter flights from Nome or transit through Khabarovsk or Moscow.

**PETROPAVLOVSK-KAMCHATSKIY**
*From Europe:* Nonstop direct flights available from Moscow with Aeroflot or indirectly with Siberia Airlines (S7).

*From America:* Flights to Korea or China offer onward flight options to Vladivostok or Khabarovsk.

*From Australasia:* Flights to Korea or China offer onward flight options to Vladivostok or Khabarovsk.

**YUZHNO-SAKHALINSK**
*From Europe:* Nonstop direct flights available from Moscow with Aeroflot, or indirectly with Siberia Airlines (S7).

*From America:* Flights to Korea or China offer onward flight options to Vladivostok or Khabarovsk.

*From Australasia:* Flights to Korea or China offer onward flight options to Vladivostok or Khabarovsk. Or you can choose a nonstop direct flight from Seoul.
Indonesian Explorer

14 Day Voyage
Discover Paradise Among Indonesia’s Lost Islands

A true expedition voyage in every sense, our journey will explore Indonesia’s rarely-visited and little known biodiverse-rich jungle-capped volcanic islands scattered across pristine pellucid waters well beyond traditional tourist routes. Join us and discover a true paradise where untouched dense jungles home to some of the rarest flora and fauna on the planet meet crystalline tropical waters teeming with exotic marine life and some of the world’s best coral reefs all wrapped in a land steeped in history and rich in culture and tradition.

Comprised of some 18,000 islands, this South East Asian archipelago’s fascinating human history dates back almost 2 million years to the fossilised remains of Homo erectus/’Java Man’ discovered in the early 1890s, while ancient rock art waits in hidden caves on renowned Misool Island. European arrival saw Portuguese spice traders chasing the fragrant bounty of nutmeg and cloves in the 16th Century, this was followed by Dutch colonisation then Japanese occupation during World War II before Indonesia regained its independence in 1949 (excluding the Dutch territory of West New Guinea).

While still a heavy hitter on the spice trading scene, Indonesia is now attracting attention for having one of the richest concentrations of flora and fauna on the planet. One of the world’s 17 mega diverse countries, Indonesia is home to 2 of the planet’s 25 biodiversity hotspots, 18 of the World Wildlife Fund’s Global 200 ecoregions and 24 of BirdLife International’s Endemic Bird Areas. Its dense forests, jungles, oceans and waterways we will be exploring boast more than 25,000 species of flowering plants (40 per cent of which are endemic), 1,592 bird species (430 of which are endemic and 114 considered extremely threatened), 1,051 reptile and amphibian species, 515 species of mammal and half of the world’s fish species. For botanists, birders and nature lovers alike, this expedition offers numerous opportunities to spot once-in-a-lifetime species and experience rare wildlife encounters on remote and unknown islands.

Indonesia’s extraordinary diversity also extends to its population where more than 300 ethnic groups, many with their own set of customs, cultures and languages, live scattered throughout the archipelago. Our expedition embraces some of these cultures with visits planned to some of these villages. Sublime wildlife, incredible underwater encounters, exceptional birding and thrilling cultural exchanges await on ‘Indonesian Explorer’.
Day 1: Sorong, Indonesia
One of the fastest growing locations in Indonesia, Sorong is the starting point of our expedition. Meet your fellow travellers at a central city location and transfer to the ship. Settle into your cabin and meet your expedition team and captain for a welcome on board.

Day 2: Misool Island
Part of the Sultanate of Tidore during the spice trade wars, Misool Island is the second largest island in the aquatic wonderland that is Raja Ampat (aka Four Kings Islands, named after its four main islands) and our introduction to this stunning marine environment. Discover caves hidden among verandah forests featuring rock art dating back more than 5,000 years, while under its protected waters Dugong, Bumphead Parrotfish, Clownfish, Manta Rays, Ghost Pipefish, Harlequin Shrimp, Pyramid Seahorse and more can be found amongst spectacular coral gardens and sea-cave cemeteries. We aim to explore the labyrinth of caves and passages including the water-filled dome-topped network of Tamoilo Caves and enjoy the extraordinary experience of swimming among thousands of stingless jellyfish.

Day 3: Kofiau Island
Kofiau Island is an ancient slice of isolated continental crust covered in lush rainforest, the least visited among the major islands in Raja Ampat and ours to explore. Activities on offer during the day include snorkelling and exploring the island where we will be on the lookout for endemic birds Kofiau Island Kingfisher and Kofiau Monarch, lime-green Kofiau Green-tree Python and, if lucky, the Red Bird-of-paradise.

Days 4 to 6: Raja Ampat
Lapped by stunning turquoise waters, Raja Ampat’s collection of 1,500 tiny, jungle-cloaked islands are Indonesia’s last developed and easternmost islands. Forming part of the Coral Triangle (one of the most biodiverse marine habitats on the planet), we plan to spend 3 days exploring the bounty of rainbow corals, shoals of fish, ocean-carved limestone formation and jungles of this tropical paradise of forgotten islands. Spotting the Wilson’s Bird-of-paradise and Red Bird-of-paradise will be high on our agenda, with two early morning visits ensuring the best opportunity to see these spectacular birds in their natural habitat. If we are lucky we may also spot the Lesser Bird-of-paradise.

Day 7: Amsterdam Island
Part of the Su Islands (Mios Su) or the Soe Island Group, a cluster of small islands off the northern coast of Western New Guinea, our visit to little-known and explored Amsterdam Island channels the true expedition nature of our voyage providing an opportunity to explore this pristine environment very few have seen.

Day 8: Manokwari and Arfak Mountains
Located at the top of the Bird’s Head Peninsula and surrounded by lush rolling hills and imposing spine of the Arfak Mountains, Manokwari is the capital of West Papua. Here we plan to travel into the Arfak Mountains to the Pegunungan Artak Nature Reserve and enjoy the rare opportunity of exploring the higher elevations and misty tropical montane rainforests with their exceptional suite of endemic plants, animals and birds. During our journey we will be on the lookout for the Western Parotia, Vogelkop Bowerbird and Magnificent Bird-of-paradise among the region’s 320 bird species.

Day 9: Cenderawasih Marine Park
Enjoy an unforgettable day swimming with the iconic Whale Sharks of Cenderawasih Bay. One of the best places in the world to snorkel with these gentle giants, we aim to visit the local fishermen’s Bagans (handmade floating platforms) where these mega-fish, hopeful of catching smaller fish escaping fishermen’s nets, are known to congregate. This spectacular 15,000-square-kilometre marine park is also home to some of the finest coral reef examples in the world and 18 tropical islands where 209 species of fish, 4 species of turtle, dolphin and Blue Whale can be seen.

Day 10: Biak and Supiori Islands
Exploring the seldom-visited remote coasts, white sand beaches and crystalline waters of twin islands Biak and Supiori in the Schouten Islands archipelago off Cenderawasih Bay is our plan for today. Separated by a narrow mangrove-lined channel, the islands boast the highest endemic diversity in Papua including 17 endemic birds. Among the species we may encounter are the Long-tailed Honey-buzzard, Red-capped Flowerpecker, Yellow-bibbed Fruit-dove, Geelvink Imperial-pigeon, Biak Black Flycatcher and Numfor Paradise-kingfisher and Leaf Warbler. A snorkel excursion exploring the abundant marine life and pristine reefs is also planned.

Day 11: Mamberamo River
Flanked by tropical rainforest and at around 800-kilometres long, the biologically-rich Mamberamo River is considered the Amazon of Papua. Snaking through dense, unexplored and unspoiled terrain it sustains a plethora of wildlife including wallabies, tree shrews, crocodiles, frogs, butterflies, endemic birds and hundreds of species of plants, as well as a number of traditional tribes who are largely cut off from the outside world. We plan to Zodian cruise the river’s mouth searching for wildlife and visit local tribal people.

Day 12: Jayapura
The peaceful paradise of Lake Sentani, the glittering freshwater lake reflecting the steep, verdant mountains in the Cyclops Strict Nature Reserve of Papua’s capital Jayapura, is renowned for its famous artifacts, traditional motifs, pottery, woodworking and bark paintings. Taking local buses, we will journey to the seldom visited lake’s edge before enlisting traditional longboats, passing stilt houses, as we navigate its many islands. Experience local culture in the form of dance and artists at work making bark paintings and bride money, visit the small church built at the beginning of the 20th Century and World War II monument to General Douglas MacArthur on Gunung Ilar for breathtaking lake views before returning to the ship for lunch and sailing towards Vanimo and Papua New Guinea.

Day 13: Murik Lakes/ Sepik River, Papua New Guinea
Undoubtedly a highlight on our voyage, we plan to explore by Zodiac the intricate network of lagoons and mangroves surrounding this cluster of salt and freshwater lakes sustaining a myriad of wildlife where the Sepik River (the longest in Papua New Guinea) joins the Bismarck Sea. Used as a staging location for barge traffic by the Japanese during World War II, it is also the location of at least four Allied aircraft that were lost or abandoned between 1943 and 1944. Home to more than 100 villages and inspiring the region’s renowned Sepik art, we expect to enjoy their hospitality and handiwork first hand.

Day 14: Madang
The self appointed ‘Prettiest Town in the South Pacific’, Madang is bound by lush rainforest, calm blue waters studded with volcanic islands, 34-sunken ship dive sites, Tupira’s supreme surf break, flourishing coral gardens and rich history.

For those disembarking, a transfer to a central hotel, or the airport, will conclude your voyage, OR continue the adventure with us on ‘Melanesia Discoverer’.

Enquire for a full itinerary.

* The price listed includes the additional discovery fund local payment of $60 which is payable in US$ cash on board the ship. [All prices are per person in US$].

Price Includes:
Discovery fund (payable on board) pre/post cruise transfers, all on board ship accommodation with meals and all shore excursions and activities. Programme of lectures by noted naturalists.

Price Excludes:
All items of a personal nature, laundry, drinks, gratuities. International/domestic flights, visa, extensions and travel insurance.
Uncover the hidden gems of Papua New Guinea and the Solomon Islands. From the culturally rich arterial of the Sepik River we sail north across the Bismarck Sea to the remote shores of Manus and Mussau Islands. Manus has the lowest density of people in all New Guinea with its people still living a very traditional lifestyle. Next, delve into the history, culture and wildlife of New Ireland and New Britain.

We cross the Buka Channel and at Nissan Island can view reminders of the brief, but intensive, World War II activities during which the islands were recaptured by Kiwi and British forces from the Japanese occupiers. Then enter a long-isolated world as we are among the first travellers to return to Bougainville in more than two decades. Sailing through the turquoise waters of the Solomon Islands, new vistas and unexpected encounters await.

For birders, this itinerary offers once-in-a-lifetime species on remote islands where few have been before. The birding potential is exceptional with many highlights including the Manus Friarbird, Mussau Monarch and the Paradise Drongo. Endemic to the Solomon Islands, we will be on the lookout for the Roviana Rail and Solomon Sea Eagle. Allowing birders to maximise the opportunities available to them, there will be an optional specialised birding programme with customised excursions.

Throughout Melanesia there are spectacular reefs, which are home to masses of fish and coral gardens of every colour. These waters offer some of the greatest marine diversity in the world and everybody will have the opportunity to snorkel and appreciate the beauty beneath the waves. Whether you are snorkelling or swimming, this ocean aquarium is waiting to be explored and discovered.
**Day 1: Madang, Papua New Guinea**

Arrive in the port town of Madang and transfer to the Madang Resort for the first night. This evening meet with your fellow travellers and the expedition team over dinner at the resort.

**Day 2: Madang**

Madang is a thriving community renowned for its traditional arts, world-class diving opportunities and the richness of its surrounding forests. This morning we leave Madang for the highlands close to the township; here the tall forests contain a richly diverse wildlife. We arrive back in Madang with time to explore the colourful markets with your Guides. Optional excursions this morning for bird enthusiasts. Late morning we board the ship, settle into your cabin and join the captain and your expedition team on the bridge as we set sail.

**Day 3: Sepik River**

Sure to be one of the highlights of our expedition. The Sepik River, the longest in Papua New Guinea, is a rich arterial river that has fostered great traditional arts. We plan to explore the river by Zodiac following tributaries and channels in search of local wildlife. We also meet with the villagers and marvel at their artistry.

**Days 4 to 5: Manus Province**

Seldom visited and little known, Manus Island is considered a jewel in the crown of Papua New Guinea. Biologically isolated, the island is home to a high proportion of endemic species including the Superb Pitta which is likely to be one of the birding highlights of the expedition. The waters around Manus offer some of the most spectacular reefs in the region, seldom explored waters promising a myriad of opportunities.

**Day 6: Mussa Island**

Mussa Island represents one of the westernmost extensions of the Lapita culture. Spend time with the local people to learn about their special culture and life on this remote outpost in the Pacific.

**Day 7: Kavieng, New Ireland**

Evidence from Japan’s World War II occupation is prevalent in historic Kavieng. Birders will leave early for the highlands, while the rest of the group will spend the morning exploring the town of Kavieng and its history. Later, snorkel in the crystalline waters of the local reefs.

**Day 8: Rabaul, New Britain**

Six beautifully cone-shaped volcanoes ring Rabaul’s dramatic, flooded caldera harbour. Visit the bubbling hot springs and take in the magnificent views of the harbour and volcanoes from Observatory Ridge.

**Day 9: Nissan Island**

A tropical atoll bathed in rich currents, Nissan Island’s waters abound in marine life. Seldom has anybody had the opportunity to discover this world promising abundant pelagic fish life and pristine coral reefs. Ashore there are still reminders of the brief, but intensive, World War II activities on the island. Meet friendly locals and search the dense woods for some of the elusive birds that live here.

**Day 10: Bougainville Island**

We plan to be among the first expeditioners to re-discover the treasures of Bougainville, long isolated and in a strange way protected by the conflict which swirled around its shores. A pristine island paradise, it is home to some of the greatest biodiversity in the region both above and below the water. We plan to explore the area around Arawa, which offers great opportunities to access the island and its reefs.

**Day 11: Choiseul Island**

Today we arrive in the Solomon Islands on the remote northern coastal of Choiseul Island. This was once the home of the Choiseul Crested Pigeon and, while it no longer walks the forest floor, many other species can still be found here. We Zodiac cruise deep into the mangrove forest towards the Sui River Falls searching for Dugong and crocodiles.

**Day 12: New Georgia Islands**

The volcanic New Georgia Islands are found in the Western Province of the Solomon Islands. Birding enthusiasts will relish landing on Kolombangara Island, where we hope to see the rare Roviana Rail along with other endemic bird species.

**Day 13: Santa Isabel Island**

The Arnavon Islands are north-west of Santa Isabel, an area rich in marine biodiversity and one of the most important rookeries in the western Pacific for the endangered Hawksbill Turtle. The islands also support a high diversity of terrestrial fauna, with 41 species of birds, 6 species of bats, and at least 7 species of terrestrial reptiles. Sensational snorkelling can also be experienced around the islands.

**Day 14: Honiara, Solomon Islands**

Honiara was founded as a military base during World War II and was witness to the Naval Battle of Guadalcanal. Touring Honiara we visit historical sites including Henderson Airfield, war memorials and the open-air war museum, while the birders head to the slopes of rainforest on Mount Austen in search of some of the Solomon Islands’ most spectacular birds including the Solomon Sea Eagle.

For those disembarking, a transfer to either a central city hotel, or to the airport, will conclude your voyage OR join us to discover the ‘Secrets of Melanesia’.

**Enquire for a full Itinerary and/or a Bird and Mammal List.**

Sail into a world that few have ever experienced; idyllic islands and isolated villages where unique time-honoured traditions and elaborately costumed dancers welcome us into their world. Sail from Honiara, the capital of the Solomon Islands, to discover the beauty of the outer Solomon Islands and on to Vanuatu. Relax as our ship glides into secluded bays, and takes us to remote oceanic islands where the art of traditional navigation lives today.

On Santa Isabel, the rhythms of life continue little changed, with daily life centred around the village and family. Malaita is culturally rich, the traditional currency, Malaitan shell money, is still made on the island and is used as a dowry, and worn as a status symbol.

Vanuatu has produced a kaleidoscope of cultures, and more than 100 indigenous languages. With over 80 habitable islands, islanders have closely guarded their own cultures and languages. Our expedition embraces some of these cultures and languages, as well as a window into one the happiest places on the planet.

On our journey you will also have the opportunity to experience some of the greatest underwater encounters in the world, with an abundance of marine life and coral gardens drawing you in to explore a magical underwater world. During frequent snorkel excursions throughout the expedition, everybody will have the opportunity to appreciate the beauty beneath the waves.

For birders, this itinerary offers once-in-a-lifetime species on remote islands where few have been before, and endemic birdlife such as the Solomon Sea Eagle, or the Vanikoro White-eye, may be seen. The birding potential is exceptional, and to allow birders to maximise the opportunities on the expedition there is an optional, specialised birding programme with customised excursions. A picture postcard paradise awaits as we uncover the ‘Secrets of Melanesia’.
Part 1: Honiara, Solomon Islands

Arrive in the port town of Honiara and transfer to the Solomon Kitano Mendana Hotel for the first night. This evening meet with your fellow travellers over dinner at the hotel.

Day 2: Honiara, Solomon Islands

This morning, enjoy a tour of Honiara visiting historical sites including the iconic Japanese and American war memorials. Birdwatchers will head to Mt Austen in search of some of the Solomon Islands’ most spectacular birds, including the Solomon Sea Eagle. Board your ship this afternoon.

Day 3: San Jorge Island and Santa Isabel

One of the largest in the Solomon Islands, most of Isabel remains unexplored and undiscovered. We explore the remote southern shores around Thousand Ships Harbour. Beautiful uninhabited islands dot the waters around the mangrove forests that line the shores, and take a short walk to Malaita’s south coast where the villages live much as they have for millennia. We spend time with the locals, who share with us their traditional song and dance. If we are lucky, the local boys may be surfing on their hand-carved palm wood boards.

Day 4: Malaita

Mountainous Malaita has pristine rivers and unexploited tropical forests. We enter the seldom visited Kwaï Harbour, here the local people choose to live on small artificial islands off the coastline, we are treated to a rapturous welcome on tiny Ngongosa Island where the houses stand shoulder to shoulder. In this one small area, several tribal groups overlap and these differences are readily apparent in dance and language. This afternoon, the beautiful uninhabited Lei Island is the ideal snorkel site.

Day 5: Makira

Makira is the most easterly of the main islands in the Solomon’s archipelago. This morning we anchor in the calm waters of Star Harbour, Join the naturalists for a Zodiac exploration of the abundant mangrove forests that line the shores, and take a short walk to Makira’s south coast where the villagers live much as they have for millennia. We spend time with the locals, who share with us their traditional song and dance. If we are lucky, the local boys may be surfing on their hand-carved palm wood boards.

Day 6: Nendö – Temotu Province

Nendö is the largest of the Santa Cruz Islands and the location of the Spanish navigator Álvaro de Mendaña de Neira’s unsuccessful attempt at establishing a colony in 1595. It is also the home of red feather money, sourced from the Scarlet Honeyeater. Venturing inland, we visit a village where the ancient traditions are still very much alive. Watch the manufacture of red feather money. One of the largest in the Solomon Islands. This afternoon we explore the forest and coral reefs.

Part 2: Vanuatu

Day 7: Vanuatu Lava

This morning we arrive in Vanuatu at the northern outpost of Vanuatu Lava, the largest island in the Banks Islands, crowned by active volcano Mt Séré’a. Visit the administrative centre of Sola or, for a more active option, climb through the waterfalls behind the town for some excellent views over the bay. This afternoon we explore the nearby offshore islands for snorkelling and beachcombing, the surrounding waters home to the recently discovered Vanuatu Petrel.

Day 8: Vanikoro

Today we explore the archipelago of Vanikoro, with its five islands encapsulated by a dramatic barrier reef which offers superb snorkelling. French explorer Jean-François de Galaup, Comte de La Pérouse famously disappeared here after both his vessels, La Boussole and Astrolabe, struck the reef in 1788. On the shore we visit a monument to Le Perouse, erected by fellow explorer Dumont D’Urville in 1827. Join the naturalists on a forest walk in search of the endemic Vanikoro White-eye and Monarch, or marvel at the delicate Vanikoro Orchid. We also have a good chance to see the recently rediscovered Vanikoro Flying Fox.

Day 9: Espiritu Santo

Enjoy a full day on Vanuatu’s largest island. Santo: location of James Michener’s Tales of the South Pacific. Early morning sees the birders ashore in search of many of Vanuatu’s endemic birds. Indulge in a swim in the crystalline waters of Champagne Beach with its famed powdery white sand. This afternoon we enjoy Zodiac cruises to the iconic blue holes of Santo. For those with an interest in the history of the island, there is a visit to Luganville and Million Dollar Point.

Day 10: Espiritu Santo

Join the naturalists for a forest walk in the ‘arena’ where masked dancers emerge from the forest. The forests of Ambrym offer a rapturous welcome on tiny Ngongosa Island where the houses stand shoulder to shoulder. In this one small area, several tribal groups overlap and these differences are readily apparent in dance and language. This afternoon, the beautiful uninhabited Lei Island is the ideal snorkel site.

Day 11: Ambrym

The ship will visit Ambrym, renowned as the island of volcanoes and magic throughout Vanuatu. We plan to head ashore at Ranon on the northern coast where the traditional Rom dance is still practised and custom carvings are alive and well. A short walk through the forest will whet the local birds and plants, accompanied by our naturalists. This afternoon enjoy a final snorkel excursion.

Day 12: Port Vila, Vanuatu

Arrive into Port Vila early morning and disembark. Upon disembarking a transfer to your central hotel or the airport will conclude your voyage.

Enquire for a full itinerary and/or a Bird and Mammal List.

* The price listed includes the additional discovery fund local payment of $600 which is payable in US$ cash on board the ship. (All prices are per person in US$).

Additional Option:

Birding Supplement $ 450 pp

Price Includes:

Discovery fund (payable on board), pre/post cruise transfers, one night hotel accommodation in a twin share room (incl. dinner/breakfast), all on board ship accommodation with meals and all shore excursions and activities excluding optional, specialised birding supplement. Programme of lectures by noted naturalists.

Price Excludes:

All items of a personal nature, laundry, drinks, gratuities, International/domestic flights, visas, extensions, travel insurance and optional birding supplement.
WESTERN PACIFIC ODYSSEY

31 DAY VOYAGE | INCLUDING BONIN ISLANDS!

**Day 1: Tauranga, New Zealand**

Arrive in Tauranga and transfer to the ship. Settle into your cabin and join your expedition team and captain for a welcome on board.

**Day 2: Hauraki Gulf**

Our seabirding starts in the Hauraki Gulf where we will look for the critically endangered New Zealand Storm-petrel as well as the Little Penguin, Grey Ternlet, Buller’s, Fluttering and Little Shearwaters, as well as Grey-faced and Black Petrels.

**Days 3 to 4: At Sea**

En route to Norfolk Island, we have a good chance of finding Gould’s, Black-winged, Kermadec, White-necked and Grey-faced Petrels, plus Wedge-tailed and Short-tailed Shearwaters.

**Day 5: Norfolk Island**

After clearing Australian Customs, we plan to visit Norfolk Island’s remnant forest, home to four endemic species – the Norfolk Island Parakeet, Norfolk Gerygone, Norfolk Robin and Slender-billed White-eye.

**Days 3 to 4: At Sea**

At sea on a northward course, we cross a large underwater seamount, a productive area for seabirds including Tahiti, Collared, White-necked, Providence and Kermadec Petrels.

**Day 6: At Sea**

Arrival into a local village © Heritage Expeditions

**Day 5: Norfolk Island**

After departing Tauranga, we sail for the Hauraki Gulf where there are numerous endemic species, including the recently discovered New Zealand Storm-petrel. From there it’s northward to Norfolk Island. Next stop is New Caledonia where we search for the amazing Kagu and other endemic bird species at Parc Provincial de la Rivière Bleue.

**Day 6: At Sea**

At sea on a northward course, we cross a large underwater seamount, a productive area for seabirds including Tahiti, Collared, White-necked, Providence and Kermadec Petrels.

**Day 7: At Sea**

We then spend six exciting days in the Solomon Islands birding on Nendò, Santa Ana, Makira, Guadalcanal (Mt Austin), Tetepare and Kolombangara, before cruising across the New Britain Trench, an area known to be extremely rich in cetaceans. As we sail along the coasts of Bougainville and New Ireland, we will look for two rarely seen seabirds: Heinroth’s Shearwater and the critically endangered Beck’s Petrel.

**Next stop is Truk Island (Micronesia) for some more intensive birding. We will then set a course for the Bonin Islands south of Japan; our route will take us to Chichi-jima, Torishima Island and Hachijo-jima, where we will look for the last specialties of the expedition.**

**Our voyage will then conclude at Yokohama in Japan. This expedition is accompanied by some of the best pelagic birding guides in the world who have extensive experience of the seabirds of the West Pacific and have visited the islands we will be landing on multiple times.**

**Birding starts at dawn and finishes at sundown. Our guides are there throughout the day to assist you and the ‘reading of the bird list’ each evening is legendary for its detail and discussion.**

**Known in birding circles as the ‘WPO’, this expedition incorporates many key birding areas in the West Pacific. First offered in 2007, it is now considered one of the ‘must-do’ expeditions for any birder because of its opportunities to see some of the rarest pelagic seabirds in the world, plus many island endemics. But it is not just for ‘birders’, as the cetacean list is outstanding. And if you ever tire of birding or cetacean watching, then there are numerous options for snorkelling, swimming and relaxing.**

**After departing Tauranga, we sail for the Hauraki Gulf where there are numerous endemic species, including the recently discovered New Zealand Storm-petrel. From there it’s northward to Norfolk Island. Next stop is New Caledonia where we search for the amazing Kagu and other endemic bird species at Parc Provincial de la Rivière Bleue.**

**Our voyage will then conclude at Yokohama in Japan. This expedition is accompanied by some of the best pelagic birding guides in the world who have extensive experience of the seabirds of the West Pacific and have visited the islands we will be landing on multiple times.**

**Birding starts at dawn and finishes at sundown. Our guides are there throughout the day to assist you and the ‘reading of the bird list’ each evening is legendary for its detail and discussion.**

**Day 1: Tauranga, New Zealand**

Arrive in Tauranga and transfer to the ship. Settle into your cabin and join your expedition team and captain for a welcome on board.

**Day 2: Hauraki Gulf**

Our seabirding starts in the Hauraki Gulf where we will look for the critically endangered New Zealand Storm-petrel as well as the Little Penguin, Grey Ternlet, Buller’s, Fluttering and Little Shearwaters, as well as Grey-faced and Black Petrels.

**Days 3 to 4: At Sea**

En route to Norfolk Island, we have a good chance of finding Gould’s, Black-winged, Kermadec, White-necked and Grey-faced Petrels, plus Wedge-tailed and Short-tailed Shearwaters.
**Day 7: New Caledonia**
We visit the Parc Provincial de la Rivière Bleue where we will search for the unique Kagu, we hope to get good views of this extraordinary bird. Other endemics and localised species that we might see include the New Caledonian Goitori, Imperial-pigeon and White-bellied Goshawk, New Caledonian and Hooded Parakeet, New Caledonian Cuckooshrike, Crow Honeyeaters, Yellow-bellied Robin and Red-throated Parrotfinch.

**Day 8: New Caledonia and At Sea**
This morning on the forested slopes of Mount Koghi we will be looking for New Caledonian Goshawk, South Melanesian Cuckooshrike, Streaked Fantail, Southern Shrikebll, New Caledonian Crow and New Caledonian Grassbird. We then plan to sail around the southern tip of New Caledonia looking for the New Caledonian Storm-petrel. This intriguing bird was first found on the WPO expedition in 2008 and has been seen several times since. Although seemingly closely related to New Zealand Storm-petrel, there are a number of important differences and it is now considered a long-lost species collected in Samoa more than 200 years ago, and not seen since.

**Days 9 to 10: At Sea**
Enjoy leisurely days at sea, new seabirds could include Polynesian Storm-petrel, Tropical Shearwater, Providence Petrel, Vanuatu Petrel, Collared Petrel and Tahiti Petrel.

**Day 11: Nendō – Temotu Province**
The largest of the Santa Cruz Islands, Nendō has several localised endemics, during our time ashore we hope to find Temotu Whistler, Sanford’s White-eye and Santa Cruz White-eye. Other possibilities include Red-bellied Fruit-dove, Pacific Imperial-pigeon and Cardinal Myzomela.

**Day 12: Santa Ana, Solomon Islands**
Santa Ana is one of the most easterly of the main islands in the Solomon Islands archipelago and has a distinctive avifauna. We can expect birds such as Silver-capped Fruit-dove mixed with Makiran endemics, Santa Ana is home to an endemic and highly distinctive subspecies of Rufous Fantail, and we will also be looking for Sanford’s (Solomon) Sea-eagle and Oriole Whistler.

**Day 13: Anuta Island in the Makira Group**
Anuta is a small inshore island on the western side of Makira Island. Birding treasures that we can expect to see including the White-headed Fruit-dove, Chestnut-bellied Imperial-pigeon, Makira Honeyeater (San Cristobal Mellectes), San Cristobal Starling, Makira Flycatcher, Makira Cicadabird, White-collared Monarch, Sooey Myzomela and Mottled Flowerpecker. Other species could include Red-knobbed and Island Imperial-pigeon, Brahminy Kite, Pied Goshawk and Pacific Baza. We will also enjoy the local hospitality.

**Day 14: Honiara, Guadalcanal**
We will anchor off Honiara and depart before dawn for Mount Austin. The birding here is exceptional and the specialties we could see include Ultramarine Kingfisher, Solomons Cuckooshrike, Chestnut-bellied Monarch, Steel-blue Flycatcher, Midget Flowerpecker, Brown-winged Starling and Black-headed Myzomela. There should also be numbers of parrots and pigeons, including the Yellow-bibbed Lory, Ducorps’ Cockatoo and Red-knobbed Imperial-pigeon.

**Day 15: Tetepare Island**
Tetepare is a community run reserve located in the New Georgia islands. There are a number of new Solomon endemics to look for here including the highly localised Dark-eyed White-eye. Other possibilities include Melanesian Scrubfowl, Claret-breasted Fruit-dove, Island Imperial-pigeon, Buff-backed Coucal, Crimson-rumped Myzomela, Cockatoo’s Fantail and Kolombangara Monarch. If we are extremely fortunate, both Nicobar Pigeon and Solomons Nightjar may be seen.

**Day 16: Kolombangara Island**
We intend to head into the hills to visit the Imbu Rano Conservation Area to explore dense upland forest. We hope to see the spectacular Sanford’s (Solomon) Sea-eagle, Cardinal Myzomela, Duchess and Meek’s Lorikeets, White-capped Monarch, Crimson-rumped Myzomela, Ducorps’ Cockatoo and Metallic and Singing Starling. We may also look for the elusive Roviana Rail as we leave the reserve and will be scanning the cetacean-rich seas for whales and dolphins. Birders will also want to keep a lookout for Heinroth’s Shearwater.

**Day 17: Off the coast of Bougainville**
Today we are at sea off Bougainville and hope to see Heinroth’s Shearwater. These waters are also great for cetaceans including Spenn Whale, False Killer Whale and Fraser’s Dolphin.

**Day 18: Off the coast of New Ireland**
Today we cruise along the coast of New Ireland, where our target is the critically endangered and poorly known Beck’s Petrel with an additional chance for spotting the Heinroth’s Shearwater. Cetaceans to look for include Melon-headed Whale, Dwarf and Pygmy Sperm Whales and Orca.

**Days 19 to 20: At Sea**
Crossing the Equator we will be on the lookout for the following species: Bulwer’s Petrel, Tropical Shearwater, White-tailed Tropicbird and the Sooty Tern.

**Days 21 to 22: Caroline Islands**
On Weno Island we hope to find Purple-capped Fruit-dove, Oceanic Flycatcher, Caroline Reed Warbler, Caroline Islands Swiftlet, Caroline Islands White-eye, Micronesian Myzomela and Micronesian Starling. There may also be an optional excursion to Tol South to look for the endemic Teardrop (or Great Truk) White-eye and Chukuk Monarch.

**Days 23 to 26: At Sea**
The birding can be quiet but as we head northwards, new species could include Matsuadara’s Storm-petrel, Bonin Petrel as well as Bannerman’s and Christmas Shearwaters. As we approach the Bonin Islands, we should find a good chance of finding Humpback Whales.

**Day 27: Chichi-jima Island**
After clearing into Japan at the largest of the Bonin Islands, Chichi-jima, we will be looking for Japanese Bush Warbler, Blue Rock Thrush, Brown-eared Bulbul and Japanese White-eye. This afternoon we will look for the critically endangered Bryan’s Shearwater, this species is only known to breed on a small islet off Chichi-jima. We should also see good numbers of Bannerman’s Shearwater.

**Day 28: At Sea**
Seabird possibilities today could include the Tristram’s Storm-petrel, Bonin Petrel and Bannerman’s Shearwater.

**Day 29: Torishima Island**
Landings are not permitted but we cruise offshore and hope to find Sooty Albatross. Other species could include Black-footed and Layson Albatrosses, Streaked Shearwater, Tristram’s and Matsuadara’s Storm-petrels.

**Day 30: Hachijo-jima Island**
Located in the Izu Islands archipelago, Hachijo-jima is home to the endemic tu Thrush, Ijima’s Leaf-warbler and Owston’s Tit. We will also look for Japanese Wood Pigeon, Japanese Pygmy Woodpecker, Japanese (Izu) Robin and Japanese Murrelet.

**Day 31: Yokohama, Japan**
Disembark the ship and transfer to Yokohama railway station.

For a complete species overview, request a Bird and Mammal List and full itinerary.

**Price Includes:**
- Discovery fund (payable on board) pre-cruise transfers, all on board ship accommodation with meals and all expedition shore excursions, transfer from ship to Yokohama railway station.
- All items of a personal nature, laundry, drinks, gratuities, International/domestic flights, visas and travel insurance.
Listen to the names: Snares, Bounty, Antipodes, Auckland, Campbell, Macquarie and Chatham Islands. They are music to the ears of ‘Birders’. Apart from the Chathams, these islands are probably more isolated now than they were when they were discovered in the late 1700s and early 1800s and were regularly visited by sealers, whalers and government steamers searching for castaway sailors. It is relatively simple to get to the Chatham Islands, but opportunities to visit the others are rare. This expedition, one of a number operated each year by Heritage Expeditions, is the only one to include all of these islands.

The islands occupy the tempestuous latitudes of the Roaring Forties and the Furious Fifties, but they are also known as the Albatross Latitudes and with good reason. Ten of the world’s albatross species breed in the region; five of them nowhere else but here! In fact, this zone where the air is never still hosts the most diverse collection of seabirds in the world. More than 40 species breed here – that is at least 11 per cent of the entire world’s seabird population.

With the exception of the Chathams, the islands are all designated UNESCO World Heritage sites and are afforded the highest conservation status and protection by the Australian and New Zealand governments, so passage to their shores is not granted lightly. There are also islands that we visit within the Chatham Islands’ archipelago with similar status and protection.

This expedition has huge appeal to pelagic enthusiasts, penguin fanatics and those interested in island endemics. Though you don’t have to be a keen birder to enjoy this voyage. People interested in islands and island ecology, botany, geology and an increasing number of photographers have enjoyed this trip immensely, as have those interested in the history of Southern Ocean discovery and exploration. This is one of our ‘signature expeditions’ which has operated annually for more than 20 years, so you will benefit from the knowledge and expertise gained over that time.
Day 1: Invercargill
This evening there will be an informal get together at the hotel for dinner, an excellent opportunity to meet fellow adventurers and some of our expedition team.

Day 2: Port of Bluff
Take breakfast at your leisure in the hotel restaurant before exploring the local attractions and transferring to the port of Bluff where we board the ship.

Day 3: The Snares – North East Island
Cruise by Zodiac, if weather and sea conditions are suitable, along the sheltered eastern side of North East Island. We should see the endemic Snares Crested Penguin, Snares Island Tomtit and Fernbirds. We should also see Cape Pigeons, Antarctic Terns, White-fronted Terns and Red-billed Gulls. There are hundreds of thousands of Sooty Shearwaters nesting here and the Buller’s Albatross also breed here from late December onwards.

Day 4: Auckland Islands – Enderby Island
Enderby Island is a great place to view birds and wildlife. We visit Sandy Bay, the main breeding ground for the rare New Zealand (Hooker’s) Sea Lion and just one of three breeding grounds on the Auckland Islands. There are chances to observe the Southern Royal Albatross, Northern Giant Petrel, Auckland Island Shag, Auckland Island Flightless Teal, Auckland Island Banded Dotterel, Auckland Island Tomtit, Bellbird, Pipit, Red-crowned Parakeet, Yellow-eyed Penguin and Light-mantled Sooty Albatross. We will also keep a lookout for the rare Subantarctic Snipe. On Derry Castle Reef there is a good chance of seeing the Bar-tailed Godwit, Turnstone and other migratory waders.

Day 5: Auckland Islands – Carnley Harbour
These islands have witnessed many a shipwreck in days gone by, and harbour tales of castaways and Coastwatchers. If weather and sea conditions are suitable, energetic birders are able to climb to the South West Cape Shy Albatross colony where Gibson’s Wandering Albatross often nest among the tussocks above the colony.

Day 6: At Sea
We can expect some of the best pelagic birding on this leg of the journey from the Auckland Islands to Macquarie Island with great views of species such as the Royal Albatrosses, Wandering Albatrosses, Shy Albatross, Black-browed Albatross, White-chinned Petrel, diving-petrel, Little Shearwaters, storm petrel and, to confuse everybody, numerous prion species.

Days 7 to 8: Macquarie Island
The only place in the world where the regal Royal Penguin breeds, this remote outpost supports a breath-taking concentration of wildlife. You will never forget your first experience of visiting a noisy ‘penguin city’. On your arrival you will be witness to a thousand chattering, feeding chicks; territorial disputes; petty pilfering and courtship displays: King, Gentoo and Rockhopper Penguins can be seen here. We meet with Park Rangers and seek out the thousands of Southern Elephant Seals lolting on the beaches and along the coast, Redpills and Imperial Shag can often be spotted.

Day 7: At Sea
We will be keeping a keen lookout for cetaceans, albatrosses and petrels today, relax in the ship’s bar or catch up on your reading in the library.

Day 8: Campbell Island – Perseverance Harbour
We drop anchor in Perseverance Harbour. Once on shore we walk to the nestling site of the Southern Royal Albatross or to Northwest Bay, passing beautiful megaherbs on the hills. During the day we should see the Campbell Island Shag and Teal, Southern Skua, Antarctic Tern, Dunnock, New Zealand Pipit and, hopefully, the elusive Campbell Island Snipe.

Day 9: At Sea
Join us on the bridge, where we keep a keen lookout for species commonly seen in this area: Black-browed Albatross, Campbell Island Albatross, Light-mantled Sooty Albatross, Salvin’s Albatross, Sooty Shearwater and Little Shearwater. There should be plenty of petrels and, again, the hard to identify prion species.

Day 10: Campbell Island – Perseverance Harbour
We drop anchor in Perseverance Harbour. Once on shore we walk to the nestling site of the Southern Royal Albatross or to Northwest Bay, passing beautiful megaherbs on the hills. During the day we should see the Campbell Island Shag and Teal, Southern Skua, Antarctic Tern, Dunnock, New Zealand Pipit and, hopefully, the elusive Campbell Island Snipe.

Day 11: At Sea
This morning we go ashore on the main island where we might see the endemic Chatham Island Shag and along the coast the Chatham Island Oystercatcher. We visit a private bush reserve on the south coast to see the Chatham Island Warbler, Chatham Island Pigeon and Tu. This afternoon we have another look for the Magenta and Chatham Island Petrels.

Day 12: Campbell Island
Our adventure ends at this historic Otago Harbour. Early this morning we arrive in port and after a final breakfast we say our farewells before disembarking and transferring by complimentary coach to either a central city point or to the airport.

Enquire for a full itinerary and/or a Bird and Mammal List.

Day 13: Bounty Islands
We continue north towards the Chatham Islands, with similar species accompanying us as yesterday. Towards evening, as we approach the islands, we are closer to the Subantarctic and sub tropical convergence and will see a subtle change in the species composition. Late this afternoon we arrive at the spectacular Pyramid Rock, the only breeding site of the Chatham Island Albatross.

Day 14: At Sea and Pyramid Rock
We continue north towards the Chatham Islands, with similar species accompanying us as yesterday. Towards evening, as we approach the islands, we are closer to the Subantarctic and sub tropical convergence and will see a subtle change in the species composition. Late this afternoon we arrive at the spectacular Pyramid Rock, the only breeding site of the Chatham Island Albatross.

Day 15: Chatham Islands – Waitangi
This morning we go ashore on the main island where we might see the endemic Chatham Island Shag and along the coast the Chatham Island Oystercatcher. We visit a
This is without doubt one of the most inspirational and informative journeys or expeditions into the Southern Ocean ecosystem that one can make anywhere in the world. Long recognised for their rich biodiversity, the Subantarctic Islands lying to the south of New Zealand are UNESCO World Heritage sites. This places them in a select group of only 180 natural sites that have been designated as ‘the most important and significant natural habitats’ on the planet. They are also afforded the highest conservation status and protection by the Australian and New Zealand governments and access to these islands is by permit only. On this expedition we offer you the unique chance to explore, photograph and understand these wonderful places in the company of some of the most knowledgeable and passionate guides.

As a young biologist, Heritage Expeditions founder Rodney Russ first visited these islands in 1972 with the New Zealand Wildlife Service. He organised New Zealand’s first commercial expedition there in 1989 and it was only natural that his family should travel with him, what wasn’t predicted was that they would join him in the business and be as passionate about the conservation of this region as he is. Now, many years and over 100 expeditions later, Rodney’s sons Aaron and Nathan continue their father’s enthusiasm and legacy for this region with Heritage Expeditions. As the original concessionaire we enjoy good relationships with the conservation departments and some of the access permits we hold are unique to these expeditions.

The name we have given to this voyage ‘Galapagos of the Southern Ocean’ reflects the astounding natural biodiversity and the importance of these islands as a wildlife refuge. (The book Galapagos of the Antarctic written by Rodney Russ and Aleks Terauds and published by Heritage Expeditions describes all of these islands in great detail.) The islands all lie in the cool temperate zone with a unique climate and are home to a vast array of wildlife including albatross, penguins, petrels, prions, shearwaters and marine mammals like sea lions, fur seals and elephant seals. The flora is equally fascinating; the majority of it being like the birds and endemic to these islands.

This renowned expedition includes four of the Subantarctic Islands, The Snares, Auckland, Macquarie and Campbell. Each one is different, and each one is unique – just like this expedition.
Day 1: Invercargill
Meet your fellow voyagers and expedition staff for an informal get-together over dinner at the hotel, where you will stay overnight.

Day 2: Port of Bluff
We transfer you to the Port of Bluff where the expedition team welcome you on board the ship and, as you settle into your cabin, our adventure begins.

Day 3: The Snares – North East Island
North East Island is the largest of The Snares and staggering, this one island is claimed by some to be home to more nesting seabirds than all of the British isles together. Zodiac cruising the rugged coastline we learn how the islands got their name and encounter Snares Crested Penguins, Cape Petrel and Bulier’s Albatross on the imposing cliffs. We are also likely to encounter Antarctic Tern, White-fronted Tern, Red-billed Gull, Tommits and Fenzibs.

Day 4: Auckland Islands – Enderby Island
Named for the same distinguished shipping family as our own vessel and one of the most beautiful islands in the group, this is a great birding location and a chance to see everything from the famous Southern Royal Albatross and Northern Giant Petrel to parakeets, Bellbirds and the endemic shag, teal and snipe. Sandy Bay is one of three breeding grounds on the Auckland Islands for the rare Hooker’s, or New Zealand, Sea Lion.

Day 5: Auckland Islands – Carnley Harbour
These islands have witnessed many a shipwreck in days gone by. Loaded in human history, they harbour tales of castaways, bullion and Coastwatchers through to today’s scientific visitors. Today we land in Carnley Harbour and, if weather and sea conditions permit, visit the Shy Mollymawk colony at South West Cape or, if weather is not suitable, we will select one of a number of other sites available to us.

Day 6: At Sea
As we make our way through an area of the Funeral Fitties in the tumultuous Southern Ocean, we will learn more about the flora and fauna as we prepare for our Southern Ocean, we will learn more about the flora and fauna as we prepare for our Southern Ocean, we will learn more about the flora and fauna as we prepare for our Southern Ocean, we will learn more about the flora and fauna as we prepare for our Southern Ocean, we will learn more about the flora and fauna as we prepare for our Southern Ocean, we will learn more about the flora and fauna as we prepare for our Southern Ocean, we will learn more about the flora and fauna as we prepare for our Southern Ocean, we will learn more about the flora and fauna as we prepare for our Southern Ocean, we will learn more about the flora and fauna as we prepare for our Southern Ocean, we will learn more about the flora and fauna as we prepare for our Southern Ocean, we will learn more about the flora and fauna as we prepare for our Southern Ocean.

Day 7 to 8: Macquarie Island
Described by one Australian explorer as “One of the wonder spots of the world” this is the only place in the world where the beautiful Royal Penguin breeds. Three other species of penguins, the King, Gentoo and Rockhopper also breed here. You will never forget your first experience of a noisy ‘penguin city’, where the dapper inhabitants show no fear of their strange visitors and where you will be immersed in a tumult of chattering, feeding chicks; territorial disputes; petty pilfering and courtship displays. This all happens amongst the hundreds of Southern Elephant Seals lolling on the beaches and dunes. On arrival we meet with scientists and Park Rangers based here who will accompany us on all our landings.

Day 9: At Sea
We head north from Macquarie Island through waters rich in seabirds towards Campbell Island. We invite you to join the captain on the bridge, to keep a keen lookout for birds and for whales. Today there will also be briefings and lectures on Campbell Island in preparation for our visit there.

Day 10 to 11: Campbell Island – Perseverance Harbour
We spend two days exploring the island by foot taking in the panorama of rocky islets and sea stacks; once the lonely preserve of settlers and seal hunters and now returned to nature. Enjoy an easy walk to the nesting site of the Southern Royal Albatross at Col Lyall or walk across the hills to Northwest Bay and see the strange and beautiful megaherbs growing on the hills. These huge pink and yellow wild flowers have adapted well to the harsh conditions. We also seek out other wildlife such as Campbell Island Shags, Light-mantled Sooty Albatross and, on the beaches beyond, young male sea lions testing their strength.

Day 12: At Sea
At sea en route to the Port of Bluff, take the opportunity to relax and reflect on an amazing experience. We will recap the highlights of our expedition and enjoy a farewell dinner tonight as we complete the last few miles of our journey.

Day 13: Invercargill
We arrive at the Port of Bluff early in the morning. After breakfast, customs formalities and a last minute opportunity to bid farewell to your expedition team, you disembark and board our complimentary coach transfer to downtown Invercargill or Invercargill Airport.

Enquire for a full Itinerary and/or a Bird and Mammal List.

30 November – 12 December 2020
VOYAGE #SOE2062
(STARTS IN DUNEDIN, CONTACT US FOR ALTERNATE ITINERARY)
11 – 23 December 2020
VOYAGE #SOE2064

Prices:
#2062 #2064
Heritage Suite $11,400 pp* $11,000 pp*
Mini Suite $10,700 pp* $10,400 pp*

Superior $ 9,600 pp* $ 9,300 pp*
Main Deck $ 9,100 pp* $ 8,950 pp*
Main Deck Triple $ 8,550 pp* $ 8,300 pp*

* The price listed includes the additional landing fees of $800. (All prices are per person in US$).

Price Includes:
Landing fees, pre/post cruise transfers, one night hotel accommodation in a twin share room (incl. dinner/breakfast), all on board ship accommodation, meals and all expedition shore excursions.

Price Excludes:
All items of a personal nature, laundry, drinks, gratuities, International/domestic flights, visas and travel insurance.
You won’t find them mentioned in a travel brochure on your high street; you won’t find them in most guidebooks, you probably don’t know anyone that has ever been there and they don’t even appear on some maps of New Zealand’s South Pacific – these are the ‘forgotten islands’. Despite their low profile, they are among the most remarkable wildlife reserves in the Southern Ocean, designated UNESCO World Heritage sites and afforded the highest protection of any nature reserves in New Zealand. Remote, uninhabited and on no regular shipping route, access is further restricted by a strict Management Plan which limits the number of people allowed ashore each year.

Departing the Port of Bluff, Invercargill, the first of these islands we visit are The Snares. No landings are permitted because the islands are honey-combed with seabird burrows. Of particular interest are the Snares Crested Penguin, Snares Island Tomtit and Fernbird – all of which are endemic. We should see them all as we enjoy the dramatic coastline and tree daisy forest from our Zodiac cruise.

In the Auckland Islands, the largest of the island groups, we will have the chance to spend the day ashore on Enderby Island, arguably the most amazing Subantarctic Island. Here you can hike through the windswept Rata forests, and along the exposed coastal cliffs. The wildlife is never far away and its lack of fear means close encounters, great for photography and observations. In Carnley Harbour in the south of the Auckland Islands there are a number of fascinating sites, including a Shy Albatross colony, abandoned Coastwatcher’s huts, a shipwreck and castaway depots that we can visit. The weather will dictate what we do.

Campbell Island, the southernmost island of this expedition, is an example of what can be achieved in restoring islands. In recent years sheep, cattle, cats and rats have all been eliminated and the island is rapidly recovering. The great English botanist Sir Joseph Hooker, a friend of Charles Darwin, visited Campbell Island in the 1840s and described the flowering fields of ‘megaherbs’ to be “second to none outside of the tropics”. We can say the same now, because of the removal of these introduced animals. This island is also the home of the majestic Southern Royal Albatross, the endemic Campbell Island Flightless Teal and Snipe.

These islands represent a priceless ecosystem. Joining this expedition redefines natural history travel and will leave you wishing you could have spent more time there.
Day 1: Invercargill
Meet at an Invercargill central city hotel and be transferred to the Port of Bluff for embarkation. The captain and expedition team will be waiting for your arrival on the ship. Familiarise yourself on board and then join the captain on the bridge, or fellow travellers on deck, as we set sail and our adventure begins.

Day 2: The Snares – North East Island
The largest of this group of islands is North East Island, a nature reserve of international importance and home to more nesting seabirds than all of the British Isles put together. A group of islands that have had no introduced mammals, they are a pristine haven for wildlife. Snagged with hidden reefs we learn how the islands got their name. We will cruise the jagged coastline by Zodiac allowing us to see some of the features of the island. From the water we can view the unique large tree daisies Olearia lyallii and Brachyglottis stewartiae which dominate much of the island, creating a forest canopy and draping the hills. Our cruise should also allow us to encounter some of the birdlife that inhabits these islands, including the endemic Snares Crested Penguin. We may also catch glimpses of the Snares Island Tomtit and Fernbird which are unique to these islands. On the cliffs we will likely see Buller’s Albatross whose Maori name translates as ‘flying wind’ which could be an apt description of The Snares. This species only nests here and at the Solander Islands.

Day 3: Auckland Islands – Enderby Island
Enderby Island is a wildlife rich island that has no equal in the Southern Ocean. Offering a varying landscape where the Rata forests are regenerating and there is a resurgence of herbaceous plants, it is one of the most beautiful islands in this group. The island is home to the Hooker’s, or New Zealand, Sea Lion which breeds on Campbell Island is known for its megaherbs whose languorous names promise the exotic: the Bulbinella rossii, the regenerating patches of Anisotome latifolia and the vivid red and white gentians, make an unforgettable sight. Native birds such as the Tuī, Bellbird and parakeets benefit from the presence of Rata trees and can be heard in the forest.

We will walk to enjoy close encounters with the Royal Albatross nested amongst a hummocked sward of Oreobolus pectinatus and regenerating tussock. There is a good chance that we will see the endemic snipe, shag and Auckland Island Flightless Teal as we walk around the island. We plan to spend some time with the Yellow-eyed Penguin, the world’s rarest penguin and the fourth largest of the world’s penguins. Unique fields of megaherbs, whose languorous names promise the exotic: the Bulbinella rossii, the regenerating patches of Anisotome latifolia and the vivid red and white gentians, make an unforgettable sight. Native birds such as the Tuī, Bellbird and parakeets benefit from the presence of Rata trees and can be heard in the forest.

We will cruise along and be transferred to the Port of Invercargill as we begin our journey to the Subantarctic Islands.

Day 4: Auckland Islands – Carnley Harbour
Auckland Island is the largest of the islands in the group. The western coastline has been sculpted into formidable cliffs by the prevailing westerly winds, and to the east, the coast has been carved by glaciers into some of the most picturesque fiords in the world. Our anchorage in Carnley Harbour in the south of the group offers a range of activities, depending on weather and sea conditions. We could go in search of a Sny Mollymawk Albatross colony and perhaps spot the beautiful Wandering Albatross spreading its huge wingspan above the cliffs. Other possibilities include visiting the abandoned World War II Coastwatcher’s station or the remains of a ship wrecked in 1864 and made famous by two books written by the survivors.

Days 5 to 6: Campbell Island
Explore the island by foot and take in the panorama of rocky islets and sea stacks, once the lonely preserve of settlers and seal hunters is now returned to nature. Campbell Island is known for its megaherbs – herbaceous, perennial wild flowers characterised by their great size, with huge leaves and very colourful flowers, which have developed as an adaptation to the harsh weather conditions on the islands. Our visit should coincide with the flowering of the Pleurophyllum speciosum, an endemic daisy carpeting the hills and starting in size with leaves sometimes half a metre wide. Adapting unusually to survive the harsh climate, its nearest relatives can be found in the Canary Islands. There will be a range of walks offered. You can explore an abandoned Meteorological Station at the head of the harbour or take the Col Lyall Saddle walk which offers an opportunity to view and photograph the Southern Royal Albatross nesting amongst the flowers and tussocks. Alternatively, walk to remote Northwest Bay across the tussock tops and megaherb fields to an isolated coastline that Southern Elephant Seals haul out on and New Zealand Sea Lions and Yellow-eyed Penguins call home. Or, climb the beautifully-named Mt Honey which offers dramatic views from its summit.

Day 7: At Sea
A day at sea provides a great opportunity to reflect on the voyage and the Subantarctic Islands that we have visited. Today spend time on deck and view pelagic bird species that come close. We may also see cetaceans such as the Dusky Dolphin which sometimes surf the bow waves of the ship and, if sea conditions are good, a number of different whale species are a possibility. The day is interspersed with illustrated lectures of the biology and history of the area we have visited and the Southern Ocean.

Day 8: Invercargill
On arrival at the Port of Bluff this morning, we have our final breakfast and say our farewells before disembarking and taking a complimentary coach transfer to either a central city point in historic Invercargill or to the airport.

Enquire for a full itinerary and/or a Bird and Mammal List.

23 – 30 December 2020
VOYAGE #SOE2066

Prices:

| Heritage Suite | $ 6,900 pp* |
| Mini Suite     | $ 6,400 pp* |
| Superior Plus  | $ 6,000 pp* |
| Superior       | $ 6,600 pp* |
| Main Deck      | $ 5,400 pp* |
| Main Deck Triple | $ 5,000 pp* |

* The price listed includes the additional landing fees of $400. (All prices are per person in US$).

Price Includes:
- Landing fees, pre/post cruise transfers, all on board ship accommodation, meals and all expedition shore excursions.

Price Excludes:
- All items of a personal nature, laundry, drinks, gratuities, international/domestic flights, visas and travel insurance.

CHATHAM ISLANDS – A LAND APART

10 DAY VOYAGE | INCLUDING THE ANTIPODES AND BOUNTY ISLANDS

Discover amazing endemic wildlife, meet the locals and experience conservation in action as we journey through the incredibly-diverse archipelagos of the Chatham, Antipodes and Bounty Islands.

Their first inhabitants, the Moriori, called them ‘Rekhou’ (misty skies), the Europeans who rediscovered them in 1791 named them the Chatham Islands after their ship, while Maori, who didn’t settle the islands until 1835, called them ‘Wharekauri’. Today, most New Zealanders know them as the last place mentioned in their daily weather forecast, but some might also know them as the home of the endangered Black Robin.

The Chatham archipelago (made up of at least 12 islands, plus numerous islets) lies 870 kilometres east of New Zealand and runs 45 minutes ahead of the rest of the country. The history of these islands and their rich natural history is unique, and it is only recently that these precious islands have begun to be understood and appreciated. Several books, including Rodney Russ’ Galapagos of the Antarctic – Wild Islands to the South of New Zealand capture some of their beauty and mystique, but it is only by visiting these remarkable islands that one can truly appreciate what they have to offer. During explorations around the archipelago we will hear remarkable stories of rediscovery and population recovery with the Black Robin and its rescue from the brink of extinction, and the once thought to be extinct Chatham Island Taiko (Magenta Petrel). The ongoing careful management of these critically endangered species serve as beacons of hope and inspiration for conservationists everywhere. Heritage Expeditions has an excellent track record of sighting a number of Chatham Island Taiko during its voyages to the Chatham archipelago and we hope to continue this good fortune during this expedition.

Visiting the Chatham Islands is not difficult, but this expedition is unique and rare, as it includes the seldom visited (and almost impossible to get to) outlying islands. Our journey is also guided by a team of Chatham Island experts whose knowledge will add another dimension to your experience.

This expedition also includes designated UNESCO World Heritage sites The Antipodes and Bounty Islands, which are afforded the highest conservation status and protection by the New Zealand Government (there are also islands that we visit within the Chatham Islands’ archipelago with similar status and protection). While no landings are possible at these remote outcrops, islets and stacks, we plan to Zodiac cruise their shorelines if weather conditions are favourable.
Day 1: Invercargill
Make your way to the Ascot Park Hotel for transfer to the ship. Settle into your cabin and join the captain on the bridge or fellow travellers on deck, as we set sail for the Antipodes Islands.

Day 2: At Sea
Pelagic species commonly seen include Wandering Albatross, Southern Royal Albatross, Black-browed Albatross, Campbell Island Albatross, Light-mantled Sooty Albatross, Salvin’s Albatross, Grey-headed Albatross, Northern and Southern Giant Petrel, and the Sooty Shearwater and Little Shearwater. This is one of the few places where Fairy Prion, Fulmar Prion and Antarctic Prion occur together; while other species include Soft-plumaged Petrel, Mottled Petrel, White-headed Petrel, Grey-faced Petrel, White-chinned Petrel, Grey-backed Storm-petrel, Wilson’s Storm-petrel, Black-bellied Storm-petrel and the Common Diving-petrel.

Day 3: Antipodes Islands
The most isolated and perhaps least known of New Zealand’s Subantarctic Islands, Antipodes Island has benefited from one of the world’s most successful island eradications. Dubbed the ‘Million Dollar Mouse’, it saw the island declared ‘mouse free’ in 2018. The island’s unique plants and wildlife now thrive following the removal of some 200,000 mice. Landings are not permitted, so if sea conditions are suitable we plan to Zodiac cruise along the coastline looking for the Antipodes Parakeet, the largest of New Zealand’s parakeets, which has an entirely green head, the Reischek’s Parakeet, a subspecies of the Red-crowned Parakeet found in the Auckland Islands and on the Chatham Islands, as well as the Antipodes subspecies of the New Zealand Pipit. We can also expect to see Erect-crested and Rockhopper Penguins, Antarctic Terns and Kelp Gulls.

Day 4: Bounty Islands
These inhospitable granite knobs, tips of the submerged Bounty Platform, are home to thousands of Salvin’s Albatross, Erect-crested Penguins, Fulmar Prions and the endemic Bounty Island Shag – the world’s rarest – along with New Zealand Fur Seals. At sea there should be opportunities to see Wandering Albatross, Northern Royal Albatross, Mottled Petrel, Soft-plumaged Petrel, Broad-billed Prion, White-chinned Petrel and Black-bellied Storm-petrel as well as Wilson’s Storm-petrel. Other possibilities include White-capped Albatross, Northern Giant Petrel, Cape Petrel, Antarctic Fulmar, Sooty Shearwater, Little Shearwater and Grey-backed Storm-petrel.

Days 5 to 8: Chatham Islands
Pelagic birding opportunities as we approach the Chatham Islands include the Chatham Island Petrel and, in the past, we have observed the very rare Chatham Island Taiko (Magenta Petrel), one of New Zealand’s most endangered species. Consisting of one large island and numerous smaller islands and rocky islets, only two islands of the Chatham Islands’ archipelago are inhabited. Working closely with the Chatham Island people our visit could include:

Chatham Island
The main settlement of Waitangi features a wharf normally bustling with activity where we may see the endemic Chatham Island Shag. Visiting a private reserve in Awatotara Valley there is a good chance to see the endemic Chatham Island Pigeon (once close to extinction), Chatham Island Warbler and Tui.

During our time on the main island our activities may include:

• Visiting small fishing village Owenga and searching for fossilised sharks’ teeth at Blind Jim’s Creek.
• Discovering the rich history of Maunganui’s old stone cottages and seeing the dendroglyphs (tree carvings) at the JM Barker (Hapupu) National Historic Reserve.
• Viewing the island’s two endemic shags (cormorants) at Matarakaum and endemic plants, including the famed Chatham Island Forget-me-not, at Kaingaroa.
• A visit to the uniquely designed Kōpinga Marae, built as a tribute to the Moriori ancestors.

Mangere and Little Mangere Islands
Mangere Island is one of only two sites in the world where Black Robin are found. We will hear how this endemic species was rescued from the brink of extinction in the 1970s from a population of just six birds. As we Zodiac cruise the islands we will be looking for the rare, endemic Forbes’ Parakeet or Chatham Parakeet at Mangere Island.

Pitt Island
The jewel in the Chatham Islands’ crown, our visit may include Flowerpot or Glory Bay where we will hear stories of life on the island and looking for impressively horned New Zealand Pitt Island Sheep.

Pyramid Rock
Viewing the basalt outcrop of Pyramid Rock – the only breeding place of the Chatham Island Albatross – where great views of birds can be had.

The Ross Sea region of Antarctica is one of the most remote places on Planet Earth and one of the most fascinating places in the continent’s human history. With shipping restricted by impenetrable pack ice to just two brief months each austral summer, few people have ever visited this strange and beautiful territory, with opportunities for non-scientific personnel limited to a handful of tourist expedition ships. Heritage Expeditions offers such a voyage on its own fully equipped and ice-strengthened ships, crewed by some of the most experienced officers and sailors in the world and staffed by a passionate and knowledgeable expedition team. This is a unique opportunity to experience nature on a scale so grand there are no words to describe it.

The Ross Sea takes its name from Sir James Clark Ross who discovered it in 1841. The British Royal Geographical Society chose the Ross Sea for the now famous British National Antarctic Expedition in 1901-04 led by Robert Falcon Scott. That one expedition spawned what is sometimes referred to as the ‘Race to the Pole’. Ernest Shackleton almost succeeded in 1907-09 and the Japanese explorer Nobu Shirase tried in 1910-12. Scott thought it was his, but was beaten by his rival, Norwegian Roald Amundsen in the summer of 1911. Shackleton’s Trans-Antarctic expedition in 1914-17 marked the end of this ‘heroic’ or ‘golden age’ of exploration, but many of the relics of this era, including some huts, remain. The dramatic landscape described by these early explorers is unchanged. Mt Erebus, Mt Discovery and the Transantarctic Mountains are as inspiring today as they were 100 years ago. The penguin rookeries described by the early biologists fluctuate in numbers from year to year, but they still occupy the same sites. The seals, which are no longer hunted for food, lie around on ice floes seemingly unperturbed. The whales, which were hunted so ruthlessly here in the 1920s, are slowly coming back, but it is a long way back from the edge of extinction, and some species have done better than others. Snow Petrels, Wilson’s Storm-Petrels, Antarctic Prions and South Polar Skuas all breed in this seemingly inhospitable environment.

There is so much to do and so much to see here, from exploring historic huts and sites to visiting penguin rookeries, marvelling at the glacial ice tongues and ice shelves, and understanding the icebergs and sea ice. Then there are all the seabirds, seals and whales to observe and photograph, modern scientific bases and field camps to visit and simply the opportunity to spend time drinking in the marvellous landscape that has always enthralled visitors.

Lying like stepping stones to the Antarctic continent are the little known Subantarctic Islands. Our journey also includes The Snares, Auckland, Macquarie and Campbell Islands. They break our long journey but, more importantly, they help prepare us for what lies ahead, for these islands are part of the amazing and dynamic Southern Ocean ecosystem of which Antarctica is at the very heart. It is the powerhouse which drives this ecosystem upon which the world depends.
Day 1: Invercargill
Arrive at Invercargill, New Zealand’s southern most city and rich in Scottish history. Grab your last-minute luxuries before meeting your fellow expeditioners for an informal get-together over dinner.

Day 2: Port of Bluff
Enjoy breakfast at the hotel and exploring the local attractions before transferring to the Port of Bluff, where you will board the ship. Settle into your cabin and join your expedition team and the captain for a welcome on board.

Day 3: The Snares – North East Island
Staggeringly, The Snares are home to more nesting seabirds than all of the British Isles put together. Zodiac cruising the coast we learn how the islands got their name and in the sheltered bays we should see the endemic Snares Crested Penguin, the Cape Petrel and Buller’s Albatross nesting on the imposing cliffs.

Days 4 to 5: Auckland Islands
Characterised by towering cliffs and rugged sea stacks, these islands have borne witness to many a shipwreck in days gone by. We spend the day ashore on Enderby Island which is, perhaps, the most beautiful of all the Subantarctic Islands. Here we find parakeets flitting above carpets of red, white and yellow wild flowers and on the beaches beyond, the rare Hooker’s, or New Zealand, Sea Lion. We land in Carnley Harbour and if conditions are suitable, climb to a Shy Albatross colony, otherwise we will explore sites within the harbour.

Day 6: At Sea
Take the chance to learn more about the biology and history of these islands and the tempestuous Southern Ocean through informal lectures with our experts. This particular stretch of ocean is very productive and we can expect many seabirds, including five or six kinds of albatross and numerous species of petrel.

Days 7 to 8: Macquarie Island
This remote, rocky outpost which endures roasting westerly winds supports one of the highest concentrations of wildlife in the Southern Hemisphere. Four species of penguin: King, Royal, Rockhopper and Gentoo all breed here. You will never forget your first experience in a ceaselessly active ‘penguin city’, where the dapper inhabitants show no fear of their strange visitors. We will also meet with the Park Rangers, visit the Australian Antarctic Base and observe the hundreds of Southern Elephant Seals along the beaches.

Days 9 to 12: At Sea
Soaring albatross and petrels circle the vessel as we steam south through the Southern Ocean. Lectures now concentrate on the Ross Sea region and beyond the bow of the ship; drifting icebergs of extraordinary shapes begin to appear. Manoeuvring in close for your first ice photographs we pass the Antarctic Circle and into the continent’s realm of 24-hour daylight.

Days 13 to 22: Antarctica’s Ross Sea Region
With unpredictable ice and weather conditions, a day-by-day itinerary is not possible, but we assess the conditions daily and take every opportunity to make landings and launch the Zodiacs. You can anticipate wildlife viewing, visits to scientific bases and historic sites, as well as the spectacular white and blue scenery.

We hope to visit the following areas:

Cape Adare:
A large flat spit of land, teeming with the staggering sight of Antarctica’s largest Adélie Penguin rookery; a tumult of chattering, feeding chicks, territorial disputes, petty pilfering and courtship displays. Curious penguins often come very close, offering superb photographic opportunities. Among the shifting mass of penguins we will find Carsten Borchgrevink’s Hut, the oldest in Antarctica, an overwintering shelter for the first expedition to the continent in 1899.

Cape Hallett:
The enormous Admiralty Range heralds our arrival; wild and extraordinary, the mountains rear up towering out of the sea to over 4,000-metres high and are bounded by colossal glaciers. We make our landing at an abandoned base site, now home to large numbers of Adélie Penguins and Weddell Seals.

Franklin Island:
Desolately beautiful and rugged, this is home to a large Adélie Penguin population and other nesting seabirds. We attempt a landing and explore the coastline.

Possession Islands:
Rarely-visited, small and rugged, these rocks support tens of thousands of penguins. Observe the birds’ busy and humorous activity, with the Admiralty Mountains forming a superb backdrop across the water.

Ross Ice Shelf:
The world’s largest body of floating ice and a natural barrier, at times creating hazardous weather, with sheets of snow passing beneath the ship.

Bird interaction © J Mishina
Historic site, McMurdo Sound © A Breniere
blown at gale force by winds off the polar ice cap. Just 800 miles from the South Pole, this daunting spectacle prevented many early explorers from venturing further south. We cruise along its dizzying 30-metre high ice cliffs, perhaps lucky enough to see icebergs ‘calving’.

**Ross Island:**
Mount Erebus/Cape Bird/Shackleton’s Hut/Scott’s Hut(s) and visits to a scientific field station (Scott and McMurdo Stations are high on our wish list but ice, weather and station operational requirements often make them inaccessible). Ross Island was, and is, the ‘hub of activity’ in the Ross Sea, dominated by Mt Erebus, a monstrous active volcano named after the ancient Greek God of Darkness. The carefully preserved huts of the ‘Heroic Era’ help make the history come alive. If we can reach the bases, we will get a modern perspective on Antarctic Research.

**Terra Nova Bay:**
An Italian research station where the scientists are always hospitable and enjoy showing us around their lonely but beautiful home. They share with us their scientific research and also, perhaps, the best ‘cafe espresso’ in Antarctica!

**Days 23 to 26: At Sea**
Taking time to rest and enjoy life on board the ship in the bar or library after the excitement and long daylight hours of the Antarctic, we have time for lectures on our final destination and for some pelagic bird spotting.

**Days 27 to 28: Campbell Island – Perseverance Harbour**
We drop anchor in Perseverance Harbour, an occasional refuge for Southern Right Whales who come here to calve. Walk to the nesting site of the Southern Royal Albatross and see the strange and beautiful megaherbs growing on the hills. These huge wild flowers that have adapted to the harsh conditions have unusual colourings and weirdly-shaped leaves. We also seek out other wildlife such as Campbell Island Shags, Light-mantled Sooty Albatross and sea lions.

**Day 29: At Sea**
Relax and reflect on a remarkable journey as you join our experts for a recap of highlights and enjoy a farewell dinner this evening.

**Day 30: Invercargill**
We disembark in the Port of Bluff and this adventure ends as we disperse to begin others. After fond farewells we transfer you to a central city point or to the airport.

Enquire for a full itinerary and/or a Bird and Mammal List.

IN THE WAKE OF MAWSON

26 DAY | COMMONWEALTH BAY, EAST ANTARCTICA VOYAGE

Voyage to one of the least visited coastlines in the world and discover why East Antarctica held such a fascination for pioneering Antarctic explorer Sir Douglas Mawson. A passionate scientist, explorer and academic, Mawson spent his life devoted to exploring and studying Antarctica. His 1911-1914 Australasian Antarctic Expedition (AAE) and joint 1929-1931 British, Australian and New Zealand Antarctic Research Expedition (BANZARE) mapped and explored the coastal area of Antarctica, defining Australia’s claim over the icy continent.

Our journey takes us from Hobart via Australia’s icy outback Macquarie Island, where we are introduced to four different species of penguin at this UNESCO World Heritage Site before sailing to Antarctica. Crossing the Antarctic Circle, where the sun stays above the horizon, we move closer to Mawson’s Antarctica. Pelagic birdlife wheels overhead on our journey south as we navigate astounding ice formations and marvel at Mertz Glacier’s ice tongue. Highlights of our voyage in this region will include exploring and retracing history at Cape Denison, the location of Mawson’s Hut, where we plan to visit the far eastern sector of the Australian Antarctic Territory.

Zodiac cruising along the ice edge and among passing floes, we should encounter Adelie Penguins and, if we are lucky, Emperor Penguins. Cetaceans on previous expeditions have included Fin, Minke, Blue and Humpback Whales; Orca also can be seen in this region. Birds we might encounter include Snow Petrels, Antarctic Petrels, Giant Petrels, Wilson’s Storm Petrel, Cape Petrels and Antarctic Fulmar, whilst Crabeater, Weddell and Leopard Seals may be resting along the ice edge. With long daylight hours and magnificent landscapes the photographic opportunities are endless in this land of snow and ice. We also plan to visit the region Terre Adelie which has a coastline of roughly 300 kilometres and comprises the French sector where the French station Dumont D’Urville is located, and close by, Port Martin.

Day 1: Hobart
Arrive in Hobart, meet fellow adventurers and some of our expedition team this evening during a private tour and reception at the Mawson’s Huts replica, and stay over night in a local hotel.

Day 2: Port of Hobart
Enjoy breakfast and exploring Hobart. After completing security formalities embark the ship and be welcomed on board by the Captain and expedition team. Settle into your cabin and familiarise yourself with the ship before joining the Captain in the bridge as we set sail.

Days 3 to 5: At Sea
Preparing for our arrival at Macquarie Island, there are great birding opportunities which may include the Wandering Albatross, Royal Albatross, Black-browed Albatross, Light-mantled Sooty Albatross, Salvin’s Albatross, Grey-headed Albatross, Northern and Southern Giant Petrel, Sooty Shearwater and Little Shearwater, Fairy Prion, Fulmar Prion and Antarctic Prion.

Days 6 to 7: Macquarie Island
This UNESCO World Heritage Site, and Australia’s jewel in the Southern Ocean, has a history firmly linked to Mawson’s endeavours. This enduring windy, rocky outpost supports one of the highest concentrations of wildlife in the Southern Hemisphere. Millions of penguins...
breed here with four different species: King, Rockhopper, Gentoo and the endemic Royal Albatross and island home. You will never forget your first experience of Sandy Bay’s perpetually active penguin metropolis, while the King Penguin rookery at Lusitania Bay is noisy and spectacular with a quarter of a million King Penguins standing at attention on shore. Large groups of Southern Elephant Seals slumber on the beaches and in the tussock, there are three species of fur seals and four species of albatross, Wandering, Black-browed, Grey-headed and Light-mantled Sooty.

Days 8 to 10: At Sea
Soaring albatross and petrels circle the vessel as we steam southward through the Southern Ocean. Lectures concentrate on Antarctica and drifting icebergs of extraordinary shapes and colour begin to appear as we pass the Antarctic Circle and into the continent’s realm of 24-hour daylight.

Days 11 to 16: East Antarctica
Exploring the historic and isolated coastline of Commonwealth Bay, where few have ventured before, our expedition also carries the same thrill of the unknown as we traverse the frozen coastline following in the wake of great adventurers. We hope to visit the following areas:

Commonwealth Bay
Our first explorations on the remote East Antarctic coastline will be at Cape Denison, Commonwealth Bay. Here we hope to see, and experience, Mawson’s Hut – established for the 1911-1914 Australasian Antarctic Expedition – and its environs, which includes the Memorial Cross to expeditioners Ninnis and MacNab who perished during the Eastern three man ‘Far Eastern Party’ sledging trip (which Mawson himself barely survived). Nesting near the hut are substantial numbers of Adelie Penguin and Wilson’s Storm-Petrel.

Dumont d’Urville, Port-Martin
West from Cape Denison is the French Research Base, Dumont d’Urville, which we will visit if permission is granted and ice conditions permit. The base’s main area of study is wildlife, notably the Emperor Penguin. In summer, the rocks near the base are also home to an Adelie Penguin rookery, as well as Skua, Snow Petrel, Giant Petrel and Cape Petrel. The French base was rebuilt on the current site after a fire destroyed the original research station located at Port Martin, over 60 kilometres east of Dumont d’Urville. We also plan to visit this abandoned site.

McKellar Islands
This group of approximately 30 small islands and rocks were discovered by the Australasian Antarctic Expedition under Mawson. We will not land at these islets but there may be good opportunities for wildlife sightings close by. East from Cape Denison we follow the East Antarctic ice edge towards the Mertz Glacier. The Mertz Glacier emerges from the mountains of East Antarctica in King George V land. Extending into the ocean with a floating tongue, this tongue advanced from 1956 to 2010 a distance of 43 kilometres without engulfing. In 2020 it was struck by the B9B iceberg causing the Mertz Glacier tongue to calve off an iceberg 78 kilometres long. With the extended daylight hours, there is time to enjoy the light bouncing off the ice as we sail. We plan to cruise the icebergs and coastline in the Zodiacs looking for wildlife.

Days 17 to 20: At Sea
When we depart from the spectacular icebound majesty of Antarctica we will have some quieter time at sea to recover from the extensive daylight hours. Travelling along the Antarctic convergence for part of this, we will remain vigilant for sea and birdlife. Take part in a series of lectures designed to prepare you for our visit to Campbell Island.

Days 21 to 22: Campbell Island – Perseverance Harbour
We spend two days exploring the island by foot taking in the panorama of rocky islets and sea stacks; once the lonely preserve of settlers and seal hunters and now returned to nature. Enjoy a easy walk to the nest site of the Southern Royal Albatross at Col Lyall or walk across the hills to Northwest Bay and see the strange and beautiful megaherbs on the hills. These huge pink and yellow wild flowers have adapted well to the harsh conditions. We also seek out other wildlife such as Campbell Island Shags, Light-mantled Sooty Albatross and, on the beaches beyond, young male sea lions testing their strength.

Day 23: Auckland Islands – Carney Harbour
We arrive in Carney Harbour, once the caldera of the Carney volcano. The walls of the caldera have been breached on both the eastern and western sides, separating Adams Island to the south. The eastern entrance is navigable for smaller vessels such as ours. The extensive harbour is rich in history and in opportunities. We have a number of options including a reasonably difficult scramble to a Shy Albatross colony on South West Cape. There will also be the option to Zodiac cruise the pristine shores of Adams Island and Western Harbour. Other options include visiting an abandoned WWII Coastwatcher’s hut and landing on the shores on the north arm of Carney Harbour where the Grafton was wrecked in 1865.

Day 24: Auckland Islands – Enderby Island
Enderby Island is a wildlife rich island with no equal in the Southern Ocean, considered one of the most beautiful of the Subantarctic Islands. Enderby Island’s landscape is a mix of regenerating rata forest – playing host to native songbirds, the Tui and Bellbird, and chatterbox Red-fronted Parakeets – and otherworldly megaherbs. The island is home to the rarest sea lion in the world, the New Zealand Sea Lion, which breeds on Sandy Bay beach where we plan to land. As we walk around the island, we will encounter the Yellow-eyed Penguin, the rarest penguin in the world, and nesting Royal Albatross. We could also see the endemic shag, and Auckland Island Flightless Teal.

Day 25: The Snares
It has been claimed that The Snares are home to more nesting seabirds than all of the British Isles. Uninhabited and protected, the only mammals are New Zealand fur seals and sea lions. Zodiac cruising the jagged coast we should see endemic Snares Crested Penguin, Snares Island Tomtit and Snares Island Fernbird, plus Sooty Shearwater and returning-to-nest Buller’s Albatross.

Day 26: Invercargill
Early this morning we will arrive in Port of Bluff. After a final breakfast and completing Custom formalities we bid farewell to our yellow voyagers and take a complimentary coach transfer to either a central city point or to the airport.

Enquire for a full itinerary and/or Bird and Mammal List.
ESSENTIAL INFORMATION

Detailed Information
Fully detailed dossiers for every voyage listed in this brochure are available on request from our office. These dossiers also act as the final definitive statement of inclusions and other details and are therefore an essential part of the booking contract. After booking we will provide you with Pre-departure Information and Expedition Notes.

Age Requirements
Our expeditions are designed for adults, but may be suitable for mature teenagers. Anyone under the age of 18 must be accompanied by a parent or guardian. Please note that we do not provide an on board children’s programme and children will be the responsibility of their parent or guardian whilst on board.

Flight Information
We do not package international flights to connect with our voyages but in some cases we will charter flights to aid travel to destinations that are not always serviced with regular scheduled air services.

Passport & Visa Requirements
You are required to travel with a current passport (with at least six months’ validity) and visa for all of our expeditions. Other regulations may apply and you should check with the nearest embassy or consulate of the countries that you plan to visit. (please note that Macquarie Island is part of Australia and a valid visa may be required to visit).

Medical Matters
These are expeditions for persons in generally good health. We will be travelling to remote areas without sophisticated medical facilities. The ship has a medical officer and a small infirmary on board but medical attention is limited to basic care. The fee for medical services rendered or medicines supplied will be added to your account.

You will be forwarded a link to a confidential medical questionnaire 4 months prior to departure which we ask that you and, in some cases, your doctor complete and return promptly to enable us to assess if there may be difficulties in you joining the expedition. If there is any substantial change in your medical circumstances between the completion of that document and the expedition departure it is important that you advise us.

Equipment & Clothing Requirements
Our Pre-departure Information details any essential clothing and equipment that is required.

Travel Insurance
You must have it! You may be barred from embarkation if you have no proof of adequate insurance including full medical evacuation cover. If you are arranging your own insurance, you should check that any pre-existing medical conditions are covered as well as all included activities such as snorkelling, landings, Zodiac excursions and charter flights. We recommend purchasing insurance at time of booking in the event of cancellation. Please see points 5 and 6 of the Booking Terms and Conditions for more information.

Adventurous Travel
However good our organisation is, we are at the mercy of the unexpected and this type of expedition can never be entirely predicted. If you are not prepared for this you should not travel with us. Because these are not ordinary package holidays, the outline itineraries given in this brochure are statements of intent rather than promises. Local weather, politics, airlines, transport or a host of other uncontrollable factors can mean a change in itinerary. It is unlikely that the itinerary would be substantially altered, but if changes are necessary the Expedition Leader will decide the best alternative. Where a delay or change does occur, we will do everything we can to minimise its effects, but we cannot be held responsible for the result of delays or changes outside our control.

Cabin Arrangements
Double beds are available in suite accommodation only (and cabin 411). Single guests are matched with a shaper of the same gender in a twin-share cabin. Payment of a single supplement guarantees the sole use of a cabin (1.8 times the p/p rate for cabins, 2 times for suites).

Ship Communications
The radio room on the ship is equipped with a satellite telephone and email for on board communication.

BOOKING YOUR EXPEDITION

Booking Conditions
To make a booking you must send us a completed booking form and a deposit of 25% for your selected voyage. We will then invoice you for the balance, which must be paid no later than 90 days (with the exception of voyages to the Antarctic, the Northern Sea Route and Wrangel Island where it is 120 days) before departure. If you book less than 90 days before departure, full payment is due immediately.

Once you have decided which voyage is for you, please check availability by calling our office or visiting your travel agent. We can normally hold space (option) for you for 7 days while you send in the booking form. We strongly recommend that you read the brochure description, dossiers, general pages and booking conditions carefully.

Most travellers to Russia require a valid visa as well as regional permits to visit the Russian Far East. The Heritage Expeditions office can arrange a visa invitation as well as the necessary permits required, but we must work to local government deadlines, so we strongly recommend booking as early as possible.

Completing The Booking Form
• Ensure your name is spelt exactly as it appears in your passport.
• Please specify any special dietary requirements as soon as possible.
• Please attach a copy of the passport you will be travelling on and inform us immediately if this changes for any reason. Check that your passport is valid for the required time beyond your period of stay, if not you may need to obtain a new passport.
• Would you like a single cabin? If so please request this on the booking form.
• Are you insured? We do require you to be insured and have suitable cover for the expedition.
• Where did you hear about us? E.g. Recommendation from whom, advertisement, internet search, etc.

IMPORTANT! Please ensure that you sign the booking form. This indicates that you have read the booking conditions and agree to abide by them and also, having read the information provided, you understand what is involved in the voyage. If there are minors (under the age of 18) in your party, you should sign the booking form for them and this indicates that you are taking responsibility for them.

Then
• Send the fully completed booking form with a deposit of 25%.
• You may pay your deposit over the telephone by Visa or Mastercard and this will secure your place (direct bookings only).
• We also accept telegraphic transfers; please contact us for our bank account details.
• A signed booking form must be received in our office within 14 days of bookings made by phone.
• Forward a colour copy/scan of the photo page of your valid passport you will be travelling on.
• Please note a 2.5% fee will be added for any payments made by credit card following your initial deposit.
• It has come to our attention recently that some telegraphic transfers have had bank fees deducted from intermediary banks. Please note that all bank fees are to the customer’s charge. All outstanding balances, including minor values due to bank fee shortfall wil need to be paid in full prior to departure. To avoid your payment coming through short, please instruct your bank to pay all bank fees and to instruct the intermediary (correspondent) bank that all charges are to be returned to the originating bank.

What Happens Next?
Your booking will normally be confirmed within a week, although in busy periods it may take a little longer.

Final Payment
The balance of your payment is due 90 days (120 days for Antarctic, the Northern Sea Route and Wrangel Island voyages) before departure. The exact date will be shown on your invoice. Although we accept credit cards (Visa or Mastercard) these will be subject to a 2.5% fee (direct bookings only), we do prefer the final balance to be paid by telegraphic transfer.

Lastly
Between 14 to 30 days before departure we will send out your final joining instructions. Please check these details carefully. If you have not received your final joining instructions at least 1 week before departure, please contact us. If you have any concerns about these details or any last questions about your holiday please do not hesitate to contact us immediately.
PERSONAL DETAILS

APPLICANT ONE (details as shown in passport)

Title:  □ Mr  □ Mrs  □ Ms  □ Other

BOOKING TERMS & CONDITIONS

Thank you for choosing to book with Heritage Expeditions [2018] Ltd. (hereafter referred to as 'HE'). Before you make a firm booking, we recommend you (hereinafter referred to as 'you') read the following travel conditions. These general travel conditions and the specific conditions applicable to both private persons (direct bookings) and (travel) organisations (see paragraph 1.2).

1. Reservation of trip/travel confirmation

1.1 If the contract comes about by means of a written acceptance by the contracting party to the offer of HE, upon which a binding travel contract with HE is effective, the reservations set out in paragraph 1.3 up to and including paragraph 11.3 apply. If the contracting party, in addition to himself/herself, lists one or more other persons on an notification form, this contracting party is automatically responsible for all obligations ensuing from the travel contract (in line with the general travel conditions of HE) concerning himself/herself and the other persons booked.

1.2 If the contract has come about by means of a verbal acceptance by a (travel) organisation (as in the case of, but not limited to, private persons, operators, agencies, travel agents, foundations, societies etc), this (travel) organisation enters into a binding travel contract with HE. The (travel) organisation in question is subsequently considered as the contracting party to which all conditions set out from paragraph 2.2 up to and including paragraph 11.3 apply. This is irrespective of the possibility of the (travel) organisation in turn enters into a binding travel contract with clients it has recruited (such as, but not limited to, private persons, operators (the) travel organisation, travel agents and third parties in general).

1.3 If the contract has come about, before the effecting of the travel contract and its implementation, provide HE with personal data concerning himself/herself and third parties – in case of (travel) organisation the client(s) of the (travel) organisation, incorrect or incomplete personal data could result in faulty vouchers, etc. for which HE is not liable.

1.4 On receipt of the written booking form, the trip that has been booked will be confirmed by HE by means of a confirmation invoice sent to the contracting party.

1.5 Single travellers who wish to share their cabin/hotel room should so indicate on the notification form. The published person double occupancy fare is guaranteed in this case, whereas single occupancy fare is guaranteed when the published fare on all cabins except suite cabins which will be charged if 2 times the published fare.

2. The travel offer/the travel confirmation

2.1 The scope of the travel offer (the travel elements) booked by the contracting party is contractually recorded in the travel confirmation (invoice) in combination with the description from HE’s most up-to-date brochure/programme description.

2.2 Any deviation from the travel elements described in the brochure and publications are void unless if confirmed in writing by HE. This may be in the original offer, travel confirmation or a communication sent later.

3. Payment

3.1 Implementation of the travel contract, the contracting party must pay to HE an advance of 25% of the total price, unless otherwise stated in the travel confirmation. The remaining 75% of the total price is due 90 days (with the exception of voyages travelling to the Antarctic, the Northern Sea Route and Wrangel Island where this is due 120 days prior to departure). In the case of a (travel) organisation that has guaranteed allocation, the following payment conditions apply: 25% of total deposit on signing the contract, 25% of total price 12 days prior to departure, 50% of total price 180 days prior to departure.

3.2 All payments must be made to HE, the travel documents will be dispatched.

3.3 If the contracting party fails to fully their payment obligations, HE will send him/her a written reminder and he/she will have the opportunity to make immediate payment. If payment is still not made after 5 hours, the travel contract is void and HE is entitled to charge the following cancellation costs.

3.4 Should the above, payment is then made, but HE cannot send the travel documents to the contracting party before the start of the journey, any additional dispatch costs will be charged to the contracting party. HE will not be held responsible for any travel documents not arriving on time.

4. Changes in travel elements/price changes

4.1 Changes to the travel offer, which occur after the start of the journey and are agreed in the travel confirmation, are permitted only if they do not substantially alter the nature of the trip. This includes, among other things, changes made by the airline, changes in flight departure times, changes referring to the start of the main journey, minor changes in the travel programme that are listed in the trip offer. HE is entitled to inform, in writing, the contracting party of such changes. Such changes may not be used by the contracting party as reason for cancelling the travel contract.

4.2 The agreed price is based on the prices, exchange rates, duties and taxes as known to HE at the time the publication went to press and at the time of the travel confirmation, HE reserves the right to raise the agreed price on the grounds of, among other things, unforeseeable increases (e.g. exchange rates, sudden increased prices of accommodation providers, airlines, duties, taxes and fuel prices). In the event that HE considers a price alteration a considered necessity, HE is obliged to inform the contracting party of this, in writing, at the latest 20 days before the day of departure. Price increases are not permitted within 20 days of the start of the journey, in the case of a price increase of more than 10% of the total price after the contract is signed, the contracting party is entitled to cancel the trip without incurring any cost.

5. Cancellation of the trip by HE

5.1 If the minimum number of participants has not been achieved, HE is entitled to cancel the planned trip up to 30 days before departure. Any payment already received from the contracting party will be paid back by HE if the trip is cancelled.

5.2 The right to a trip in the case of force majeure (e.g. war, uprising, natural disasters, abnormal exceptional weather and ice conditions, legal stipulations of the local/ regional authorities and acts of God’), HE will not be held liable for force majeure. If situations of force majeure occur before the departure date, HE will pay back to the contracting party the amount paid. If situations of force majeure occur during the trip, HE will try to offer an alternative programme. If this should prove impossible, either HE or the contracting party is entitled to cancel the trip. If this happens, HE will not be held financially liable. However, in the case of any cost savings, HE shall return these monies to the contracting party. HE is obliged to assist the passenger(s) in obtaining a return trip/flight.

5.3 If, by virtue of the provisions of paragraph 5.1 and 5.2, cancels the trip, the only expense before the billed price will be paid back to the contracting party. HE will not be held liable to the contracting party has incurred in preparation of the trip nor for travel components (such as but not limited to: flights, hotels, connecting programmes, travel insurances), which, in combination with the trip booked, may have been booked elsewhere.

5.4 If, by force of circumstances to which HE is not liable (such as but not limited to: acts of God), HE is unable to provide a trip as agreed or the (travel) organisation that has arranged the trip, HE is entitled to charge the following cancellation costs stated in paragraph 6.1 apply.

5.5 If, by force of circumstances to which HE is not liable (such as but not limited to: acts of God), HE is unable to provide a trip as agreed or the (travel) organisation that has arranged the trip, HE is entitled to charge the following cancellation costs stated in paragraph 6.1 apply.

6. Cancellation of the trip by the contracting party

6.1 The contracting party may cancel the travel contract (exclusively in writing) at any time before the beginning or at the end of the stay. In the case of the cancellation by the contracting party HE is entitled to charge or may charge any costs to the contracting party: for cancellations received more than 180 days prior to the departure date, a full refund will be made less a USD50 per person administration fee for cancellations received within 179 and 91 days’ of the embarkation date as known to HE as well as all unpaid monies are due immediately. (*with the exception of voyages to the Antarctic, the Northern Sea Route and Wrangel Island where loss of deposit is 180 days and full loss within 120 days). If the contracting party, after booking, wishes to change the booked trip (e.g. the itinerary, departure date or type of accommodation), this is considered a change of date and the cancellation costs stated in paragraph 6.1 apply.

6.2 Cancellation of the travel contract – in the case of a (travel) organisation, the client(s) or the (travel) organiser, to take out cancellation insurance to cover the costs of any cancellation of the trip (see also paragraph 10.4).

7. Liability of HE

7.1 In the event of any error or omission in the travel documents.

7.2 All travel elements booked with HE, wishes to make changes to the booked trip (e.g the itinerary, departure date or type of accommodation), this may be possible, as the case may be, the diving base or the diving leader on board our ship will ask the

8. Exclusion and limitation of the liability of HE

8.1 HE is not liable for any damage caused by the sale of travel elements between, on the one hand, providers of accommodation/services (such as but not limited to: a stay in a hotel, a voyage on a ship, services of dive bases and providers of transport) and, on the other hand, the (travel) organisation and therefore HE’s liability is excluded. In these cases the travelling passenger(s) and/or (inter)national law applies (such as but not limited to: acts of God). HE is not liable. However, in the case of any cost savings, HE shall return these monies to the contracting party.

8.2 HE is not liable for the costs of any (inter)national law applies (such as but not limited to: acts of God). HE is not liable. However, in the case of any cost savings, HE shall return these monies to the contracting party.

8.3 All travel elements booked with HE, wishes to make changes to the booked trip (e.g the itinerary, departure date or type of accommodation), this may be possible, as the case may be, the diving base or the diving leader on board our ship will ask the...
contracting party to sign a form to which the contracting party accepts 100% own risk and promises that he will not lodge any claims against the diving base and/or he is responsible for the driver. If the passenger is injured or killed, he shall bear full responsibility for the consequences.

8.4 He will not be held liable for loss, injury or death even if this is at the cost of damage to baggage. In the case of the air travel component in the price of the trip, the passenger is not in possession of the baggage. The passenger must himself/herself obtain the necessary information from the relevant authorities and before departure check whether there have been any changes concerning travel documents provided at an earlier date.

8.5 If the contracting party does not have exclusive jurisdiction. The contracting party – in the case of a (travel) organisation – to always take out travel insurance, supplemented if necessary by accident insurance (see also paragraph 10.4).

8.6 If HE offers the contracting party an air travel component, all liability is limited to the passenger and, for this travel component, the conditions of the relevant airline apply. The Warsaw Convention in general limit the responsibility of the operator with respect to passenger safety in the case of death, injury and also delays, loss of, or damage to baggage and/or other travel elements of the trip booked.

8.7 The passages offered by HE are conducted mainly in ‘marginal zones’ and require the qualification of expedition trips to place the passenger in the character of the trip.

9. Obligations of the contracting party

9.1 The contracting party is obliged to comply with all instructions given by HE and the trip leader or local agent, and to carry out the arrangements made by the (travel) organisation.

9.2 Any other obligations the contracting party may have in the event of unforeseen circumstances, including the obligation to make any claim for restitution of (all or part of) the price.

9.4 The contracting party does not enjoy generally sound health. We advise the contracting party – in the case of a (travel) organisation – to always take out travel insurance, supplemented if necessary by accident insurance (see also paragraph 10.4). The risk belongs to Heritage Expeditions (New Zealand) Ltd, Antarctic House, PO Box 7218, Christchurch 8240, New Zealand. All matters ensuing from this travel contract are the responsibility of Heritage Expeditions (New Zealand) Ltd, Antarctic House, PO Box 7218, Christchurch 8240, New Zealand.

9.5 If the trip was booked on the basis of a holiday payment the Expedition Leader is at all times authorised to deviate from the programme. He/she is of the opinion that it would be to the benefit of the quality of the programme. In such a case the passenger will not be held liable for payment of restitution.

9.6 If an immediate solution for the complaints cannot be found, the contracting party – in the case of a (travel) organisation – to present these complaints to the relevant (travel) organisation, where the trip was booked, upon which the (travel) organisation shall be obliged to report the complaint to HE and request assistance. In the case of complaints about travel elements, HE can decide to offer an alternative programme (e.g. hotel, cabin, excursion package) that is virtually identical to that in the originally booked trip (the official booked travel component).

9.7 HE (incl. the representatives, trip leadership, local agent) is entitled to reject the complaint if the complaint does not seriously influence the character of the trip and/or the result of the complaint is not in hindrance of only minor significance, if exaggerated demands are made, if it is impossible to prove, or if the contracting party is not in possession of the contract (all or part of) the price. HE shall provide general information to the passenger and HE specifically declines any responsibility whatsoever.

9.8 If the complaint has not been satisfactorily dealt with during the trip, the (travel) organisation shall be entitled to offer an alternative programme for the contracting party in question or, in extreme cases, to exclude this person from (certain) excursions or (parts of the) diving programme. These limitations apply also if the contracting party is not in possession of the correct (diving) gear, as stated in HE’s publications. In the case of exclusion (or of a mandatory alternative programme) the contracting party is not entitled to make any claim for restitution of (all or part of) the price.

9.9 If HE has not satisfactorily settled the complaint or if proper satisfaction has not been given in this manner, the contracting party is entitled to present the dispute to the Disputes Tribunal of New Zealand (which court shall have exclusive jurisdiction).

10. Baggage/travel documents and insurance

10.1 The contracting party must have in his/her possession an air ticket or he/she is of the opinion that it would be necessary to have the trip the necessary travel documents such as a valid passport, a (credit) card and any required visa, diving certificates, diving logbook and a signed certificate from the doctor, proof of inoculations and vaccinations. The passenger is unable to take up (part of) the trip in the event of any (valid) documents, HE will not be held (financially) responsible, unless HE has been able to provide that document.

10.2 If the very latest, on the signing of the travel contract, HE shall provide general information to the passenger and HE specifically declines any responsibility whatsoever.

11. General

11.1 If the duration of the trip as stated in the publication is given in days, the day of departure and the day of arrival, irrespective of departure or arrival times, are counted as full days. The definite departure and arrival times are given in the travel documents.

11.2 The laws of New Zealand apply to this contract and all matters ensuing from this contract.

11.3 This agreement and its content belongs to Heritage Expeditions (2018) Ltd, Antarctic House, PO Box 7218, Christchurch 8240, New Zealand.
